HCL-DOM-AADM-12 Real Question | HCL-DOM-AADM-12 Valid Vce

Nowadays, online shopping has been greatly developed, but because of the fear of some uncontrollable problems after payment, there are still many people don't trust to buy things online, especially electronic products. But you don't have to worry about this when buying our HCL-DOM-AADM-12 Actual Exam. Not only will we fully consider for customers before and during the purchase on our HCL-DOM-AADM-12 practice guide, but we will also provide you with warm and thoughtful service on the HCL-DOM-AADM-12 training guide.

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q30-Q35):

NEW QUESTION # 30

Which two elements are required for a Notes client to successfully authenticate to a Domino server? (Choose two)

- A. ID file containing the private key
- B. Trusted root certificate from the server
- C. notes.ini file with replication schedule
- D. Matching user name in the Domino Directory

Answer: A,D

Explanation:

Notes authentication is a "challenge-response" process that requires two primary components. First, the user must have an ID file containing their private key to sign the authentication request. Second, the server must have a matching user name in the Domino Directory (names.nsf) that contains the user's corresponding public key to verify the signature. Without both pieces, the secure handshake between the client and server cannot be completed.

NEW QUESTION # 31

Which of the following is required to enable DAOS on a Domino server?

- A. Modification of the server document and compact with DAOS enabled
- B. A dedicated DAOS license file
- C. Creation of the daoscat.nsf manually
- D. Server-based archiving configuration

Answer: A

Explanation:

To enable the Domino Attachment and Object Service (DAOS), an administrator must first enable it in the Server document (under the DAOS tab) by specifying a base path and the minimum attachment size. Once the server-level setting is active, the administrator must then enable DAOS on individual databases and run the `compact -c -daos` on command. This process converts the internal database structure to move attachments into the DAOS repository.

NEW QUESTION # 32

During server configuration, the administrator must specify the _____ which uniquely identifies the Domino server within the domain.

- A. Server URL
- B. DNS Hostname
- C. Server ID
- D. IP Address

Answer: C

Explanation:

While a server has many identifiers (like an IP or Hostname), the Server ID is the unique security file that defines the server's identity within the Domino domain. This file contains the server's private key and is created during the registration process. The Server ID allows the server to authenticate with other servers and clients, ensuring it is a trusted member of the hierarchical organization.

NEW QUESTION # 33

What is the main purpose of the Messaging tab in the Domino Administrator Client?

- A. Configure DAOS
- B. Manage server partitions
- C. Monitor mail routing and SMTP diagnostics
- D. Create and manage server groups

Answer: C

Explanation:

The Messaging tab is the primary tool for mail administrators. It is used to monitor mail routing status, view the contents of the mail box, and perform SMTP diagnostics. It provides a real-time view of mail flow, showing whether the Router task is active and if there are any delivery failures or bottlenecks in the messaging system.

NEW QUESTION # 34

When a user is renamed, which AdminP request must complete to update ACLs across databases?

- **A. Rename in ACL**
- B. Synchronize Replicas
- C. Rename Person in Domino Directory
- D. Update User Certificate

Answer: A

Explanation:

The Administration Process (AdminP) handles user renames in several stages. After the user accepts the name change in their Notes client, AdminP triggers a series of requests. The specific request responsible for searching through every database on the server and changing the user's old name to the new name in the Access Control List is the Rename in ACL request. This ensures the user retains their permissions under their new identity.

NEW QUESTION # 35

.....

Our HCL-DOM-AADM-12 study guide has become a brand for our candidates to get help for their exams. Because our HCL-DOM-AADM-12 learning materials contain not only the newest questions appeared in real exams in these years, but the most classic knowledge to master. Besides, it is unavoidable that you may be baffled by some question points during the review process of the HCL-DOM-AADM-12 Exam Questions, so there is a clear analysis under some necessary questions.
