최신 PEGACPLSA23V1높은 통과율 덤프공부문제 시험자료

Itexamdump의Pegasystems인증 PEGACPLSA23V1 덤프는 수많은 시험준비 공부자료 중 가장 믿음직합니다. Itexamdump의 인지도는 업계에 널리 알려져 있습니다. Pegasystems인증 PEGACPLSA23V1덤프로Pegasystems인증 PEGACPLSA23V1시험을 준비하여 한방에 시험패스한 분이 너무나도 많습니다. Pegasystems인증 PEGACPLSA23V1덤프는 실제Pegasystems인증 PEGACPLSA23V1시험문제에 초점을 맞추어 제작한 최신버전 덤프로서 시험패스율이 100%에 달합니다.

Pegasystems PEGACPLSA23V1 시험요강:

주제	소개
주제 1	Reporting Design: Create reports that meet business needs and support performance. Troubleshoot reporting issues. Write queries, use SQL functions, and combine data through joins, subreports, and associations.
주제 2	Deployment and Testing Design: Follow best practices for production deployment. Plan and build CI CD pipelines. Design testing strategies and use automation to maintain quality. Track and assess release performance effectively.
주제 3	Application Design Extended: Manage work assignment and routing, and use features like Get Next Work. Explore different ways to allocate tasks. Handle mid-case flow changes and fix issues using problem flows. Implement background processing, job schedulers, queue processors, and asynchronous integrations. Understand how to use stream services, data flows, and datasets in Pega Infinity.
주제 4	Security Design: Choose the right authentication and access models based on the situation. Configure access groups, roles, and role hierarchies. Understand rule-level security. Spot and prevent security threats. Apply best practices to secure applications and use event logging for monitoring.
주제 5	Pega Platform Design Extended: Use App Studio for app development. Understand features of Prediction Studio and Admin Studio. Reuse relevant components efficiently. Grasp the basics of UX design, DX API, and Constellation. Design accessible and user-friendly experiences.

최신 CLSA PEGACPLSA23V1 무료샘플문제 (Q38-Q43):

질문 # 38

Which configuration steps do you perform to enable an access group for offline user?

- A. Create a model operator for the access group to authenticate users.
- **B. configure an offline-capable portal as the default portal for the access group**
- C. Force a full syn for members of the access group
- D. Enable caching for the access group

정답: B

질문 # 39

Consider a scenario where an e-commerce company is using a Job Scheduler to manage various tasks. The Job Scheduler is responsible for updating inventory, processing orders, sending order confirmation emails, and generating daily sales reports. Which two of the following are typical features of a Job Scheduler?

(Choose Two)

- **A. It can automatically retry failed tasks.**
- B. It can automatically commit the data updates.
- C. It can run tasks in a specific order.
- **D. It can run tasks in parallel.**

정답: A,D

질문 # 40

A healthcare company wants to migrate its patient management system to a more secure and scalable environment. After evaluating different options, the company decides to host their application on a Pega- managed cloud environment, expecting it to meet its growing data security and compliance needs while ensuring uninterrupted access to patient records. In this context, which three of the following responsibilities does Pega assume in managing the healthcare company's application in the Pega Cloud environment?

(Choose Three)

- **A. Monitor network and ensure system-level access control to safeguard patient information and system integrity.**

- B. Install Pega Platform and any additional Pega applications to which the healthcare company subscribes.
- C. Securely store the healthcare company's data in a cloud repository, which helps ensure data privacy and compliance with healthcare regulations.
- D. Set up the necessary authentication and authorization mechanisms to control access to sensitive patient data.
- E. Oversee compliance, conduct security monitoring, and respond to security events to protect against potential breaches or threats.

정답: A,C,E

설명:

Comprehensive and Detailed Explanation From Exact Extract:

Pega Cloud, as described in Pega Academy's Lead System Architect Mission and the Pega Certified Lead System Architect Study Guide, is a managed cloud environment where Pega assumes specific responsibilities for infrastructure, security, and compliance, while clients manage application-level configurations. This is particularly critical for healthcare applications with stringent regulatory requirements.

* Option A (Correct): Pega Cloud monitors the network and ensures system-level access control to protect patient information and maintain system integrity. This includes firewalls, intrusion detection, and network security, as outlined in the Pega Cloud Services section of Pega Community.

* Option B (Incorrect): While Pega installs the Pega Platform, the responsibility for installing additional Pega applications (e.g., industry-specific solutions) typically falls to the client or requires coordination via subscriptions. This is not a default Pega Cloud responsibility, per the Pega Cloud Architecture module.

* Option C (Correct): Pega Cloud securely stores data in a cloud repository, ensuring encryption and compliance with regulations like HIPAA for healthcare data. This is a core responsibility of Pega Cloud, as noted in the Data Security in Pega Cloud module.

* Option D (Correct): Pega Cloud oversees compliance, conducts security monitoring, and responds to security events to prevent breaches. This includes SOC 2 compliance and incident response, as documented in the Pega Cloud Security section.

* Option E (Incorrect): Authentication and authorization mechanisms (e.g., SSO, RBAC) are configured by the client within the Pega application, not managed by Pega Cloud. Pega provides the tools, but the client defines access policies, per the Security Design module.

:

Pega Academy: Lead System Architect Mission (covers Pega Cloud responsibilities).

Pega Community: Pega Cloud Services (details on security and compliance).

Pega Certified Lead System Architect Study Guide (v23): Section on Pega Platform Architecture (emphasizes Pega Cloud management).

질문 # 41

A linked property can be best thought of as _____?

- A. A pointer between two pages or properties
- B. A property that represents a PRPC-managed object
- C. A reference to an external entity that is stored in a system of record
- D. Another term for a reference property
- E. A property that can be referenced from any context at any time

정답: B

질문 # 42

Select the three best practices that can help minimize security vulnerabilities in the custom HTML rule. (Choose Three)

- A. Use dynamic SQL statements instead of prepared statements to prevent possible SQL injection.
- B. Use the `StringUtils.crossScriptingFilter` method when using parameters in a Pega Platform™ reference tag.
- C. Use of the `SafeURL` function to generate Pega Platform request URLs in custom JavaScript.
- D. Use hidden elements (`type=hidden`).
- E. Minimize the use of `mode=literal`.

정답: B,C,E

질문 # 43

다년간 IT업계에 종사하신 전문가들이 자신의 노하우와 경험으로 제작한 Pegasystems PEGACPLSA23V1덤프는 PEGACPLSA23V1 실제 기출문제를 기반으로 한 자료로서 PEGACPLSA23V1시험문제의 모든 범위와 유형을 포함하고 있어 높은 적중율을 자랑하고 있습니다.덤프구매후 불합격 받으시면 구매일로부터 60일내 주문은 덤프비용을 환불해드립니다.IT 자격증 취득은 Itexamdump덤프가 정답입니다.
