Pass4sure CheckPoint 156-536 Exam Prep, 156-536 New Exam Bootcamp
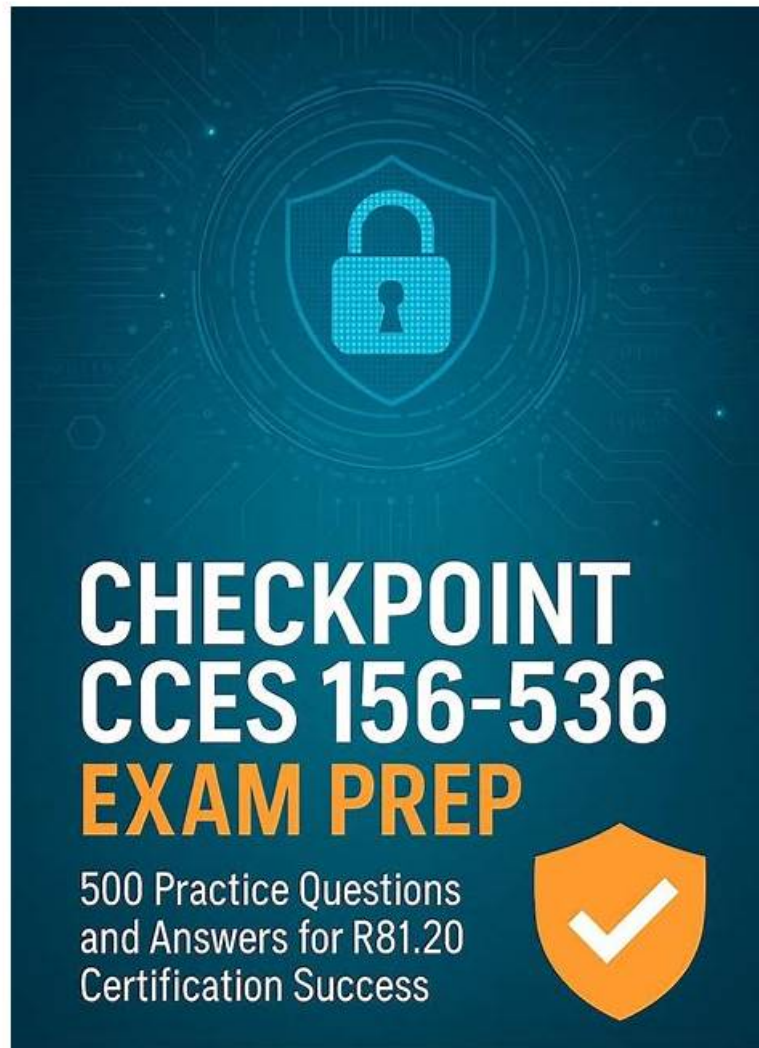

Even in a globalized market, the learning material of similar 156-536 doesn't have much of a share, nor does it have a high reputation or popularity. In this dynamic and competitive market, the 156-536 study materials can be said to be leading and have absolute advantages. In order to facilitate the user real-time detection of the learning process, we 156-536 practice materials provided by the questions and answers are all in the past.it is closely associated, as our experts in constantly update products every day to ensure the accuracy of the problem, so all 156-536 practice materials are high accuracy.

The PDF version of our 156-536 study tool is very practical, which is mainly reflected on the special function. As I mentioned above, our company are willing to provide all people with the demo for free. You must want to know how to get the trial demo of our 156-536 question torrent; the answer is the PDF version. You can download the free demo form the PDF version of our 156-536 Exam Torrent. If you download our study materials successfully, you can print our study materials on pages by the PDF version of our 156-536 exam torrent.

CheckPoint 156-536 New Exam Bootcamp, 156-536 Valid Test Duration

Even the fierce competition cannot stop demanding needs from exam candidates. To get more specific information about our 156-536 learning quiz, we are here to satisfy your wish with following details. So you can get detailed information with traits and information about our 156-536 Real Exam requested on the website. You can free download the demos of our 156-536 exam questions and click on every detail that you are interested.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshooting: In this final section, CheckPoint Security Administrators will demonstrate their troubleshooting skills related to Harmony Endpoint. This involves identifying and resolving issues that may arise during deployment or operation of the endpoint security solution.
Topic 2	• Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.
Topic 3	• Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.
Topic 4	• Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.
Topic 5	• Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q44-Q49):

NEW QUESTION # 44
External Policy Servers are placed between the Endpoint clients and the Endpoint Security Management Server. How many Policy Servers are supported per environment?

- A. From 1 to 5 Policy Servers are supported
- B. From 1 to 25 Policy Servers are supported
- C. From 1 to 15 Policy Servers are supported
- D. From 1 to 20 Policy Servers are supported

Answer: B

NEW QUESTION # 45
The Endpoint administrator prepared deployment rules for remote deployment in a mixed desktop environment. Some of the non-Windows machines could not install Harmony Endpoint clients. What is the reason for this?

- A. Deployment rules are not supported on macOS clients
- B. macOS clients are not supported by Harmony Endpoint
- C. Administrator doesn't run chmod command, to allow execution permission to the deployment script
- D. Deployment rules were assigned to users not to machines

Answer: A

Explanation:

The official Check Point Harmony Endpoint documentation clearly states that deployment rules (automatic deployment) are not supported for macOS clients. macOS client deployments must instead be performed manually using exported packages or third-party deployment methods.

Exact Extract from Official Document:

"Deploy New Endpoints... macOS: No" (indicating that deployment rules cannot automatically deploy endpoints for macOS)

Reference:Check Point Harmony Endpoint Specialist R81.20 Administration Guide.

NEW QUESTION # 46

Why is it critical to change the default Agent Uninstall Password?

- A. All passwords and critical data are protected by Full Disk Encryption. The Endpoint agent supports pre-boot authentication so nobody can bypass the agent's security.
- B. There is no need to change it because only the local PC administrator can uninstall the agent.
- C. You have to change the default Agent Uninstall Password because if you do not, it will be easy for a malware to uninstall the agent itself.
- D. The default password used is easy to guess.

Answer: C

NEW QUESTION # 47

Does the Endpoint Client GUI provide automatic or manual prompting to protect removable storage media usage?

- A. Automatic Only
- B. Either automatic or manual
- C. Manual Only
- D. Neither automatic nor manual

Answer: B

Explanation:

The Endpoint Client GUI in Check Point Harmony Endpoint provideseither automatic or manual promptingto protect removable storage media usage, depending on how the administrator configures the system. This functionality is part of the Media Encryption & Port Protection component, which allows flexible control over removable media such as USB drives. According to theCP_R81. 20_Harmony_Endpoint_Server_AdminGuide.pdfonpage 282, under the section "Working with Actions in a Media Encryption & Port Protection Rule," the documentation states:

"You can configure rules to automatically encrypt media or prompt users to encrypt or access media in a protected manner." This extract confirms that administrators can set policies to either automatically apply encryption (automatic prompting) or require user interaction (manual prompting) when removable media is detected. For example, an automatic rule might encrypt a USB drive without user intervention, while a manual rule might display a prompt in the Endpoint Client GUI asking the user to confirm encryption or access permissions. This dual capability makesOption B ("Either automatic or manual")the correct answer.

* Option A ("Manual Only")is incorrect because the system supports automatic prompting, not just manual.

* Option C ("Automatic Only")is incorrect because manual prompting is also an available option.

* Option D ("Neither automatic nor manual")is false, as the documentation clearly describes both methods.

References:

CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 282: "Working with Actions in a Media Encryption & Port Protection Rule" (describes the ability to configure automatic encryption or user prompts for removable media).

NEW QUESTION # 48

You're going to prepare a Deployment Scenario of an Endpoint Security Client on a Windows machine in an On-Prem environment. You choose one of two basic deployments - which is typical for a local deployment?

- A. Agent (Initial Client) package only
- B. Agent (Initial Client) and Software Blades packages
- C. Agent (free Client) package only
- D. Agent-less (no Client) and Software Blades packages

Answer: B

Explanation:

For typical local (On-Premises) deployments, the deployment scenario includes both the Agent (Initial Client) and Software Blades packages. The Initial Client ensures connectivity, and Software Blades provide the actual security functionalities.

Exact Extract from Official Document:

"Typical local deployment scenarios include both the Initial Client and the Software Blades packages for comprehensive protection."

Reference:Check Point Harmony Endpoint Specialist R81.20 Administration Guide, "Deploying Endpoint Security Clients."

NEW QUESTION # 49

......

People need to increase their level by getting the CheckPoint 156-536 certification. If you take an example of the present scenario in this competitive world, you will find people struggling to meet their ends just because they are surviving on low-scale salaries. Even if they are thinking about changing their jobs, people who are ready with a better skill set or have prepared themselves with CheckPoint 156-536 Certification grab the chance.
