Real C_S4CPB_2508 Exams, Latest C_S4CPB_2508 Test Prep

Our C_S4CPB_2508 study materials are designed carefully. We have taken all your worries into consideration. Also, we adopt the useful suggestions about our C_S4CPB_2508 study materials from our customers. Now, our study materials are out of supply. Thousands of people will crowd into our website to choose the C_S4CPB_2508 study materials. So people are different from the past. Learning has become popular among different age groups. Our C_S4CPB_2508 Study Materials truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our SAP study materials a chance? Our products will live up to your expectations.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q29-Q34):

NEW QUESTION # 29

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, where do you look next?

- A. SAP Cloud ALM
- B. SAP Discovery Center
- C. SAP Business Technology Platform
- D. SAP Business Accelerator Hub**

Answer: D

NEW QUESTION # 30

What tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Fiori extensibility apps**
- B. SAP Build**
- C. SAP Business Application Studio
- D. SAP Cloud SDK

Answer: A,B

Explanation:

Tools that enable non-developers to create low/no-code extensions are designed to be user-friendly, requiring minimal to no programming knowledge, allowing business users to tailor applications to their specific needs. Among these tools, SAP Fiori extensibility apps and SAP Build stand out:

* SAP Fiori extensibility apps: These apps allow users to adapt the user interface and behavior of standard SAP Fiori apps without writing code. Users can personalize forms, fields, and workflows directly within the SAP Fiori environment, making it possible to adjust applications to meet specific business requirements.

* SAP Build: SAP Build is a suite of tools designed to enable users to create and enhance applications, automate processes, and design business sites with low-code or no-code approaches. It provides a user-friendly interface where users can drag and drop components, set up workflows, and integrate data without needing deep technical expertise.

NEW QUESTION # 31

How can you migrate data to SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. With Core Data Services
- B. With the zero downtime service
- C. With XML or CSV templates
- D. With a separate SAP HANA database

Answer: C,D

Explanation:

You can migrate data to SAP S/4HANA Cloud Public Edition using the SAP S/4HANA Migration Cockpit, a tool that provides multiple methods of migrating data from legacy systems, SAP or non-SAP, to the target system¹. The SAP S/4HANA Migration Cockpit supports the following migration methods²:

* With XML or CSV templates: You can use predefined templates in XML or CSV format to fill in your source data and upload them to the staging tables in the SAP S/4HANA Cloud system. The templates are based on the predefined migration objects that cover the most common business data, such as master data, transaction data, and configuration data. You can download the templates from the SAP S/4HANA Migration Cockpit or from the SAP Best Practices Explorer.

* With a separate SAP HANA database: You can use a separate SAP HANA database as a staging area to store your source data and transfer it to the SAP S/4HANA Cloud system. You can use any tool or method to extract your source data from your legacy system and load it to the SAP HANA database.

You can also use the predefined migration objects or create your own custom objects using the migration object modeler.

* Directly from an SAP ERP system: You can connect your SAP ERP system to the SAP S/4HANA Cloud system and transfer your source data directly without using a staging area. You can use the predefined migration objects or create your own custom objects using the migration object modeler.

This method requires the installation of the SAP S/4HANA Migration Cockpit add-on in your SAP ERP system.

The other two options, with the zero downtime service and with Core Data Services, are not valid methods of migrating data to SAP S/4HANA Cloud Public Edition. The zero downtime service is a tool that enables you to upgrade your SAP S/4HANA system with minimal downtime, but it is not used for data migration³. Core Data Services (CDS) are a set of domain-specific languages and services for defining and consuming semantically rich data models, but they are not used for data migration⁴. NEW QUESTION # 32

Which layer of SAP S/4HANA provides a universal language to read and process data across different applications?

- A. SAP HANA
- B. SAP Business Suite
- C. SAP Fiori
- D. Core Data Services

Answer: D

NEW QUESTION # 33

Which of the following is SAP's recommended Human Capital Management system (HCM)?

- A. SAP Fieldglass
- B. SAP SuccessFactors
- C. SAP Concur
- D. SAP Ariba

Answer: B

Explanation:

SAP SuccessFactors is SAP's recommended Human Capital Management system (HCM) because it provides innovative and cloud-based solutions to address the critical workforce transformation needs of organizations.

SAP SuccessFactors supports the next evolution of HCM, which is human experience management (HXM), by putting people at the center of everything and creating AI-powered experiences that drive real competitive advantage. SAP SuccessFactors also integrates with SAP S/4HANA Cloud and other SAP solutions to enable a seamless and connected business process across the enterprise.
