

New HPE7-A06 Exam Book, Pass HPE7-A06 Test Guide

2026 Latest ExamsTorrent HPE7-A06 PDF Dumps and HPE7-A06 Exam Engine Free Share: https://drive.google.com/open?id=1nStQato_alpwexWkwg6WB0lner8OJZnr

The HPE Campus Access Switching Expert Written Exam (HPE7-A06) Exam Questions offered by ExamsTorrent provide you with a good idea of what you can expect in the HPE7-A06 exam from HP. All the HPE7-A06 exam topics and objectives are well covered by our product. Thus, ExamsTorrent HP HPE7-A06 Practice Questions are considered a very good resource that will help you in your practicing by focusing on your weak points and strengthening them to easily pass the HPE7-A06 exam.

The ExamsTorrent HP HPE7-A06 exam dumps are being offered in three different formats. The names of these formats are HPE7-A06 PDF questions file, desktop practice test software, and web-based practice test software. All these three HPE Campus Access Switching Expert Written Exam exam dumps formats contain the real HP HPE7-A06 Exam Questions that will help you to streamline the HPE7-A06 exam preparation process.

Pass HPE7-A06 Test Guide - Reliable HPE7-A06 Dumps Questions

All contents of the HPE7-A06 exam questions are masterpieces from experts who imparted essence of the exam into our HPE7-A06 study prep. So our high quality and high efficiency HPE7-A06 practice materials conciliate wide acceptance around the world. By incubating all useful content HPE7-A06 training engine get passing rate from former exam candidates of 98 which evince our accuracy rate and proficiency.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q118-Q123):

NEW QUESTION # 118

You have recently configured a switch for 802.1X authentication with HPE Aruba Networking ClearPass. A security admin is seeing events with the following description in ClearPass Event Viewer.

'RADIUS authentication attempt from unknown NAD (10.10.1.10:1812)'

Which command should you use to identify the configuration issue?

- A. show radius-server detail
- B. show ip source-interface radius
- C. show aaa authentication-server radius
- D. show radius-server shared-secret

Answer: A

Explanation:

show radius-server detail will display the configured RADIUS servers along with their IP addresses and shared secrets. This helps

you verify if the switch's management IP is properly registered as a NAD (Network Access Device) in ClearPass. If the IP used by the switch to send RADIUS requests is not listed as a NAD in ClearPass, you will see the "unknown NAD" error.

NEW QUESTION # 119

Security administrators are complaining about the number of HPE Aruba Networking ClearPass Access Tracker events from the user 'radius-test'. Given the configuration below, how can the number of events be reduced?

```
radius-server tracking user-name radius-test password plaintext Aruba123!  
radius-server host 10.1.1.1 tracking enable
```

- A. Configure 'dead-only' tracking mode.
- B. Decrease the tracking retries.
- C. Increase the tracking interval.
- D. Configure 'any' tracking mode.

Answer: A

Explanation:

The configuration shown enables RADIUS server tracking using the test user radius-test. By default, this generates continuous Access Tracker events because every probe attempt is logged.

To reduce the number of events, the tracking mode should be changed to dead-only, which limits authentication probes to when the RADIUS server is marked as unreachable. This way, ClearPass only sees test authentications when a failure condition occurs, significantly reducing unnecessary log entries.

NEW QUESTION # 120

If users experience packet drops during large file transfers across an HPE network, which parameter should be checked for performance tuning?

- A. MAC aging timer
- B. VLAN priority
- C. LACP priority
- D. MTU size

Answer: D

NEW QUESTION # 121

What is the best practice for using Dynamic Segmentation?

- A. Use LUR to assign roles to devices based on their location and DUR to assign roles to devices based on their user identity.
- B. Use UBT to create isolated networks for specific types of devices.
- C. Use a combination of role-based access and overlay technologies to create a layered security approach.
- D. Use Dynamic Segmentation only on devices that are connected to the network via Wi-Fi.

Answer: C

Explanation:

The question asks for the best practice for using Dynamic Segmentation.

* Dynamic Segmentation Overview: It's an architecture that provides unified policy and segmentation for wired and wireless clients by combining role-based access control, traffic tunneling (like UBT), and overlay technologies (like VXLAN/GRE). Policies are enforced centrally, typically at an Aruba Gateway.

* Analysis of Options:

* A: UBT is a component, but Dynamic Segmentation encompasses more than just creating isolated networks with UBT.

* B: Correctly describes the core principle: using a combination of role-based access (for defining who gets what policy) and overlay technologies (for transporting traffic to the policy enforcement point and providing segmentation). This creates a layered security approach.

* C: Incorrect. A key benefit is unified policy across both wired and wireless access.

* D: LUR and DUR are role types, but how they are assigned isn't the fundamental description of Dynamic Segmentation itself.
* Conclusion: Option B accurately captures the essence of Dynamic Segmentation as a best practice approach, integrating role-based policies with overlay networking for secure, unified access control.
References: Aruba Dynamic Segmentation Solution Guides, Whitepapers, and Configuration Examples. This relates to "Security" (10%), "Authentication/Authorization" (9%), and "Connectivity" (9%).

NEW QUESTION # 122

The client would like to automate the process of troubleshooting issues to have better visibility.
Which solution would you recommend for your client?

- A. Automate processes with scripting like Python
- B. HPE Aruba Networking Fabric Composer
- C. HPE Aruba Networking Switch Multi-Edit Software
- **D. AI Ops integrated into HPE Aruba Networking Central**

Answer: D

Explanation:

AI Ops in HPE Aruba Networking Central provides AI/ML-driven analytics, automated troubleshooting, and proactive insights. This gives clients better visibility and automates the process of detecting, analyzing, and resolving issues, which is exactly what the client is asking for.

NEW QUESTION # 123

.....

Our HPE7-A06 simulating exam is made by our responsible company which means you can gain many other benefits as well. On condition that you fail the exam after using our HPE7-A06 study prep unfortunately, we will switch other versions for you or give back full of your refund. If you are interested to our HPE7-A06 simulating exam, just place your order now. And you will receive it only in a few minutes.
