CLO-002 Valid Exam Answers | Reliable CLO-002 Dumps Questions

BONUS!!! Download part of Actual4Dumps CLO-002 dumps for free: https://drive.google.com/open?id=1RLNSzYr8nfif-TH0xQhadvMTye4WkFz2

Our company attaches great importance on improving the CLO-002 study prep. In addition, we clearly know that constant improvement is of great significance to the survival of a company. The fierce competition in the market among the same industry has long existed. As for our CLO-002 exam braindump, our company masters the core technology, owns the independent intellectual property rights and strong market competitiveness. What is more, we have never satisfied our current accomplishments. The highest record is up to five seconds. There has no delay time of the grading process. Slow system response doesn't exist. In addition, the calculation system of the CLO-002 Test Question is very powerful and stable. We promise that the results of your exercises are accurate.

CompTIA CLO-002 Exam measures the knowledge of candidates in six domains related to cloud computing, which includes the characteristics of cloud services from a business perspective, the technical perspective of cloud computing, cloud computing governance, risk management and compliance, the implementation and migration of cloud services, and the management of cloud services. CompTIA Cloud Essentials+ Certification Exam certification exam is designed for professionals who have a basic understanding of IT concepts and principles and want to develop their knowledge of cloud computing. The CLO-002 certification is also recommended for individuals who are considering a career in cloud computing or who want to transition from traditional IT roles to cloud-related roles.

CompTIA Cloud Essentials+ certification is recognized globally and is highly valued by employers. CompTIA Cloud Essentials+ Certification Exam certification demonstrates that the candidate has a solid understanding of cloud computing concepts, principles, and best practices, and is capable of making informed decisions about cloud solutions. CompTIA Cloud Essentials+ Certification Exam certification also helps candidates to enhance their career prospects in the cloud computing domain, as it is a prerequisite for many other cloud computing certifications.

CompTIA Cloud Essentials+ Certification Exam latest Pass4sures torrent & CLO-002 pdf vce collection

Select our excellent CLO-002 training questions, you will not regret it. According to the above introduction, you must have your own judgment. Quickly purchase our CLO-002 study materials we will certainly help you improve your competitiveness with the help of our CLO-002 simulating exam! Just image that you will have a lot of the opportunities to be employed by bigger and better company, and you will get a better position and a higher income. What are you waiting for? Just buy our exam braindumps!

CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q372-Q377):

NEW QUESTION # 372
Due to local natural disaster concerns, a cloud customer is transferring all of its cold storage data to servers in a safer geographic region. Which of the following risk response techniques is the cloud customer employing?

- **A. Avoidance**
- B. Acceptance
- C. Mitigation
- D. Transference

Answer: A

Explanation:
Avoidance is a risk response technique that involves changing the project plan to eliminate the risk or protect the project objectives from its impact. Avoidance can be done by modifying the scope, schedule, cost, or quality of the project. Avoidance is usually the most effective way to deal with a risk, but it may not always be possible or desirable. In this case, the cloud customer is transferring all of its cold storage data to servers in a safer geographic region, which means they are changing the location of their data storage to avoid the risk of a natural disaster affecting their data. This way, they are eliminating the possibility of losing their data due to a natural disaster in their original region. This is an example of avoidance as a risk response technique.

NEW QUESTION # 373
A cloud administrator wants to ensure nodes are added automatically when the load on a web cluster increases. Which of the following should be implemented?

- A. Infrastructure as code
- **B. Autoscaling**
- C. Autonomous systems
- D. Right-sizing

Answer: B

Explanation:
Autoscaling is a cloud computing feature that enables organizations to scale cloud services such as server capacities or virtual machines up or down automatically, based on defined situations such as traffic or utilization levels1. Autoscaling helps to ensure that nodes are added automatically when the load on a web cluster increases, and removed when the load decreases, to optimize performance and costs. Autoscaling can be configured using built-in mechanisms or custom implementations, depending on the cloud service and the specific requirements2.
Autonomous systems are networks that are administered by a single entity and have a common routing policy. Autonomous systems are not related to autoscaling, but rather to network connectivity and routing protocols.
Infrastructure as code is a practice of managing and provisioning cloud resources using code or scripts, rather than manual processes or graphical interfaces. Infrastructure as code can help to automate and standardize cloud deployments, but it does not necessarily imply autoscaling, unless the code or scripts include logic for scaling resources based on demand.
Right-sizing is a technique of optimizing cloud resources to match the actual needs and usage patterns of an application or service. Right-sizing can help to reduce costs and improve efficiency, but it does not involve adding or removing nodes automatically based on load. Right-sizing is usually done periodically or on-demand, rather than continuously3.

NEW QUESTION # 374
Eucalyptus is open-source software for quickly provisioning virtual servers. This is an example of:

- **A. None of the above.**
- B. SaaS.

- C. PaaS
- D. On-demand software.
- E. IaaS

Answer: A

NEW QUESTION # 375

Cloud computing _____ capital cost to variable cost.

- A. shifts
- B. equates
- C. reduces
- D. increases

Answer: A

NEW QUESTION # 376

A company wants to process a batch job in a faster, cost-effective manner. Which of the following is the BEST solution?

- A. Utilize spot instances.
- B. Increase CPU usage.
- C. Add storage.
- D. Implement right-sizing.

Answer: A

NEW QUESTION # 377

......

It is of no exaggeration to say that sometimes CLO-002 certification is exactly a stepping-stone to success, especially when you are hunting for a job. The CLO-002 study materials are of great help in this sense. With the CLO-002 test training, you can both have the confidence and gumption to ask for better treatment. To earn such a material, you can spend some time to study our CLO-002 study torrent. No study can be done successfully without a specific goal and a powerful drive, and here to earn a better living by getting promotion is a good one.
