

# 800-150 Pdf Version & 800-150 Answers Free

P.S. Free & New 800-150 dumps are available on Google Drive shared by PassExamDumps: <https://drive.google.com/open?id=1ocxUxV74EBz3sTdz9GPsOAssBpKTylxg>

According to the different demands from customers, the experts and professors designed three different versions of our 800-150 exam questions for all customers. According to your need, you can choose the most suitable version of our 800-150 guide torrent for yourself. The three different versions have different functions. If you decide to buy our 800-150 Test Guide, the online workers of our company will introduce the different function to you. You will have a deep understanding of the three versions of our 800-150 exam questions. We believe that you will like our 800-150 study guide.

## Cisco 800-150 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Cisco Hardware Replacement: This section of the exam measures the skills of a Technical Support Engineer and teaches how to safely and correctly replace Cisco hardware. It explains safety procedures such as creating safe work zones and handling electrostatic discharge. Students learn the step-by-step processes to replace a wide range of Cisco devices, from switches and routers to firewalls, UCS servers, and collaboration endpoints. It also covers configuring Cisco NX-OS software, including understanding operating modes, boot procedures, and password recovery, and introduces Cisco collaboration endpoint solutions like IP phones and video systems.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Common Service Tasks and Tools: This section of the exam measures the skills of a Technical Support Engineer and focuses on tasks commonly needed to manage Cisco devices. It explains how devices boot up, introduces common Cisco IOS commands, and identifies tools for file management. It shows how to confirm physical connections, remotely access devices, and connect to the console port. It also covers how to capture the status of a device, recover passwords, and replace devices by using proper tools. Students are also taught how to find serial numbers on Cisco equipment to assist with support and maintenance activities.</li> </ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Networking Foundations:</b> This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP</li> <li>• IP stack, and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Cisco UCS and Data Center Architecture:</b> This section of the exam measures the skills of a Data Center Engineer and introduces Cisco's UCS and data center solutions. It explains the devices found in a data center, including switches, UCS servers, and director switches, and describes different server deployment models. Students will also learn about virtualization components like virtual machines, hypervisors, cloud computing concepts, and deployment models. The section covers how Cisco UCS devices fit into campus networks, edge locations, and data centers, and explains the key components and connections used in UCS architecture.</li> </ul>

## 800-150 Answers Free - 800-150 Pdf Free

As we all know, the latest 800-150 quiz prep has been widely spread since we entered into a new computer era. The cruelty of the competition reflects that those who are ambitious to keep a foothold in the job market desire to get the 800-150 certification. Our 800-150 exam guide engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies. Our laTest 800-150 Quiz prep aim at assisting you to pass the 800-150 exam and making you ahead of others.

## Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q56-Q61):

### NEW QUESTION # 56

Which component of the Cisco Room system requires removal of the upper textile grille and the use of release levers during its replacement process?

- A. Codec
- **B. Quad camera**
- C. Antenna module
- D. Loudspeaker

**Answer: B**

Explanation:

In Cisco Room systems such as the Room Kit Pro and similar setups, replacing the quad camera involves a physical disassembly process. Specifically, the upper textile grille must be removed to gain access to the internal mounting mechanism. After that, release levers are used to disengage the quad camera unit from its housing.

This procedure ensures secure installation while allowing relatively straightforward removal when maintenance or replacement is necessary. The codec, loudspeaker, and antenna module do not typically require this specific removal method.

Reference: Supporting Cisco Devices for Field Technicians (FLDTEC) - Maintenance and RMA Procedures

### NEW QUESTION # 57

Drag and drop the virtualized data center components from the left onto the corresponding descriptions on the right.

**Answer:**

Explanation:

### NEW QUESTION # 58

Refer to the exhibit.

Refer to the exhibit. Which CLI show command identifies the serial number on a router?

- A. show idprom
- B. show version
- C. show platform
- **D. show inventory**

**Answer: D**

Explanation:

The show inventory command is used on Cisco devices to display detailed information about the hardware components installed, including:

Product Identifier (PID)

Serial Number (SN)

Description of the component

In the exhibit, the output clearly shows:

NAME: "Chassis", DESCR: "Cisco ISR4451-X/K9"

PID: ISR4451-X/K9, VID: V01, SN: FCW2134L0SH

This confirms that show inventory is the correct command to retrieve the serial number and hardware inventory details.

show version provides some system information and sometimes includes serial numbers, but it's not as reliable or detailed for component-level hardware info.

show idprom is not commonly used and not supported on all platforms.

show platform provides platform-specific info but not typically the serial number.

### NEW QUESTION # 59

Which two devices are most commonly used in a WAN environment? (Choose two.)

- A. Network interface cards
- B. Wireless access points
- **C. Modems**
- **D. Optical fiber converters**
- E. Hubs

**Answer: C,D**

Explanation:

In the context of Wide Area Networks (WANs), the key objective is to connect geographically separated networks using service provider infrastructure. The FLDTEC course emphasizes that WAN environments typically involve devices that can handle different physical transmission mediums and protocols.

Modems:

\* Modulate and demodulate analog signals to digital signals.

\* Used in WAN environments to connect over analog lines like DSL or leased lines.

\* Essential for interfacing between digital routers and analog telephone networks.

Optical Fiber Converters:

\* Also known as media converters, they are used to convert electrical signals to optical signals (and vice versa) for fiber transmission.

\* Common in WAN scenarios where long-distance high-speed transmission over fiber is required.

Incorrect Options:

\* A. Hubs: Obsolete Layer 1 devices used in LANs, not suitable for WANs.

\* D. Network Interface Cards (NICs): Used in end devices for LAN connectivity.

\* E. Wireless Access Points: Typically used in WLANs within local premises, not WAN infrastructure.

This aligns with Cisco's WAN architecture fundamentals as highlighted in FLDTEC under "Cisco Equipment and Related Hardware."

### NEW QUESTION # 60

Which component serves as the central management and communication core and provides a single point of management via Cisco UCS Manager in a Cisco UCS environment?

- A. Nexus 9000 Series Switch
- B. MDS 9000 Series SAN Switch
- **C. UCS Fabric Interconnect**
- D. UCS E-Series server in ISR platforms

**Answer: C**

Explanation:

The UCS Fabric Interconnect is the central management and communication hub of the Cisco UCS (Unified Computing System) environment. It integrates compute, network, and storage access into a unified system.

Fabric Interconnects:

- \* Manage all servers and I/O modules connected to the UCS domain
- \* Provide connectivity and are the point of integration with the Cisco UCS Manager
- \* Offer high-availability and centralized policy management

Other options like the Nexus or MDS switches do not serve this unified management function in a UCS deployment.

Reference: Supporting Cisco Devices for Field Technicians (FLDTEC) - Cisco Equipment and Related Hardware Explanation:

The UCS Fabric interconnect serves as the central management and communication core in a Cisco UCS environment, providing a single point of management via Cisco UCS Manager for the entire UCS system, including servers, networking, and storage components.

## NEW QUESTION # 61

.....

We regularly update our valid Cisco 800-150 certification test preparation material to keep them in line with the current Cisco 800-150 exam content and industry standards. Professionals from different countries give us their valuable feedback to refine 800-150 Actual Dumps even more.
