Nowadays, so many internet professionals agree that SAP exam certificate is a stepping stone to the peak of our life. C_AIG_2412 exam is an exam concerned by lots of internet professionals. Close to 100% passing rate is the best gift that our customers give us. We also hope our C_AIG_2412 exam materials can help more and more ambitious people pass the C_AIG_2412 exam. Our professional team checks the update of exam materials every day, so please rest assured that the C_AIG_2412 Exam software you are using must contain the latest and most information. We are a team of the exam questions providers C_AIG_2412 exam in internet that ensured you can pass actual test 100%. We have experienced and professional experts to create the latest C_AIG_2412 exam questions and answers many times which are approach to the C_AIG_2412 exam.

SAP C_AIG_2412 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.
Topic 2	• Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.

Topic 3	• Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
Topic 4	• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

SAP C_AIG_2412 Pass Rate, C_AIG_2412 Dumps Questions

The superb C_AIG_2412 practice braindumps have been prepared extracting content from the most reliable and authentic exam study sources by our professional experts. As long as you have a look at them, you will find that there is no question of inaccuracy and outdated information in them. And our C_AIG_2412 Study Materials are the exact exam questions and answers you will need to pass the exam. What is more, you will find that we always update our C_AIG_2412 exam questions to the latest.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q57-Q62):

NEW QUESTION # 57
What does the Prompt Management feature of the SAP AI launchpad allow users to do?

- A. Provide personalized user interactions
- B. Interact with models through a conversational interface
- C. Access and manage saved prompts and their versions
- D. Create and edit prompts

Answer: C,D

Explanation:
The Prompt Management feature within SAP AI Launchpad's Generative AI Hub offers users comprehensive tools for handling prompts throughout their lifecycle:
1. Create and Edit Prompts:
* Prompt Editor:Users can utilize the Prompt Editor to craft and modify prompts, facilitating effective prompt engineering and experimentation.
2. Access and Manage Saved Prompts and Their Versions:
* Prompt Lifecycle Management:The platform provides capabilities to manage the lifecycle of prompts, including accessing saved prompts, tracking their versions, and organizing them for efficient reuse and iteration.
Conclusion:
SAP AI Launchpad's Prompt Management feature empowers users to create, edit, and manage prompts effectively, supporting robust prompt engineering and lifecycle management within the Generative AI Hub.

NEW QUESTION # 58
What contract type does SAP offer for AI ecosystem partner solutions?

- A. Annual subscription-only contracts
- B. Bring Your Own License (BYOL) for embedded partner solutions
- C. All-in-one contracts, with services that are contracted through SAP
- D. Pay-as-you-go for each partner service

Answer: C

Explanation:
SAP collaborates with a wide ecosystem of partners, including leading general-purpose AI vendors, to provide tailored solutions to its customers. Through the SAP Store, customers have access to numerous partner applications and a variety of tools, allowing them to choose solutions that best fit their requirements.
Contractual Approach:
* All-in-One Contracts:SAP offers all-in-one contracts for AI ecosystem partner solutions, where services are white-labeled and contracted directly through SAP. This approach simplifies the procurement process for customers, as they engage with SAP as the single point of contact for both SAP and partner services.
* Exclusion of Bring Your Own License (BYOL) Model:SAP does not adopt a "bring your own license" model for these embedded partner solutions. Instead, all services are integrated and provided under unified contracts managed by SAP.
Benefits of This Contractual Model:
* Simplified Procurement:Customers benefit from a streamlined purchasing process, dealing with a single contract and point of contact for multiple services.
* Integrated Solutions:The all-in-one contract ensures that partner solutions are seamlessly integrated with SAP's offerings, providing a cohesive experience.
* Assured Compliance and Support:By contracting through SAP, customers can be confident in the compliance, security, and support standards upheld across all services.

NEW QUESTION # 59
Which of the following are grounding principles included in SAP's AI Ethics framework?
Note: There are 3 correct answers to this question.

- A. Human agency and oversight
- B. Store all user data for legal proceedings
- C. Transparency and explainability
- D. Avoid bias and discrimination
- E. Maximize business profits

Answer: A,C,D

NEW QUESTION # 60
Which of the following are grounding principles included in SAP's AI Ethics framework? Note: There are 3 correct answers to this question.

- A. Human agency and oversight
- B. Store all user data for legal proceedings
- C. Transparency and explainability
- D. Avoid bias and discrimination
- E. Maximize business profits

Answer: A,C,D

Explanation:
SAP's AI Ethics framework is built upon several grounding principles to ensure responsible AI development and deployment:
1. Transparency and Explainability:
* Definition:Ensuring that AI systems are understandable and their decision-making processes can be clearly explained to stakeholders.
* Implementation:SAP commits to making AI systems transparent, providing clear information about how decisions are made to build trust and facilitate accountability.
2. Human Agency and Oversight:
* Definition:Maintaining human control over AI systems, ensuring that humans can intervene or oversee AI operations as necessary.
* Implementation:SAP emphasizes the importance of human oversight in AI applications, ensuring that AI augments human decision-making rather than replacing it.
3. Avoid Bias and Discrimination:
* Definition:Preventing AI systems from perpetuating or amplifying biases, ensuring fair and equitable treatment for all users.
* Implementation:SAP strives to develop AI systems that are free from bias, implementing measures to detect and mitigate discriminatory outcomes.

NEW QUESTION # 61

What are some advantages of using agents in training models? Note: There are 2 correct answers to this question.

- A. To improve the quality of results
- B. To streamline LLM workflows
- C. To eliminate the need for human oversight
- D. To guarantee accurate decision making in complex scenarios

Answer: A,B
