## GH-900 Exam Simulator Fee | GH-900 Guaranteed Success

All GH-900 practice questions you should know are written in them with three versions to choose from: the PDF, the Software and the APP online. At the same time, the experts who compiled the GH-900 learning engine are assiduously over so many years in this field. I can say that our experts have become the authority in this career. And they are good at simplifying the content of the GH-900 Exam Brindumps to be understood by our customers all over the world.

## Microsoft GitHub Foundations Sample Questions (Q120-Q125):

### NEW QUESTION # 120

Which GitHub tools or features is best to quickly modify a batch of files in a repository?

- A. Install and use the git CLI.
- B. Create and use a new GitHub Codespace.
- C. Install and use GitHub Desktop.
- D. Use github.dev from a web browser.
- E. Install and use GitHub Mobile.

**Answer: C**

Explanation:

GitHub Desktop: This is a graphical desktop application that provides an easy-to-use interface for managing your repositories. It allows you to perform bulk actions like staging multiple files or commits, which is useful for batch modifications.

Incorrect:

[Not B] Scripting is more time consuming.

GitHub CLI (Command Line Interface): The command line interface allows you to use powerful scripting to automate modifications across multiple files. For example, using commands like `git add` and `git commit` can help you stage and commit all changes at once.

### NEW QUESTION # 121

What features are offered by Copilot for Business that are not offered by Copilot for individuals?

(Each answer presents a complete solution. Choose three.)

- A. VPN proxy support via self-signed certificates
- B. Support for organization or enterprise GitHub accounts
- C. Organization-wide policy management
- D. Plugs directly into the editor
- E. Offers multi-line function suggestions
- F. Blocks suggestions matching public code

**Answer: B,C,F**

Explanation:

GitHub Copilot for Business offers several features that are tailored to the needs of organizations, providing more control, security, and support compared to the individual version.

Organization-wide Policy Management:

Option B is correct because Copilot for Business allows organizations to manage policies across their entire user base, providing control over how Copilot is used within the organization.

Blocking Suggestions Matching Public Code:

Option C is correct because Copilot for Business includes enhanced security features, such as blocking code suggestions that match public code to prevent inadvertent use of unlicensed code.

Support for Organization or Enterprise GitHub Accounts:

Option E is correct because Copilot for Business supports integration with GitHub Enterprise accounts, offering additional administrative controls and integration capabilities.

Incorrect Options:

Option A (multi-line function suggestions) is a feature available in both individual and business versions, so it does not differentiate the business offering.

Option D (VPN proxy support via self-signed certificates) is not a primary differentiator of Copilot for Business.

Option F (plugs directly into the editor) is true for both individual and business versions, so it is not unique to Copilot for Business.

### NEW QUESTION # 122

You've made changes in a branch called `feature-update` and now want to merge it into the `main` branch of the same repository. What is the correct base and compare setup when opening a pull request?

- A. Base: `feature-update`, Compare: `main`
- B. Base: `main`, Compare: `main`
- C. Base: `main`, Compare: `feature-updateright`
- D. Base: `develop`, Compare: `main`

**Answer: C**

Explanation:

The base branch is where the changes will be merged into (usually `main`), and the compare branch is where the changes are coming from (`feature-update`).

Option A is CORRECT because when creating a pull request, the base branch is the one you want to merge your changes into (in this case, `main`), and the compare branch is the one that contains the new changes (in this case, `feature-update`).

### NEW QUESTION # 123

What are achievements on a GitHub user profile?

- A. total number of repositories owned
- B. virtual trophies awarded for completing coding challenges
- C. special recognition for significant contributions and milestones
- D. number of stars received on repositories

**Answer: C**

### NEW QUESTION # 124

As a user, which of the following default labels is used to indicate that a maintainer needs assistance on an issue or pull request?

- A. Question
- B. Help wanted
- C. Enhancement
- D. Documentation

**Answer: B**

Explanation:

In GitHub, labels are used to categorize issues and pull requests, and certain default labels are provided to help manage tasks:

Help Wanted Label:

Option C is correct. The "Help wanted" label is used to indicate that the maintainer of the repository needs assistance on a particular issue or pull request. This label helps in attracting contributors who might be interested in helping with specific tasks.
