Salesforce AP-211 Exam Syllabus Topics:

Topic	Details
Topic 1	• Discovery: This domain covers identifying customer personas and stakeholders, defining required capabilities from use cases, and gathering functional and technical requirements to achieve desired business outcomes.
Topic 2	• Deploy: This domain addresses pre-deployment and post-deployment steps for specific use cases and Health Cloud capabilities, along with managing technical aspects through Mobile app capabilities.

Topic 3	• Design: This domain encompasses creating Health Cloud solution designs using best practices, modeling healthcare entities with appropriate objects, determining specific capabilities to use, defining success metrics and reporting, implementing security and compliance, developing integration strategies, and creating data migration plans.
Topic 4	• Implement: This domain focuses on installing Health Cloud, configuring applications and OmniStudio components, customizing features, implementing integrations and APIs, configuring security rules, and establishing reporting.

Quiz 2026 Salesforce AP-211: Salesforce Health Cloud Accredited Professional Perfect Latest Test Answers

When you take Salesforce AP-211 practice exams again and again you get familiar with the Salesforce Health Cloud Accredited Professional (AP-211) real test pressure and learn to handle it for better outcomes. Features of the web-based and desktop AP-211 Practice Exams are similar. The only difference is that the Salesforce Health Cloud Accredited Professional (AP-211) web-based version works online.

Salesforce Health Cloud Accredited Professional Sample Questions (Q51-Q56):

NEW QUESTION # 51
Bloomington Caregivers would like to display patient information from both Salesforce standard objects and data from an external system.
Which three Health Cloud features should a consultant recommend the company use to display this on the patient record page?
Choose 3 answers

- A. FlexCards
- B. Salesforce Flows
- C. DataRaptors
- D. Integration Procedures
- E. Visualforce Pages

Answer: A,C,D

Explanation:
Step-by-Step Explanatio n:
Health Cloud Best Practice for Displaying Internal and External Data:
FlexCards (part of OmniStudio) can display data from multiple sources in a unified view on a patient record.
Integration Procedures connect to external systems and bring in data (e.g., from EHRs or other sources).
DataRaptors extract and transform Salesforce data for display and use in FlexCards.
Salesforce Documentation Reference:
"FlexCards can display internal Salesforce data and call Integration Procedures or DataRaptors to bring in external or standard object data."
- OmniStudio Standard Guide
"Integration Procedures are used to retrieve and update data from external systems and can be invoked directly from FlexCards or OmniScripts."
- OmniStudio Integration Procedures
"DataRaptors map Salesforce data to and from FlexCards and Integration Procedures, enabling seamless display of patient information."
- OmniStudio DataRaptors
Other Options:
Salesforce Flows: Good for automation but not for real-time display of combined external and internal data on record pages.
Visualforce Pages: Legacy solution, not recommended for modern Health Cloud patient page display, and does not natively integrate with OmniStudio tools.
Reference:

OmniStudio Standard Guide
OmniStudio Integration Procedures
OmniStudio DataRaptors

NEW QUESTION # 52

A payer needs to manage requests for concurrent review of prior authorizations within Health Cloud and wants to use out-of-the-box record types and page layouts for prior However, the payer's Salesforce administrator does not see any preconfigured record types or page layouts for prior authorizations in the payer's Salesforce org.

What should a consultant recommend to the Salesforce administrator to expedite implementation?

- A. Install the Health Cloud Care Request Extensions package.
- B. Build custom page layouts and record types to support the requirement.
- C. Install the Health Cloud Claims unmanaged package.
- D. install an AppExchange prior authorization package.

Answer: A

Explanation:
* Preconfigured Prior Authorization Objects:
Exact Extract:
"The Health Cloud Care Request Extensions package provides out-of-the-box record types, page layouts, and flows for prior authorizations and other payer workflows." Reference:
* Other Options:
Claims unmanaged package is not for prior authorizations.
Building custom layouts is not necessary when a packaged solution exists.
AppExchange prior authorization packages are not officially supported for core Health Cloud prior auth workflows.

NEW QUESTION # 53

Prior to go-live for Bloomington Caregivers, a consultant loads the future system users into Salesforce.
Which two permission set licenses should the consultant assign to the users to give them access to Health Cloud?
Choose 2 answers

- A. Health Cloud Foundation permission set license
- B. Health Cloud Platform permission set license
- C. Health Cloud permission set license
- D. Health Cloud Standard permission set license

Answer: B,C

NEW QUESTION # 54

A MedTech customer is looking to track surgical case visits for reps to sell their products, leveraging Intelligent Sales.
Which object should a consultant configure to track this visit type?

- A. Work Type
- B. Action Plan
- C. Visit
- D. Location

Answer: A

NEW QUESTION # 55

A customer wants to view a patient's health conditions and clinical encounters as a sequence of events happening over time on the patient's Person Account page.
What should a consultant do to achieve this using the Enhanced Timeline functionality?

- A. Create a new Timeline record within Setup.

- **B. Create a new Timeline View Configuration record.**
- C. Add a record to the HealthCloudTimelineConfig custom setting.
- D. Clone the HCTimeline FlexCard for customization.

Answer: B

Explanation:
* Enhanced Timeline Functionality:
The Enhanced Timeline in Health Cloud displays a sequence of clinical events (e.g., health conditions and encounters) on a patient's Person Account.
Exact Extract:
"To configure the Enhanced Timeline component to show custom event types and adjust the event display, create a Timeline View Configuration record." Reference:
* Other Options:
Timeline records within Setup and HealthCloudTimelineConfig custom setting are not how the Enhanced Timeline is configured for new event views.
Cloning the HCTimeline FlexCard is not required or recommended for this configuration.

NEW QUESTION # 56

......
