Salesforce Health Cloud Accredited Professional Sample Questions (Q100-Q105):

NEW QUESTION # 100

While implementing contracting as part of Provider Network Management, a customer wants to manage different types of payments. Which object should a consultant configure to achieve this?

- A. Agreement Detail
- B. Care Fee Agreement
- C. Value-Based Agreement
- D. Payment Agreement

Answer: D

NEW QUESTION # 101

A provider's office wants to verify a patient's insurance plan information and coverage when they call into the call center to book an appointment.

Which capability should a consultant leverage to address this requirement?

- A. Intelligent Appointment Management
- B. Identity Verification
- C. Benefits Eligibility and Verification
- D. Utilization Management

Answer: C

Explanation:

Step 1: Requirement Analysis

The provider's office needs to verify a patient's insurance plan information and coverage when a patient calls to book an appointment.

This means checking whether the patient's insurance is active, what services are covered, and any applicable copays or eligibility details.

Step 2: Health Cloud Out-of-the-Box Capability

Benefits Eligibility and Verification is the dedicated Health Cloud capability that allows provider offices and payers to verify a patient's insurance coverage, eligibility, and benefit details in real time, either through integration with payers or using Health Cloud workflows.

Extract:

"Health Cloud offers Benefits Eligibility and Verification, enabling providers and payers to confirm a patient's plan information and

coverage eligibility, reducing the risk of denied claims and improving the patient experience." Administer Health Cloud - Benefits Eligibility and Verification Step 3: Review of Options A . Benefits Eligibility and Verification: Directly addresses insurance plan and coverage verification.

B . Intelligent Appointment Management: For scheduling, not insurance verification.

C . Utilization Management: For prior authorizations and care request reviews.

D . Identity Verification: For confirming patient identity, not insurance coverage.

NEW QUESTION # 102

A payer needs to manage requests for concurrent review of prior authorizations within Health Cloud and wants to use out-of-the-box record types and page layouts for prior However, the payer's Salesforce administrator does not see any preconfigured record types or page layouts for prior authorizations in the payer's Salesforce org.

What should a consultant recommend to the Salesforce administrator to expedite implementation?

- A. Install the Health Cloud Claims unmanaged package.
- B. Install the Health Cloud Care Request Extensions package.
- C. Build custom page layouts and record types to support the requirement.
- D. install an AppExchange prior authorization package.

Answer: B

Explanation:

* Preconfigured Prior Authorization Objects:

Exact Extract:

"The Health Cloud Care Request Extensions package provides out-of-the-box record types, page layouts, and flows for prior authorizations and other payer workflows." Reference:

* Other Options:

Claims unmanaged package is not for prior authorizations.

Building custom layouts is not necessary when a packaged solution exists.

AppExchange prior authorization packages are not officially supported for core Health Cloud prior auth workflows.
