EDI101 Bridges Interfaces Exam 2023/2024 With complete solution

Verified

No, the encoding characters can be any printable character. - CORRECT ANSWERS Does every HL7 message have to be encoded with the characters |^~\& ?

The result is positive \T\ has a value of 2.7 x 10^3. - CORRECT ANSWERS Imagine that your message begins with MSH|^~\&|. How would you encode the string "The result is positive & has a value of 2.7 x 10^3."?

Context; its meaning depends on the segment it follows. - CORRECT ANSWERS Why is the NTE segment special?

An empty field is ignored by the interface, whereas the delete character will delete information from the database, assuming the field in question supports the delete character. - CORRECT ANSWERS What is the difference between receiving an empty field || and the delete sequence [~]?

X12, FHIR, NCPDP, DICOM, and Direct. - CORRECT ANSWERS Aside from HL7 Version 2, name two other standards supported in Bridges?

Epic's interfacing application. It consists of both the interface infrastructure to build, send, receive, and file messages along with the tools and utilities to maintain those interfaces. - CORRECT ANSWERS What is Bridges?

The Event Queue contains the information needed to build a message. Usually this is a patient ID, an encounter DAT, and the type of message to be built, amongst other information.

The Data Queue contains the text of HL7 messages and additional metadata.

The Control Queue is a to-do list of message numbers to send or file. - CORRECT ANSWERS What are stored in the Event Queue, Data Queue, and Control Queue?

No, never. They are purged only by an automated purge job. - CORRECT ANSWERS Are messages ever manually deleted from the Data Queue?

TCP/IP with an interface engine is the most common communication method.

Interconnect is used for HTTPS or other communication outside your local network.

New EDI101 Exam Online & New EDI101 Dumps Book

Both practice exams (web-based & desktop) give a EPIC EDI101 real exam feeling and identify your mistakes so you can overcome your weaknesses before the EDI101 final test. The desktop EPIC EDI101 Practice Test software works on Windows after software installation. You can take the web-based CEE: Bridges Interfaces Application Essentials Exam (2026 Version) EDI101 practice exam via any operating system.

EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q27-Q32):

NEW QUESTION # 27

A new error started logging to your interface and your team decides that this error should be worked on an existing workqueue. You properly update the workqueue rule to include the new error. Which of the following will your workqueue contain moving forward if you take no other actions? (SELECT ALL THAT APPLY)

- A. All errors previously added to the workqueue
- B. Future occurrences of the new error, and none of the previous occurrences
- C. No occurrences of the new error
- D. All occurrences of the new error, past and future

Answer: A,B

NEW QUESTION # 28

All Triggers in Interface System Defaults can only be configured to trigger messages to a single interface.

- A. True
- B. False

Answer: B

Explanation:

Epic 's trigger logic is highly flexible. A single event in Chronicles (such as a patient admission) can be configured within the System Defaults or specialized trigger tables to send data to multiple interfaces simultaneously. This is common when an admission needs to notify a Lab system, a Pharmacy system, and a Dietary system all at once.

NEW QUESTION # 29

Which of the following can be parts of an XML message? (SELECT ALL THAT APPLY)

- A. Namespace
- B. Element
- C. Processing ID
- D. Subcomponent Separator
- E. Attribute

Answer: A,B,E

Explanation:

XML messages are structured differently than HL7. Core components of XML include Elements (the tags that contain data), Attributes (properties provided within an element tag), and Namespaces (used to provide uniquely named elements and attributes in an XML document). "Subcomponent Separator" and "Processing ID" are specific to HL7 and are not native structural components of XML.

NEW QUESTION # 30

If you don't want to use Identity, a Translation Table can be used instead to map patient IDs.

- A. True
- B. False

Answer: B

Explanation:

In Epic, Identity is the required framework for mapping record-level identifiers, especially for patients.

Translation Tables are intended for mapping "Category Lists" (like Gender, Race, or Marital Status) where there are a limited number of static values. Because patient IDs are unique to every record and number in the millions, they cannot be managed via a simple translation table.

NEW QUESTION # 31

Which translation table setting allows you to use the values from the category list instead of manually specifying each internal and external value?

- A. Case Sensitive
- B. Many-to-One mapping
- C. Default value
- D. Auto-lookup

Answer: D

NEW QUESTION # 32

.....

With the help of EDI101 study materials, you can conduct targeted review on the topics which to be tested before the exam, and then you no longer have to worry about the problems that you may encounter a question that you are not familiar with during the exam. With EDI101 study materials, you will not need to purchase any other review materials. We have hired professional IT staff to maintain EDI101 Study Materials and our team of experts also constantly updates and renew the question bank according to changes in the syllabus.
