### CertiProf I27001F Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                        |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>ISO 27001:2022 Annex A: This domain outlines the set of security controls listed in Annex A of the standard. It explains how these controls are selected and applied to mitigate identified risks within an ISMS.</li></ul>                                                                                              |
| Topic 2 | <ul style="list-style-type: none"><li>Principles, concepts and the requirements of ISO</li><li>IEC 27001:2022: This domain covers the core principles, key concepts, and mandatory requirements of the ISO</li><li>IEC 27001:2022 standard. It explains how information security is structured, managed, and aligned with organizational objectives.</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>How to Develop an ISMS: This section focuses on the process of establishing and implementing an Information Security Management System (ISMS). It includes planning, risk assessment, and applying appropriate controls to protect information assets.</li></ul>                                                         |

## CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q27-Q32):

### NEW QUESTION # 27

Which statement describes a critical success factor for an Information Security Management System ISMS?

- A. Performing a second-party audit
- B. Appointing at least two internal auditors for the information security system
- C. Hiring an information security coordinator
- D. Implementing a measurement system used to evaluate information security management performance and provide suggestions for improvement

**Answer: D**

Explanation:

An effective ISMS depends on monitoring, measurement, analysis, and evaluation. ISO/IEC 27001:2022 requires the organization to determine what needs to be monitored and measured, how this will be done, and when the results will be analyzed and evaluated. A measurement system supports informed decision-making, demonstrates performance, and enables continual improvement. The other options may be useful in some organizations, but they are not critical success factors defined by the standard. Therefore, option B is the best answer.

### NEW QUESTION # 28

Which of the following activities are responsibilities of top management?

- A. All of the above
- B. Ensuring compliance with the information security policy
- C. Supporting the drive for continual improvement
- D. Assigning the resources necessary to maintain the system

**Answer: A**

Explanation:

ISO/IEC 27001:2022 requires top management to demonstrate leadership and commitment with respect to the ISMS. This includes ensuring that the information security policy and objectives are established, ensuring that the resources needed for the ISMS are available, and promoting continual improvement. Top management is also responsible for supporting relevant roles and ensuring that the ISMS achieves its intended outcomes.

Since all of the listed activities align with top management responsibilities, option D is correct.

---

#### NEW QUESTION # 29

What does ISO/IEC 27001:2022 require in order for top management to demonstrate leadership and commitment with respect to the Information Security Management System?

- A. Hiring a consultancy to determine the best way to do it
- B. Nothing is required
- C. Appointing a volunteer to be responsible for the Information Security Management System
- D. Ensuring that the information security policy and information security objectives are established and are compatible with the strategic direction of the organization

**Answer: D**

Explanation:

ISO/IEC 27001:2022 requires top management to demonstrate leadership and commitment by ensuring that the information security policy and information security objectives are established and are compatible with the strategic direction of the organization. Top management must also integrate ISMS requirements into the organization's processes, ensure resources are available, support relevant roles, and promote continual improvement. The standard does not allow leadership accountability to be replaced by a consultant or a volunteer. Therefore, option A is correct.

---

#### NEW QUESTION # 30

Within the ISMS, establishing, approving, and supporting compliance with the information security policy is a responsibility of:

- A. The implementation leader
- B. The IT Security Manager
- C. Top management
- D. The quality management representative

**Answer: C**

Explanation:

ISO/IEC 27001:2022 assigns accountability for the information security policy to top management. Top management must ensure that the policy and objectives are established and are compatible with the strategic direction of the organization. Top management is also responsible for promoting and supporting compliance with the ISMS requirements throughout the organization. Therefore, option B is correct.

---

#### NEW QUESTION # 31

Management review must include consideration of:

- A. Changes in external and internal issues that are relevant to the ISMS
- B. All of the above
- C. The status of actions from previous management reviews

- D. Opportunities for continual improvement

**Answer: B**

Explanation:

ISO/IEC 27001:2022 specifies the inputs to management review. These include changes in external and internal issues relevant to the ISMS, feedback on performance including nonconformities and corrective actions, follow-up actions from previous reviews, and opportunities for continual improvement. Since all of the listed elements are valid management review inputs, the correct answer is D.

---
