BONUS!!! Download part of Prep4King ISO-IEC-27001-Foundation dumps for free: <https://drive.google.com/open?id=1sJpZTF82pyZPns-uV2vRrttiAaJNvap9>

Our ISO-IEC-27001-Foundation study tool can help you obtain the ISO-IEC-27001-Foundation certification and own a powerful weapon for your interview. Our ISO-IEC-27001-Foundation qualification test will help you gain recognition with true talents and better adapted to society. Now, I would like to give you a brief introduction in order to make you deepen your impression of our ISO-IEC-27001-Foundation test guides. Our ISO-IEC-27001-Foundation test guides have a higher standard of practice and are rich in content. If you are anxious about how to get ISO-IEC-27001-Foundation certification, considering purchasing our ISO-IEC-27001-Foundation study tool is a wise choice and you will not feel regretted. Our learning materials will successfully promote your acquisition of certification.

## APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.</li> </ul>

## Three Convenient Formats for APMG-International ISO-IEC-27001-Foundation Practice Test Questions

Prep4King ISO-IEC-27001-Foundation Desktop Practice Exam Software: In the Desktop ISO-IEC-27001-Foundation practice exam software version of ISO-IEC-27001-Foundation practice test is updated and real. The software is useable on Windows-based computers and laptops. There is a demo of the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice exam which is totally free. APMG-International ISO-IEC-27001-Foundation practice test is very customizable and you can adjust its time and number of questions.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q26-Q31):

#### NEW QUESTION # 26

Identify the missing word(s) in the following control relating to the Policies for information security control.

"Information security policy and topic-specific policies should be defined, approved by management, [ ? ] and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur."

- A. published, communicated to
- B. established and maintained
- C. published
- D. communicated to

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) states:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This confirms that the missing words are "published, communicated to." The control emphasizes not just defining and approving policies but ensuring they are actively distributed and communicated so that relevant stakeholders are aware of and acknowledge them. Options A, B, and D are partial but incomplete. Thus, the correct answer is C.

#### NEW QUESTION # 27

Which factor is required to be determined when understanding the organization and its context?

- A. The ISO/IEC 27001 clauses which apply to the management system
- B. Internal issues affecting the purpose of the ISMS
- C. The processes that will be required to operate the ISMS
- D. The information security objectives relevant to the ISMS

**Answer: B**

Explanation:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

### NEW QUESTION # 28

Which item is required to be defined when planning the organization's risk assessment process?

- A. The criteria for acceptable levels of risk
- B. How the effectiveness of the method will be measured
- C. The parts of the ISMS scope which are excluded from the risk assessment
- D. There are NO specific information requirements

**Answer: A**

Explanation:

Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.

Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.

Thus, the correct answer is C: The criteria for acceptable levels of risk.

### NEW QUESTION # 29

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The lessons learned from the information security experiences of other organizations
- B. The dependencies between activities performed by the organization
- C. The regular activities necessary to maintain and improve the ISMS
- D. The level of quality to which the ISMS must adhere

**Answer: B**

Explanation:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of:

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

### NEW QUESTION # 30

To whom are the information security policies required to be communicated, according to the control in Annex A of ISO/IEC 27001?

- A. Employees within the scope of the ISMS
- B. Only staff with accountability for ISMS operation
- C. Top management
- D. Relevant personnel and relevant interested parties

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) clearly specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties..." This means the communication obligation is not limited to top management (A) or only ISMS staff (B), nor does it stop at employees only (C). Instead, ISO/IEC 27001/27002 mandate a broader scope: all relevant personnel and relevant interested parties must be informed. This ensures both internal stakeholders (employees, contractors, temporary staff) and external interested parties (suppliers, partners, regulators, customers, etc.) receive the right policy communications where applicable. Therefore, the correct and verified answer is D.

## NEW QUESTION # 31

.....

We are doing our utmost to provide services with high speed and efficiency to save your valuable time for the majority of candidates. The APMG-International ISO-IEC-27001-Foundation materials of Prep4King offer a lot of information for your exam guide, including the questions and answers. Prep4King is best website that providing APMG-International ISO-IEC-27001-Foundation Exam Training materials with high quality on the Internet. With the learning information and guidance of Prep4King, you can through APMG-International ISO-IEC-27001-Foundation exam the first time.
