

AZ-305 Authorized Certification & New AZ-305 Test Pass4sure

2026 Latest PassExamDumps AZ-305 PDF Dumps and AZ-305 Exam Engine Free Share: https://drive.google.com/open?id=1DYJQDJzKnpBd6_COivnDKgzXseUe6Tpc

Our AZ-305 practice guide is cited for the outstanding service. In fact, we have invested many efforts to train our workers. All workers will take part in regular training to learn our AZ-305 study materials. So their service spirits are excellent. We have specific workers to be responsible for answering customers' consultation about the AZ-305 Learning Materials. All our efforts are aimed to give the best quality of AZ-305 exam questions and best service to our customers.

The Microsoft AZ-305 exam is designed to assess a candidate's ability to design Azure solutions that meet business requirements, as well as their understanding of Azure services and their use in different scenarios. AZ-305 exam covers a range of topics, including designing compute and storage solutions, designing networking solutions, and designing security solutions.

Microsoft AZ-305 exam is designed for IT professionals who are interested in designing solutions on Microsoft Azure. AZ-305 Exam measures the candidates' knowledge and skills in designing, implementing, and monitoring Microsoft Azure infrastructure solutions. AZ-305 exam tests the candidates on their ability to design solutions for compute, storage, networking, security, and monitoring on the Azure platform.

New AZ-305 Test Pass4sure, AZ-305 Latest Torrent

We assure that you can not only purchase high-quality AZ-305 prep guide but also gain great courage & trust from us. A lot of online education platform resources need to be provided by the user registration to use after purchase, but it is simple on our website. We provide free demo of AZ-305 guide torrent, you can download any time without registering. Fast delivery—after payment you can receive our AZ-305 Exam Torrent no more than 10 minutes, so that you can learn fast and efficiently. Besides, we provide 24*365 online service and remote professional staff to guide you about downloading or using our AZ-305 exam torrent. Still other more service terms are waiting for your experience. Why don't you try and purchase our AZ-305 prep guide?

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q205-Q210):

NEW QUESTION # 205

Hotspot Question

Your company develops a web service that is deployed to an Azure virtual machine named VM1.

The web service allows an API to access real-time data from VM1.

The current virtual machine deployment is shown in the Deployment exhibit.

The chief technology officer (CTO) sends you the following email message: "Our developers have deployed the web service to a virtual machine named VM1. Testing has shown that the API is accessible from VM1 and VM2. Our partners must be able to connect to the API over the Internet.

Partners will use this data in applications that they develop."

You deploy an Azure API Management (APIM) service. The relevant API Management configuration is shown in the API exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

<https://docs.microsoft.com/en-us/azure/api-management/api-management-using-with-vnet>

NEW QUESTION # 206

You have an on-premises file server that stores 2 TB of data files.

You plan to move the data files to Azure Blob storage in the Central Europe region.

You need to recommend a storage account type to store the data files and a replication solution for the storage account. The solution must meet the following requirements:

* Be available if a single Azure datacenter fails.

* Support storage tiers.

* Minimize cost.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Account Type: StorageV2

Replication solution: Zone-redundant storage (ZRS)

NEW QUESTION # 207

You have an on-premises database that you plan to migrate to Azure.

You need to design the database architecture to meet the following requirements:

* Support scaling up and down.

* Support geo-redundant backups.

* Support a database of up to 75 TB.

* Be optimized for online transaction processing (OLTP).

What should you include in the design? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Azure SQL Database

Azure SQL Database:

Database size always depends on the underlying service tiers (e.g. Basic, Business Critical, Hyperscale).

It supports databases of up to 100 TB with Hyperscale service tier model.

Active geo-replication is a feature that lets you to create a continuously synchronized readable secondary database for a primary database. The readable secondary database may be in the same Azure region as the primary, or, more commonly, in a different region. This kind of readable secondary databases are also known as geo-secondaries, or geo-replicas.

Azure SQL Database and SQL Managed Instance enable you to dynamically add more resources to your database with minimal downtime.

Box 2: Hyperscale

:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/active-geo-replication-overview>

NEW QUESTION # 208

Hotspot Question

You are designing a software as a service (SaaS) application that will enable Azure Active Directory (Azure AD) users to create and publish online surveys. The SaaS application will have a front-end web app and a back-end web API. The web app will rely on the web API to handle updates to customer surveys.

You need to design an authorization flow for the SaaS application. The solution must meet the following requirements:

- To access the back-end web API, the web app must authenticate by using OAuth 2 bearer tokens.
- The web app must authenticate by using the identities of individual users.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Azure AD

The Azure AD server issues tokens (access & refresh token). See step 5 below in graphic.

OAuth 2.0 authentication with Azure Active Directory.

The OAuth 2.0 is the industry protocol for authorization. It allows a user to grant limited access to its protected resources. Designed to work specifically with Hypertext Transfer Protocol (HTTP), OAuth separates the role of the client from the resource owner. The client requests access to the resources controlled by the resource owner and hosted by the resource server (here the Azure AD server). The resource server issues access tokens with the approval of the resource owner. The client uses the access tokens to access the protected resources hosted by the resource server.

Box 2: A web API

Delegated access is used.

The bearer token sent to the web API contains the user identity.

The web API makes authorization decisions based on the user identity.

NEW QUESTION # 209

You are designing a data analytics solution that will use Azure Synapse and Azure Data Lake Storage Gen2.

You need to recommend Azure Synapse pools to meet the following requirements:

* Ingest data from Data Lake Storage into hash-distributed tables.

* Implement, query, and update data in Delta Lake.

What should you recommend for each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 210

.....

In order to help you get AZ-305 certification, many experts have worked hard for several years to formulate AZ-305 exam torrent for all examiners. In such a way, our AZ-305 study materials not only target but also cover all knowledge points. Our AZ-305 practice materials also have a statistical analysis function to help you find out the deficiency in the learning process of AZ-305 practice materials, so that you can strengthen the training for weak links. In this way, you can more confident for your success since you have improved your ability.
