Exam 300-710 Exercise | 300-710 Valid Test Format

Our company deeply knows that product quality is very important, so we have been focusing on ensuring the development of a high quality of our 300-710 test torrent. All customers who have purchased our products have left deep impression on our 300-710 guide torrent. Of course, the customer not only has left deep impression on the high quality of our products but also the efficiency of our products. Our 300-710 Exam Questions can help you save much time, if you use our 300-710 study prep, you just need to spend 20-30 hours on learning, and you will pass your 300-710 exam successfully.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q308-Q313):

NEW QUESTION # 308

Which interface type allows packets to be dropped?

- A. inline
- B. TAP
- C. ERSPAN
- D. passive

Answer: A

Explanation:

Section: Deployment

Explanation/Reference: <https://www.cisco.com/c/en/us/support/docs/security/firepower-ngfw/200908-configuring-firepower-threat-defense-int.html>

NEW QUESTION # 309

An analyst is reviewing the Cisco FMC reports for the week. They notice that some peer-to-peer applications are being used on the network and they must identify which poses the greatest risk to the environment. Which report gives the analyst this information?

- A. Network Risk Report
- B. User Risk Report
- C. Advanced Malware Risk Report
- D. Attacks Risk Report

Answer: A

NEW QUESTION # 310

What is the result when two users modify a VPN policy at the same time on a Cisco Secure Firewall Management Center managed device?

- A. The system prevents modifications to the policy by multiple users.
- B. The changes from both users will be merged together into the policy.
- C. The first user locks the configuration when selecting edit on the policy.
- D. Both users can edit the policy and the last saved configuration persists.

Answer: C

Explanation:

In Cisco Secure Firewall Management Center (FMC), when two users attempt to modify a VPN policy simultaneously, the system implements a locking mechanism to prevent conflicts. The first user who selects edit on the policy locks the configuration, preventing other users from making changes until the lock is released.

Steps:

When the first user selects edit on the VPN policy, FMC locks the policy for editing. The lock ensures that only the first user can make changes.

Once the first user saves or cancels their changes, the lock is released.

Other users can then edit the policy.

This locking mechanism ensures that configuration conflicts are avoided and only one set of changes is applied at a time.

NEW QUESTION # 311

What is the disadvantage of setting up a site-to-site VPN in a clustered-units environment?

- A. Smart License is required to maintain VPN connections simultaneously across all cluster units.
- B. Only established VPN connections are maintained when a new master unit is elected.
- C. VPN connections can be re-established only if the failed master unit recovers.
- D. VPN connections must be re-established when a new master unit is elected.

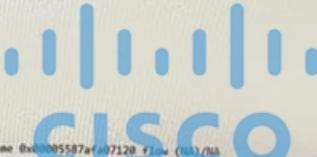

Answer: D

Explanation:
