Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q36-Q41):

NEW QUESTION # 36
An administrator is trying to configure Mutual CHAP on a Linux guest. During configuration, the administrator keeps getting an Authentication Failure error.
What should the administrator do to resolve the issue?

- A. Configure the password on the client, leave the target password blank.
- B. Configure the client and target with the same password.
- C. Configure the password on the target, leave the client password blank.
- D. Configure the client and target with different passwords.

Answer: B

NEW QUESTION # 37
An administrator needs to audit and analyze the operations and contents of a file server.
Which File software tool should the administrator use to fulfill this task?

- A. Health Dashboard
- B. Files Analytics Dashboard
- C. Audit Dashboard
- D. Analysis Dashboard

Answer: B

Explanation:
Files Analytics Dashboard is one of these tools that enables administrators to audit and analyze the operations and contents of a file server. The Files Analytics Dashboard provides insights into user activity, file access patterns, data growth trends, data distribution across tiers and clouds, data protection status and more.

NEW QUESTION # 38
An administrator is scheduling to upgrade Files from version 3.8.1.3 to 4.1.0.2 for all the dark sites.
After transferring the dark site bundle to the internal web server, the administrator performs an LCM inventory but cannot check off the Files upgrade to be performed.
Which component needs to be upgraded along side of the core Files components?

- A. File Analytics
- B. File Server Module
- C. Files Sender
- D. Files Manager

Answer: B

Explanation:
When upgrading Files from version 3.8.1.3 to 4.1.0.2 for all dark sites, the File Server Module component needs to be upgraded alongside the core Files components. This is because the File Server Module is a core component of Files and is responsible for file-level data services, including access control, auditing, and file sharing.

If the File Server Module is not upgraded alongside the core Files components, it can result in compatibility issues and potentially cause the upgrade to fail.
Therefore, it is recommended to upgrade the File Server Module together with the core Files components when upgrading Files.

NEW QUESTION # 39
