Microsoft GH-100 Exam Questions - Updated Frequently
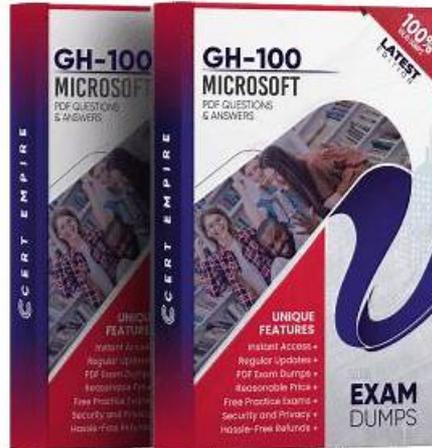

To maintain relevancy and top standard of Microsoft GH-100 exam questions, the BraindumpsVCE has hired a team of experienced and qualified Microsoft GH-100 exam trainers. They work together and check every GH-100 exam practice test question thoroughly and ensure the top standard of GH-100 Exam Questions all the time. So you do not need to worry about the relevancy and top standard of Microsoft GH-100 exam practice test questions.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage GitHub Packages:This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI • CD pipelines.
Topic 2	• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 3	• Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.

Topic 4	• Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI • CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.

Certification GH-100 Test Answers, GH-100 Verified Answers

if you want to have a better experience on the real exam before you go to attend it, you can choose to use the software version of our GH-100 learning guide which can simulate the real exam, and you can download our GH-100 exam prep on more than one computer. We strongly believe that the software version of our GH-100 Study Materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success.

Microsoft GitHub Administration Sample Questions (Q61-Q66):

NEW QUESTION # 61
Your organization is implementing team synchronization. Which of the following should you prioritize during the setup process?

- A. Allowing manual updates to team memberships
- B. Setting an infrequent sync schedule to reduce performance impact
- C. Disabling the audit log stream
- D. Clearly define how identity provider groups will align with GitHub teams and roles

Answer: D

Explanation:
Before you enable team synchronization, you should clearly define how groups in your identity provider will map to GitHub teams and roles - ensuring that when the sync runs, users land in the correct teams with the right permissions.

NEW QUESTION # 62
You want to ensure a secret is automatically available to only workflows in internal and private repositories in the organization. Where do you configure the required access policy?

- A. Rulesets
- B. Runner groups
- C. Organization secret
- D. Actions policies

Answer: C

Explanation:
You set the access policy on the Organization Secret itself - configuring its visibility so it's scoped automatically to only internal and private repositories.

NEW QUESTION # 63
What is the potential consequence of enabling multiple rulesets that apply to the same branch in a repository?

- A. Rulesets will override each other, leading to unpredictable behavior
- B. All applicable rulesets will be evaluated, and their combined rules enforced
- C. Only organization-level rulesets are enforced over repository-level ones
- D. Only the most recently created ruleset will be enforced

Answer: B

Explanation:
If you enable multiple rulesets that target the same branch, GitHub will evaluate every matching ruleset and enforce the aggregate of their rules - so all constraints from all applicable rulesets apply.

NEW QUESTION # 64
Why would someone choose to configure a security policy?

- A. To provide information on an open source repository for open source collaborators and researchers that may need to report and disclose sensitive security findings to maintainers securely.
- B. To communicate corporate security and compliance policies for end users on a private repository.
- C. To define which open source packages are permitted for use as part of that repository.
- D. To prevent anyone from pushing to the repository without approval.

Answer: A

Explanation:
A security policy (the SECURITY.md file) lets maintainers of an open source repository provide clear, private instructions for collaborators and external researchers on how to report and disclose security vulnerabilities responsibly.

NEW QUESTION # 65
In a GitHub repository using Dependabot, which of the following best describes the purpose of the .github/dependabot.yml file?

- A. It configures scheduling, package ecosystems, and target directories for update checks.
- B. It lists commit SHAs to exclude from automatic pull requests.
- C. It encrypts dependency versions before storing them in the repo.
- D. It enables GitHub to scan for secrets in dependency files.

Answer: A

Explanation:
The .github/dependabot.yml file defines Dependabot's package-ecosystem, the directories to inspect, and the update schedule (daily/weekly/monthly), controlling when and where Dependabot checks for new versions.

NEW QUESTION # 66
......

We can provide absolutely high quality guarantee for our GH-100 practice materials, for all of our GH-100 learning materials are finalized after being approved by industry experts. Without doubt, you will get what you expect to achieve, no matter your satisfied scores or according GH-100certification file. As long as you choose our GH-100 exam questions, you will get the most awarded.
