## NEW QUESTION # 19

### SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the business role to your user and save. Then refresh the browser and navigate home to verify the new Launchpad Space and tiles are visible.

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the newly created custom all-employee business role to your own business user, save the assignment, refresh the browser, and then verify that the new Launchpad Space and its tiles are visible on the homepage.

This is the final verification step for the all-employee role and launchpad setup.

Business Scenario Explanation

In the previous tasks, you created and configured:

a new custom business role for all employees,

the required business catalogs,

a custom launchpad space,

a custom launchpad page,

and the employee self-service tiles:

Manage My Timesheet

Concur Travel Expense

However, even if all of that is configured correctly, you still will not see the new page and tiles on your homepage until the custom role is assigned to your own business user.

This task connects the configuration to your user and verifies the final end-user result.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact business role ID.

Save the user after adding the role.

Refresh the browser after saving.

Then navigate back to Home and confirm the space/page/tiles are visible.

Required Business Role

Assign the custom all-employee role created earlier:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

Business Role Description: All Employee Role #####

Example

If your suffix is 000013, the role is:

Z\_EMPLOYEES\_ALL\_000013

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to users.

The launchpad space and tiles will only become visible after the custom role is assigned to your own user.

Step 2: Search for your own business user

In Maintain Business Users:

Enter your own user name or business user ID in the search field.

Click Go.

Explanation:

You must assign the role to your own user because you are the one who will verify the launchpad result on the homepage.

Step 3: Open your user record

From the search results:

Click your user entry.

Open the user details page.

Explanation:

This opens the maintenance page where assigned business roles can be reviewed and changed.

Step 4: Switch to Edit mode

On the business user page:

Click Edit

Explanation:

Without edit mode, the role assignment list is display-only.

Step 5: Open the "Assigned Business Roles" tab

Inside the user record:

Click:

Assigned Business Roles

Explanation:

This tab contains the list of all business roles currently assigned to your user and is the correct place to add the all-employee role.

Step 6: Click Add

In the Assigned Business Roles section:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup allows you to search for and assign the custom all-employee role.

Step 7: Search for the custom all-employee role

In the Add Business Roles popup:

In the business role search field, enter:

Z\_EMPLOYEES\_ALL\_#####

Click Go

Select the role:

Z\_EMPLOYEES\_ALL\_#####

All Employee Role #####

Example

If your suffix is 000013, search for:

Z\_EMPLOYEES\_ALL\_000013

Explanation:

This is the custom role created in the earlier launchpad/employee-role tasks.

It contains the launchpad space, catalogs, and page content that must now become visible to your user.

Step 8: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the role to your user in draft mode.

Step 9: Save the business user

Back on the business user page:

Click Save

Explanation:

This is a mandatory step.

Without saving, the role assignment is not finalized, and the new launchpad content will not appear for your user.

Step 10: Confirm the role assignment

After saving, verify that your assigned roles list includes:

Z\_EMPLOYEES\_ALL\_#####

All Employee Role #####

Explanation:

This confirms that the role is now officially assigned to your user.

Step 11: Refresh the browser

After saving:

Refresh the browser completely

Explanation:

SAP launchpad content is often cached in the current session.

A browser refresh ensures the newly assigned role content is loaded.

Step 12: Navigate back to Home

After refreshing:

Return to Home

Explanation:

The role's launchpad space and page must be verified from the end-user homepage, not only from configuration apps.

Step 13: Open the page / launchpad tab

On the homepage, look for the custom page/tab that contains the employee content.

In your run, the visible page was:

General

Explanation:

The launchpad page created earlier was titled General, so that is the page you should open to verify the result.

Step 14: Verify the section title

On the page, confirm that you can see the section:

Self-Services

Explanation:

This was the section title created in the earlier page-content maintenance task.

Step 15: Verify the tiles

Under the Self-Services section, confirm that both tiles are visible:

Concur Travel Expense

Manage My Timesheet

Explanation:

These are the two required employee self-service tiles added to the page in the previous task.

Seeing both of them confirms that:

the catalogs were assigned correctly,

the launchpad page was maintained correctly,

the business role was assigned correctly,

and the browser refresh loaded the new content successfully.

Expected Result

After completing this task successfully:

your own user has the custom business role assigned,

the role is saved successfully,

after browser refresh the launchpad updates,

the homepage shows the new launchpad page,

the Self-Services section is visible,

and the tiles Concur Travel Expense and Manage My Timesheet are visible.

## NEW QUESTION # 20

### SIMULATION

Create a Business User and Assign a Business Role

Business Scenario

You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the HR Administrator (BR\_ADMINISTRATOR\_HRINFO) business role to your user.

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Task 3: Assign the HR Administrator Business Role to Your User

Objective

The purpose of this task is to assign the HR Administrator business role to your own business user so you can continue the worker, work agreement, and business user setup activities required for the professional services scenario.

The required business role is:

Business Role ID: BR\_ADMINISTRATOR\_HRINFO

Business Role Description: Administrator - HR Info

Task 3: Assign the HR Administrator Business Role to Your User

Objective

The purpose of this task is to assign the HR Administrator business role to your own business user so you can continue the worker, work agreement, and business user setup activities required for the professional services scenario.

The required business role is:

Business Role ID: BR\_ADMINISTRATOR\_HRINFO

Business Role Description: Administrator - HR Info

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search or launchpad search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to maintain user master data and assign business roles.

All business role assignments for your own user are done here.

Step 2: Search for your own user

In Maintain Business Users:

In the filter/search area, enter your own user name or user ID.

Click Go.

Explanation:

You need to open your own user because the HR Administrator role must be assigned to your own account before continuing the simulation.

Step 3: Open your user record

After the search results appear:

Click your own user in the result list.

Open the detail page.

Explanation:

This opens the business user detail screen where all assigned roles can be reviewed and maintained.

Step 4: Switch to Edit mode

On the user detail page:

Click Edit.

Explanation:

Edit mode is required before you can add or remove business roles.

Without edit mode, the Assigned Business Roles tab is display-only.

**General**

First Name: A000457  
Last Name: SAP\_Learning  
Worker ID: A00457  
Business Partner (Person ID): 9980001019  
E-Mail: learner+A000457@education.cloud.sap  
Phone: -

User Name: A000457  
User ID: CB9980001019  
Global User ID: -  
Global User ID History: -  
Valid From: 19.10.2020  
Valid To: 31.12.9999  
Locked:   
Business User Group: -  
Price Category: Advanced  
Decimal Format: 1,234,567.89  
Date Format: DD.MM.YYYY (Gregorian Date)  
Time Zone: Central Europe  
Time Format: 24 Hour Format (Example: 12:05...)  
Language: English United States

**Assigned Business Roles (2)**

<input type="checkbox"/>	Business Role	Business Role ID	Price Category
<input type="checkbox"/>	Administrator	BR_ADMINISTRATOR	Advanced
<input type="checkbox"/>	S4C Generic Role	Z_S4C_GENERIC_ROLE	Advanced

Step 5: Open the "Assigned Business Roles" tab

Inside your user record:

Click the tab:

Assigned Business Roles

Explanation:

This tab lists all current roles assigned to your user and is the correct place to add BR\_ADMINISTRATOR\_HRINFO.

**A000457 SAP\_Learning**

Check Dependencies Display Changes Edit Delete Summarize

**Assigned Business Roles (2)**

<input type="checkbox"/>	Business Role	Business Role ID	Price Category
<input type="checkbox"/>	Administrator	BR_ADMINISTRATOR	Advanced
<input type="checkbox"/>	S4C Generic Role	Z_S4C_GENERIC_ROLE	Advanced

**Application Jobs (0)**

There are no entries yet  
When there are, you'll see them here.

Step 6: Click "Add"

In the Assigned Business Roles section:

Click Add

This opens the dialog:

Add Business Roles

Explanation:

This popup allows you to search for standard SAP business roles by ID or description.

Step 7: Search for the HR Administrator role

In the Add Business Roles popup:

In Business Role ID, enter:

BR\_ADMINISTRATOR\_HRINFO

Click Go

Select the role:

Administrator - HR Info

Business Role ID: BR\_ADMINISTRATOR\_HRINFO

Explanation:

This is the exact role required by the task.

It gives you the workforce / HR information administration permissions needed for the later simulation steps.

Step 8: Add the role to the user

After selecting the role:

Click OK or Apply

The role should now appear in your assigned roles list.

Explanation:

At this stage, the role is added to the user in draft mode, but it is not yet permanently stored until you save.

The screenshot shows the SAP user management interface. The top navigation bar includes 'General', 'Assigned Business Roles (2)', and 'Application Jobs (0)'. The main content is divided into two sections: 'General' and 'Assigned Business Roles (2)'. The 'General' section contains fields for user information: First Name (A000457), Last Name (SAP\_Learning), Worker ID (A00457), Business Partner (Person ID) (9980001019), E-Mail (learner+A000457@education.cloud.sap), and Phone. It also includes fields for Building, Floor, and Room, all currently empty. The 'User Name' is A000457, 'User ID' is CB9980001019, and 'Global User ID' is empty. The 'Valid To' date is 31.12.9999, and the 'Valid From' date is 19.10.2020. The 'Price Category' is set to 'Advanced'. The 'Decimal Format' is 1,234,567.89, the 'Date Format' is DD.MM.YYYY (Gregorian Date), the 'Time Zone' is Central Europe, and the 'Language' is English United States. The 'Assigned Business Roles (2)' section shows a list of roles with checkboxes, Business Role ID, and Price Category. The roles listed are: Administrator (BR\_ADMINISTRATOR, Advanced), Administrator - HR Info (BR\_ADMINISTRATOR\_HRINFO, Advanced), and S4C Generic Role (Z\_S4C\_GENERIC\_ROLE, Advanced). The 'Administrator - HR Info' role is currently selected.

Step 9: Save the business user

Back on the business user detail page:

Click Save

Explanation:

Saving is mandatory.

If you do not save, the role assignment remains incomplete and later tasks may fail because your user will not actually have the HR Administrator authorization.

Step 10: Verify the role assignment

After saving, verify that the role appears in the assigned roles list:

BR\_ADMINISTRATOR\_HRINFO

Administrator - HR Info

Explanation:

This is your proof that the task is complete.

You should see the HR role together with your other assigned roles.

Expected Result

After completing this task successfully:

your user has the HR Administrator role assigned,

the role appears in Assigned Business Roles,

the user is saved successfully,

later worker/business-user creation steps can be performed.

Why this role matters

The role BR\_ADMINISTRATOR\_HRINFO is required because the scenario involves:

worker information,

work agreement information,

user creation for workshop demonstration,

HR-related administration steps.

In SAP S/4HANA Cloud, access is always role-based, so assigning this role is an authorization prerequisite for later tasks.

## NEW QUESTION # 21

### SIMULATION

#### Migrate Bank Data

#### Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Check the documentation for the Bank migration object and assign the additional business role required to ensure you can migrate

bank data into the system.

**Answer:**

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to check the Bank migration object documentation and assign the additional business role needed so you can successfully migrate bank data into SAP S/4HANA Cloud Public Edition.

The additional business role required is:

Business Role Template: SAP\_BR\_MD\_SPECIALIST\_BNK

Business Role Description: Master Data Specialist - Bank Data

SAP documents that the app Manage Banks - Master Data is assigned to the business role Master Data Specialist - Bank Data (SAP\_BR\_MD\_SPECIALIST\_BNK) in business catalog Bank - Maintenance (SAP\_CA\_BC\_BNK\_PC). That is the role needed for bank master data maintenance and is the missing authorization when the migration cockpit can load data but cannot create banks in the target system.

Business Scenario Explanation

In the previous migration steps, you already assigned the role:

Configuration Expert - Data Migration

BR\_CONFIG\_EXPERT\_DATA\_MIG

That role gives access to the migration cockpit itself, meaning you can:

create migration projects,

select migration objects,

upload CSV files,

validate data,

transfer data to staging tables,

and execute migration runs.

However, for the Bank migration object, SAP also requires the authorization to create bank master data in the target system. If that authorization is missing, the migration can still reach the execution stage, but then fail with an authorization message such as:

You are not authorized to create bank data for country/region US

That is why the additional role Master Data Specialist - Bank Data (SAP\_BR\_MD\_SPECIALIST\_BNK) must be assigned.

Important Notes

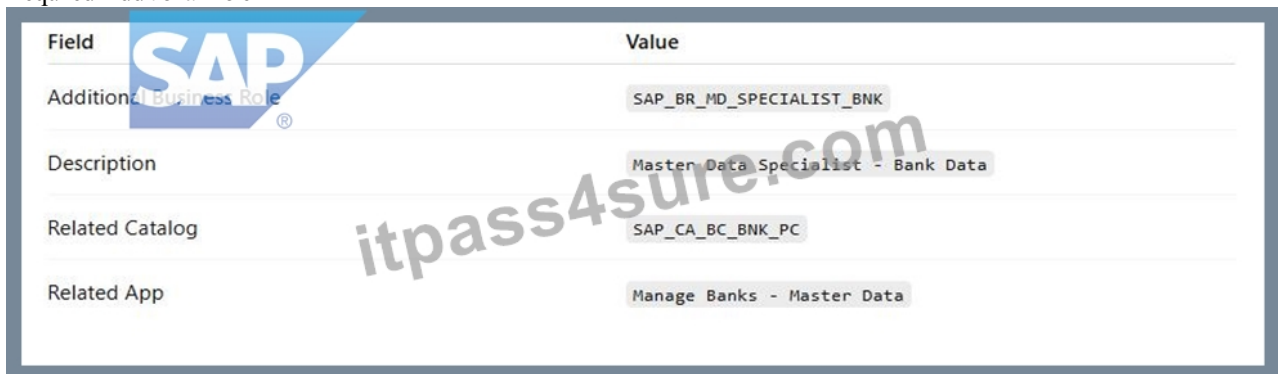

Always replace ##### with the last 6 digits of your group number in later migration steps.

The role to add here is in addition to the migration cockpit role.

Save the user after assigning the role.

Refresh the session after assignment so the new authorization is loaded.

Required Additional Role

Field	Value
Additional Business Role	SAP_BR_MD_SPECIALIST_BNK
Description	Master Data Specialist - Bank Data
Related Catalog	SAP_CA_BC_BNK_PC
Related App	Manage Banks - Master Data

Step 1: Review the migration object documentation

Open the Bank migration object in the migration project and review the documentation or role requirement note.

Explanation:

The task explicitly asks you to check the documentation for the Bank migration object and assign the additional role required for migration. SAP's official documentation for bank maintenance shows that bank master maintenance is tied to the role Master Data Specialist - Bank Data (SAP\_BR\_MD\_SPECIALIST\_BNK).

Step 2: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to your user.

Step 3: Search for your own user

In Maintain Business Users:

Enter your own user ID in the search field.

Click Go.

Explanation:

You must assign the additional role to your own user because you are the one executing the migration.

Step 4: Open your user record

From the search results:

Click your user entry.

Open the business user detail page.

Explanation:

This opens the maintenance screen where assigned business roles can be changed.

Step 5: Switch to Edit mode

On the user detail page:

Click Edit

Explanation:

Edit mode is required before the assigned business roles list can be updated.

Step 6: Open the "Assigned Business Roles" tab

Inside the business user record:

Click:

Assigned Business Roles

Explanation:

This is where you assign the additional bank master data role.

Step 7: Click Add

In the assigned business roles section:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup is used to search for standard SAP business roles.

Step 8: Search for the additional bank role

In the Add Business Roles popup, search for either:

SAP\_BR\_MD\_SPECIALIST\_BNK

or

Master Data Specialist - Bank Data

Then select the matching role.

Explanation:

SAP documents that the app Manage Banks - Master Data belongs to the role Master Data Specialist - Bank Data (SAP\_BR\_MD\_SPECIALIST\_BNK). That is the role needed for bank creation/maintenance authorization.

Step 9: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the role to your user in draft mode.

Step 10: Save the business user

Back on the business user page:

Click Save

Explanation:

This finalizes the new role assignment.

Step 11: Confirm both migration-related roles are assigned

After saving, verify that your user now has both:

BR\_CONFIG\_EXPERT\_DATA\_MIG

SAP\_BR\_MD\_SPECIALIST\_BNK

Explanation:

These two roles cover different parts of the scenario:

BR\_CONFIG\_EXPERT\_DATA\_MIG → migration cockpit access

SAP\_BR\_MD\_SPECIALIST\_BNK → bank master data creation/maintenance authorization

Step 12: Refresh your session After saving:

Refresh the browser completely, or

Sign out and sign in again

Explanation:

SAP role assignments may not become active in the current session immediately. A refresh or new login ensures the authorization is reloaded.

Step 13: Return to the migration project

Go back to:

Migrate Your Data

open your project:

Bank Data #####

open migration object:

Bank

Explanation:

Now that the additional bank role is assigned, the system should allow you to migrate bank master data successfully.

Expected Result

After this task is completed successfully:

your user still has the migration role BR\_CONFIG\_EXPERT\_DATA\_MIG,

your user also has the additional bank role SAP\_BR\_MD\_SPECIALIST\_BNK,

the authorization error for creating bank data should no longer occur,

the Bank migration can proceed successfully.

Screenshots for This Task

Screenshot 1: Assigned Business Roles list including the migration role Use the screenshot from your run where the business user already shows:

Configuration Expert - Data Migration

This screenshot can be used to explain the starting point before the additional role is assigned.

What this screenshot proves

It shows that the migration role alone was not enough for the bank creation authorization.

Screenshot 2: Migration error message

Use the screenshot from your run that shows the message:

You are not authorized to create bank data for country/region US

This is the key evidence that an additional bank master data role was required.

What this screenshot proves

It proves the migration cockpit role was present, but bank maintenance authorization was still missing.

Official SAP Documentation Basis

SAP's official documentation states that the Manage Banks - Master Data app is assigned to:

Master Data Specialist - Bank Data

SAP\_BR\_MD\_SPECIALIST\_BNK

within catalog:

Bank - Maintenance

SAP\_CA\_BC\_BNK\_PC

This is the basis for the additional role assignment required in this task.

## NEW QUESTION # 22

### SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the business catalogs listed below to the business role and save:

HCM - Employee Self-Service (SAP\_HCM\_BC\_EMP\_PC)

Concur - Employee Self-Service (SAP\_CON\_BC\_CTE\_ESS\_PC)

**Answer:**

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the required business catalogs to the custom all-employee business role created in the previous task. These catalogs provide the applications that will later be shown in the launchpad space and page for all employees.

The catalogs that must be assigned are:

HCM - Employee Self Service

SAP\_HCM\_BC\_EMP\_PC

Concur - Employee Self-Service

SAP\_CON\_BC\_CTE\_ESS\_PC

Business Scenario Explanation

In the previous task, you created a new custom all-employee business role, for example:

Z\_EMPLOYEES\_ALL\_#####

That role exists, but on its own it does not yet provide app access.

In SAP S/4HANA Cloud, app access is granted through business catalogs.

This means the role must now be connected to the catalogs that contain the apps employees need.

Later, these catalogs will feed the launchpad page content so end users can easily find the relevant applications.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact catalog names and IDs.

Assign both required catalogs.

Save the role after assignment.

Do not assign the wrong catalog variant.

Required Catalogs

Assign exactly these two business catalogs:

Business Catalog

Business Catalog ID

HCM - Employee Self Service

SAP\_HCM\_BC\_EMP\_PC

Concur - Employee Self-Service

SAP\_CON\_BC\_CTE\_ESS\_PC

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This app is used to maintain business roles, assign catalogs, assign launchpad spaces, and maintain restrictions.

Step 2: Search for your custom all-employee business role

Inside Maintain Business Roles:

Search for your business role ID:

Z\_EMPLOYEES\_ALL\_#####

Example

If your suffix is 000013, search for:

Z\_EMPLOYEES\_ALL\_000013

Open the role.

Explanation:

You must open the custom all-employee role created in the previous task, not a template role and not a standard SAP role.

**All Employee Role 000013**  
Z\_EMPLOYEES\_ALL\_000013

Write Access: No Access  
Read Access: Unrestricted  
Value Help Access: Unrestricted

Draft Last Changed By: A000013 SAP\_Learning  
Draft Last Changed On: 30.03.2026, 20:35:32

Editing Status: Draft

Authorization is up-to-date

General Role Details | Business Catalogs (2) | IAM Apps (3) | **Launchpad Spaces (1)** | Business Users (0)

Assigned Launchpad Spaces (1)

Space ID	Space Description	Space Title	Type	Template	Merge ID
<input type="checkbox"/> Z_ALL_EMP_000013	General	General	Managed by Customer		

Step 3: Verify the correct role is open

Confirm that the role details show:

Business Role ID = Z\_EMPLOYEES\_ALL\_#####

Business Role Description = All Employee Role #####

Explanation:

This ensures you are assigning catalogs to the correct business role.

Step 4: Go to the "Business Catalogs" tab

Inside the role:

Click the tab:

Business Catalogs

Explanation:

This tab is used to assign the business catalogs that define which apps and app authorizations the role provides.

Step 5: Click Add

In the Assigned Business Catalogs section:

Click Add

This opens the dialog:

Add Business Catalogs

Explanation:

The Add popup is used to search for and assign SAP-delivered business catalogs to the custom role.

Step 6: Search for the first catalog

In the Add Business Catalogs popup:

Search for:

SAP\_HCM\_BC\_EMP\_PC

or

HCM - Employee Self Service

Select:

HCM - Employee Self Service

Business Catalog ID: SAP\_HCM\_BC\_EMP\_PC

Explanation:

This catalog provides employee self-service apps and is required by the task.

Business Catalogs | SAP\_HCM\_BC\_EMP\_PC

Business Catalog	Business Catalog ID	Status
<input checked="" type="checkbox"/> HCM - Employee Self Service	SAP_HCM_BC_EMP_PC	ON

Step 7: Search for the second catalog

Still in the Add Business Catalogs popup:

Search for:

SAP\_CON\_BC\_CTE\_ESS\_PC

or

Concur - Employee Self-Service

Select:

Concur - Employee Self-Service

Business Catalog ID: SAP\_CON\_BC\_CTE\_ESS\_PC

Explanation:

This catalog provides the Concur employee self-service content and is also explicitly required by the task.

Step 8: Add the selected catalogs

After selecting both catalogs:

Click OK or Apply

Explanation:

This adds the selected catalogs to the custom role in draft mode.

Step 9: Verify both catalogs are listed

Back in the Business Role screen, verify that both assigned catalogs are visible:

SAP\_HCM\_BC\_EMP\_PC

SAP\_CON\_BC\_CTE\_ESS\_PC

Explanation:

This confirms that the required app authorizations have now been attached to the role.

Step 10: Save the role

Click:

Save

Explanation:

This finalizes the catalog assignment.

Without saving, the catalogs remain only in draft and the role will not provide the required app content.

Step 11: Verify the result after save

After saving, check again that the role still shows both business catalogs in the assigned list.

Explanation:

This confirms the task was completed successfully and the role is ready for the next step, which is launchpad space/page content.

Expected Result

After this task is completed successfully:

the custom all-employee role has both required business catalogs assigned, the role is saved successfully, the role now provides the app authorizations required for employee self-service content, the launchpad page can later use these catalogs to add the required tiles.

## NEW QUESTION # 23

### SIMULATION

**Business Scenario** You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a new business user with the following information by importing the new user's data:

Field	Value
Worker ID	1#####
User Name	PM#####
Worker Type	BUPO03
First Name	Project
Last Name	Manager #####
Email	PM#####@dummy.sap.com
Language	EN
Company Code	1010
Cost Center	10101501

Field	Value
Start Date	Today's Date (YYYYMMDD)
End Date	December 31, 9999 (YYYYMMDD)

Import Name: Project Manager Test User #####

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a test user in SAP S/4HANA Cloud for demonstrating professional services business processes

to project managers during a Fit-to-Standard workshop.

This task is completed by importing:

worker data

work agreement data

The import must use the exact values provided in the task.

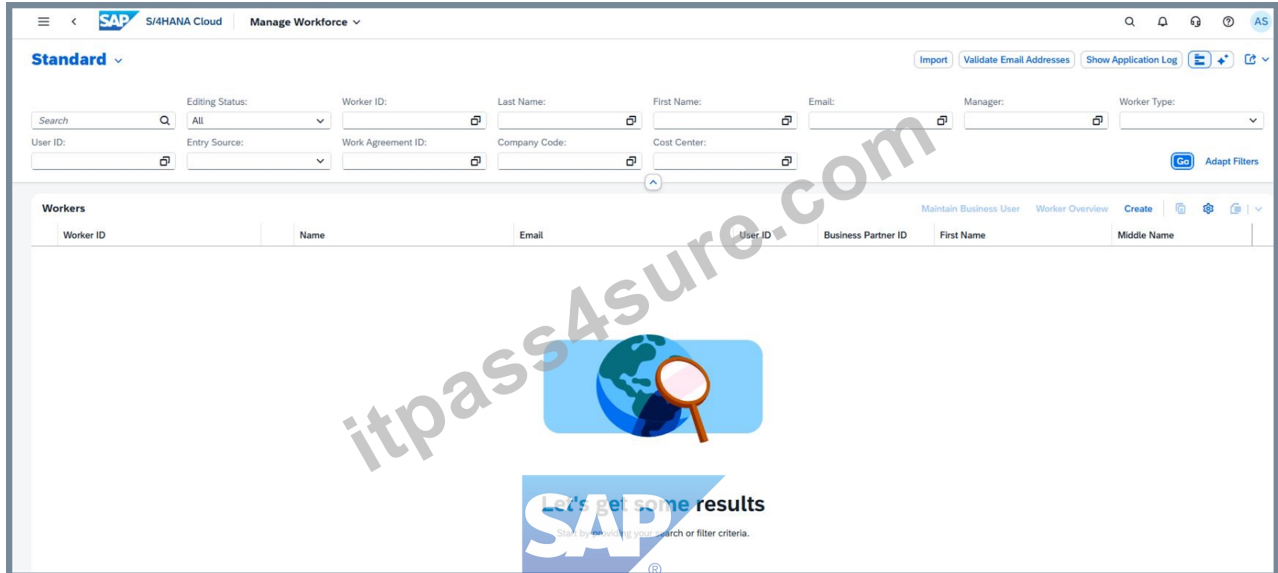

Business Scenario Explanation

In this scenario, you need a test user that represents a Project Manager.

This user is needed so that project-management-related professional services processes can later be demonstrated in the system.

Instead of creating every record manually, SAP asks you to use the import process.

This is faster and also ensures the worker and agreement data are loaded in the correct structure.

#### Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the values exactly as provided.

Do not change spaces, punctuation, or capitalization unless the task explicitly tells you to.

A wrong value, extra space, or missing number can cause task validation failure.

If your suffix is 000013, then the values become:

Worker ID = 1000013

User Name = PM000013

First Name = Project

Last Name = Manager 000013

Email = PM000013@dummy.sap.com

Step 1: Open the app used for importing users/workers

From the SAP S/4HANA Cloud launchpad:

Log in to the system.

Open the relevant import app used in your simulation for importing worker and work agreement data.

Start creation of a new import.

Explanation:

This task is not done by manual user creation only.

The scenario specifically says to create the new business user by importing the new user's data.

The import will load the basic worker and work agreement records that are required before the business user is fully usable.

Step 2: Enter the import name

When creating the import:

In the field Import Name, enter:

Project Manager Test User #####

Replace ##### with your own 6-digit group suffix.

Example

For suffix 000013, enter:

Project Manager Test User 000013

Explanation:

The import name identifies your import package and should be entered exactly as required by the task.

Step 3: Prepare the worker data

In the worker import structure, enter these values:

Worker ID = 1#####

User Name = PM#####

Worker Type = BUP003

First Name = Project

Last Name = Manager #####

Email = PM#####@dummy.sap.com

Language = EN

Company Code = 1010

Cost Center = 10101501

Example for 000013

Worker ID = 1000013

User Name = PM000013

Last Name = Manager 000013

Email = PM000013@dummy.sap.com

Explanation:

These values define the person as a project manager test worker and connect the worker to:

the company code,

the cost center,

the default language,

and the worker type required by the scenario.

Step 4: Prepare the work agreement data

In the work agreement import structure, enter:

Start Date = today's date in YYYYMMDD format

End Date = 99991231

Example

If today's date is March 30, 2026:

Start Date = 20260330

End Date = 99991231

Explanation:

The end date 99991231 is used to indicate an open-ended validity.

This is common in SAP for a record that should remain valid indefinitely.

Step 5: Upload or enter the import data

Depending on the app behavior in your exercise:

Upload the prepared import file or

Enter the values into the import structure manually if the system provides inline entry.

Explanation:

The business scenario says the business user must be created by importing worker and work agreement data.

This means the relevant master data must be loaded into the system first before the user is fully available.

Step 6: Start the import

After all values are entered:

Validate the data if the system provides a validation option.

Start the import.

Explanation:

Validation checks whether:

required fields are filled,

date formats are correct,

codes like BUP003, 1010, and 10101501 are valid,

and the import structure is complete.

Step 7: Wait for the import to complete

Monitor the import process.

Wait until the import shows success or completed status.

Explanation:

Only after the import is complete will the worker and work agreement records exist in the system and be usable for further user setup and role assignment.

Step 8: Verify the imported worker/business user

After the import finishes:

Open the relevant business user / worker maintenance app.

Search using:

Worker ID

or User Name

Confirm that the imported user exists.

Explanation:

This step ensures the imported data was actually created and is available for later process demonstrations.

Expected Result

After the import is completed successfully:

a new test worker/user exists in the system,

the worker has the required professional-services identity,

the work agreement is valid,

the user can be used in later project manager demonstrations.

## NEW QUESTION # 24

.....

itPass4sure try hard to makes SAP SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) exam preparation easy with its several quality features. Our C\_S4CPB\_2602 exam dumps come with 100% refund assurance. We are dedicated to your accomplishment, hence pledges you victory in C\_S4CPB\_2602 Certification exam in a single attempt. If for any reason, a user fails in C\_S4CPB\_2602 exam then he will be refunded the money after the process. Also, we offer one year free updates to our C\_S4CPB\_2602 Exam esteemed users; and these updates will be entitled to your account right from the date of purchase. Also the 24/7 Customer support is given to users, who can email us if they find any haziness in the C\_S4CPB\_2602 exam dumps, our team will merely answer to your all C\_S4CPB\_2602 exam product related queries.

**C\_S4CPB\_2602 Examcollection:** [https://www.itpass4sure.com/C\\_S4CPB\\_2602-practice-exam.html](https://www.itpass4sure.com/C_S4CPB_2602-practice-exam.html)

C\_S4CPB\_2602 exam materials will definitely make you feel value for money, Hence itPass4sure C\_S4CPB\_2602 Examcollection's dumps are a special feast for all the exam takers and sure to bring them not only exam success but also maximum score, itPass4sure has got some very reliable tools to help you during your online C\_S4CPB\_2602 cbt preparation, After you install the new version of the C\_S4CPB\_2602 pass-for-sure file, you will find the operation is much better and the whole layout becomes beautifully.

Enabling this option reduces security because it stores passwords in a format C\_S4CPB\_2602 that is essentially the same as plain text, Microsoft's upcoming Windows Vista promises a new era of rich, graphically engaging experiences.

## 100% Pass-Rate Practice C\_S4CPB\_2602 Engine - Pass C\_S4CPB\_2602 in One Time - Reliable C\_S4CPB\_2602 Examcollection

C\_S4CPB\_2602 Exam Materials will definitely make you feel value for money, Hence itPass4sure's dumps are a special feast for all the exam takers and sure to bring them not only exam success but also maximum score.

itPass4sure has got some very reliable tools to help you during your online C\_S4CPB\_2602 cbt preparation, After you install the new version of the C\_S4CPB\_2602 pass-for-sure file, you will find the operation is much better and the whole layout becomes beautifully.

We will not let you down once you make your choice of C\_S4CPB\_2602 new questions.
