## PassLeader will Help You in Passing the SAP C\_ABAPD\_2507 Certification Exam

To pass the SAP Certified Associate - Back-End Developer - ABAP Cloud (C\_ABAPD\_2507) certification exam you need to prepare well with the help of top-notch SAP Certified Associate - Back-End Developer - ABAP Cloud (C\_ABAPD\_2507) exam questions which you can download from platform. On this platform, you will get valid, updated, and real SAP C\_ABAPD\_2507 Dumps for quick exam preparation.

## SAP Certified Associate - Back-End Developer - ABAP Cloud Sample Questions (Q66-Q71):

### NEW QUESTION # 66

Which of the following actions cause an indirect change to a database table requiring a table conversion?  
(Select 2)

- A. Renaming a field in a structure that is included in the table definition.
- B. Deleting a field from a structure that is included in the table definition.
- C. Changing the field labels of a data element that is used in the table definition.
- D. Shortening the length of a domain used in a data element that is used in the table definition.

**Answer: B,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

\* In ABAP Cloud projects, structural changes to persisted artifacts must respect upgrade-safe contracts.

Changes that alter the physical layout of a table (removing a column that comes via an included structure, or shortening the length of a column by changing its domain) lead to a database conversion because data type/column layout changes must be reconciled on the DB. While our RAP/CDS guides focus on modeling and service exposure, they emphasize strict, typed modeling and upgrade stability- any structural change that affects persistence is subject to strict checks and lifecycle handling.

\* By contrast, field labels (texts) do not change the physical table layout and thus don't require a conversion.

### NEW QUESTION # 67

Which of the following are ABAP Cloud Development Model rules?

Note: There are 2 correct answers to this question.

- A. Reverse modifications when a suitable public SAP API becomes available.
- B. Use public SAP APIs and SAP extension points.
- C. Build ABAP reports with either ABAP List Viewer (ALV) or SAP Fiori.
- D. Build ABAP RESTful application programming model-based services.

**Answer: A,B**

Explanation:

Use public SAP APIs and SAP extension points. This rule ensures that the ABAP Cloud code is stable, reliable, and compatible with the SAP solutions and the cloud operations. Public SAP APIs and SAP extension points are the only allowed interfaces and objects to access the SAP platform and the SAP applications. They are documented, tested, and supported by SAP. They also guarantee the lifecycle stability and the upgradeability of the ABAP Cloud code1.

Build ABAP RESTful application programming model-based services. This rule ensures that the ABAP Cloud code follows the state-of-the-art development paradigm for building cloud-ready business services. The ABAP RESTful application programming model (RAP) is a framework that provides a consistent end-to-end programming model for creating, reading, updating, and deleting (CRUD) business data. RAP also supports draft handling, authorization checks, side effects, validations, and custom actions. RAP exposes the business services as OData services that can be consumed by SAP Fiori apps or other clients2.

### NEW QUESTION # 68

Which RESTful Application Programming object can be used to organize the display of fields in an app?

- A. Service definition
- B. Data model view
- C. Projection view
- D. Metadata extension

**Answer: D**

### NEW QUESTION # 69

In which products must you use the ABAP Cloud Development Model? Note: There are 2 correct answers to this question.

- A. SAP BTP, ABAP environment
- B. SAP S/4HANA on premise
- C. SAP S/4HANA Cloud, private edition

- D. SAP S/4HANA Cloud, public edition

**Answer: A,C**

Explanation:

The ABAP Cloud Development Model is the ABAP development model to build cloud-ready business apps, services, and extensions. It comes with SAP BTP and SAP S/4HANA. It works with public or private cloud, and even on-premise<sup>1</sup>. However, the complete ABAP Cloud Development Model, including the cloud-optimized ABAP language and public local SAP APIs and extension points, is available only in SAP BTP ABAP Environment and in the 2208/2022 versions of the SAP S/4HANA editions<sup>1</sup>. Therefore, you must use the ABAP Cloud Development Model in SAP BTP, ABAP environment and SAP S/4HANA Cloud, private edition. You can also use it in SAP S/4HANA on premise, but it is not mandatory. You cannot use it in SAP S/4HANA Cloud, public edition, because it does not allow custom ABAP code<sup>2</sup>. ### NEW QUESTION # 70

What describes multi-column internal tables?

- **A. They are based on a structured row type.**
- B. They must contain nested components.
- C. They use one incomplete data type.
- D. They use one complete data type.

**Answer: A**

### NEW QUESTION # 71

.....

PassLeader is a very good website for SAP certification C\_ABAPD\_2507 exams to provide convenience. According to the research of the past exam exercises and answers, PassLeader can effectively capture the content of SAP Certification C\_ABAPD\_2507 Exam. PassLeader's SAP C\_ABAPD\_2507 exam exercises have a very close similarity with real examination exercises.
