

# NSE5\_FNC\_AD-7.6 Pass-Sure Torrent - NSE5\_FNC\_AD-7.6 Actual Braindumps & NSE5\_FNC\_AD-7.6 Test Cram

Each important section of the syllabus has been given due place in our NSE5\_FNC\_AD-7.6 practice braindumps. Hence, you never feel frustrated on any aspect of preparation, staying with our NSE5\_FNC\_AD-7.6 learning guide. Every NSE5\_FNC\_AD-7.6 exam question included in the versions of the PDF, SOFTWARE and APP online is verified, updated and approved by the experts. With these outstanding features of our NSE5\_FNC\_AD-7.6 Training Materials, you are bound to pass the exam with 100% success guaranteed.

If you want to pass your exam and get the certification in a short time, choosing the suitable NSE5\_FNC\_AD-7.6 exam questions are very important for you. You must pay more attention to the NSE5\_FNC\_AD-7.6 study materials. In order to provide all customers with the suitable study materials, a lot of experts from our company designed the NSE5\_FNC\_AD-7.6 Training Materials. We can promise that if you buy our NSE5\_FNC\_AD-7.6 exam questions, it will be very easy for you to pass your NSE5\_FNC\_AD-7.6 exam and get the certification.

## Exam NSE5\_FNC\_AD-7.6 Success - Latest NSE5\_FNC\_AD-7.6 Braindumps Files

It is a universally accepted fact that the NSE5\_FNC\_AD-7.6 exam is a tough nut to crack for the majority of candidates, but there are still a lot of people in this field who long to gain the related certification so that a lot of people want to try their best to meet the challenge of the NSE5\_FNC\_AD-7.6 Exam. A growing number of people know that if they have the chance to pass the exam, they will change their present situation and get a more decent job in the near future.

## Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q40-Q45):

### NEW QUESTION # 40

When creating a user or host profile, which three criteria can you apply? (Choose three.)

- A. Adapter current VLAN
- **B. Host or user attributes**
- **C. Host or user group memberships**
- D. An applied access policy
- **E. Location**

**Answer: B,C,E**

Explanation:

The User/Host Profile is the primary mechanism in FortiNAC-F for identifying and categorizing endpoints to determine their level of network access. According to the FortiNAC-F Administration Guide, a profile is built using a combination of criteria that define "Who" is connecting, "What" device they are using, and "Where" they are located on the network.

The three main categories of criteria available in the configuration are:

Host or User Attributes (B): This includes specific details such as the host's operating system, the user's role (e.g., Employee, Contractor), or custom attributes assigned to the record.

Host or User Group Memberships (A): Profiles can be configured to match endpoints that are members of specific internal FortiNAC groups or synchronized directory groups (like LDAP or Active Directory groups). This allows for broad policy application based on organizational structure.

Location (E): The "Where" component allows administrators to restrict a profile match to specific physical or logical areas of the network, such as a particular switch, a group of ports, or a specific SSID.

#### NEW QUESTION # 41

When FortiNAC-F is managing VPN clients connecting through FortiGate, why must the clients run a FortiNAC-F agent?

- **A. To collect the client IP address and MAC address**
- B. To validate the endpoint policy compliance
- C. To transparently update The client IP address upon successful authentication
- D. To collect user authentication details

**Answer: A**

Explanation:

When FortiNAC-F manages VPN clients through a FortiGate, the agent plays a fundamental role in device identification that standard network protocols cannot provide on their own. In a standard VPN connection, the FortiGate establishes a Layer 3 tunnel and assigns a virtual IP address to the client. While the FortiGate sends a syslog message to FortiNAC-F containing the username and this assigned IP address, it typically does not provide the hardware (MAC) address of the remote endpoint's physical or virtual adapter.

FortiNAC-F relies on the MAC address as the primary unique identifier for all host records in its database. Without the MAC address, FortiNAC-F cannot correlate the incoming VPN session with an existing host record to apply specific policies or track the device's history. By running either a Persistent or Dissolvable Agent, the endpoint retrieves its own MAC address and communicates it directly to the FortiNAC-F service interface. This allows the "IP to MAC" mapping to occur.

Once FortiNAC-F has both the IP and the MAC, it can successfully identify the device, verify its status, and send the appropriate FSSO tags or group information back to the FortiGate to lift network restrictions.

#### NEW QUESTION # 42

Refer to the output below.

```
INFO yams.CampusManager - masterLoaderPID = 2754377, nessusLoaderPID = 2754516
INFO yams.CampusManager - sendToNetwork verb Start Processes standbyEnabled true inControl true controlServer true
INFO yams.CampusManager - Skip sending verb to 192.168.10.10 because local ip is 192.168.10.10
INFO yams.CampusManager - sendPacket() 192.168.10.10 verb Start Processes retval = null
[grpc-default-executor-3560] INFO yams.CampusManager - isCampusManagerCheckOK system true, in control true, final true
INFO yams.CampusManager - sendPacket() 192.168.10.110 verb Start Processes retval = Running - Not In Control
```

Examine the communication between a primary FortiNAC-F (192.168.10.10) and a secondary FortiNAC-F (192.168.10.110) configured as a 1+1 HA pair.

What is the current state of the FortiNAC-F HA pair?

- A. The secondary server is running and in control.
- **B. The primary server is running and in control.**
- C. The database replication failed.
- D. Failover from the primary server to the secondary server is in progress.

**Answer: B**

Explanation:

The primary server (192.168.10.10) reports inControl true, while the secondary server (192.168.10.110) is Running - Not In Control, indicating the primary is active and controlling the HA pair.

### NEW QUESTION # 43

Refer to the exhibit.

#### Network Access Policy configuration wizard

Create Network Access Policy

Name: Guests

Notes:

Configuration: Guest-VLAN

Enabled:

User/Host Profile: Guests

Conditions

Use Existing Clone

Name: Guests

Who/What:  Where

Attributes (Satisfy Any of the Following)

Where: Host Security Access Value: Guest

OR

User Security Access Value: Guest

RADIUS Attributes (Satisfy Any of the Following)

Groups: Any Any Of All Of None Of

Where:  Any

When: Always

Notes:

FORTINET

When configuring guest access using a network access policy, where would an administrator configure the Guest-VLAN value?

- A. In the Guest template
- **B. In the Model configuration**
- C. In the Guest portal configuration
- D. In the User/Host profile

**Answer: B**

Explanation:

The Guest-VLAN value is defined within the switch Model configuration, where VLAN mappings and enforcement actions are configured. The network access policy references this configuration to apply the appropriate VLAN when the policy conditions are met.

### NEW QUESTION # 44

Which two things must be done to allow FortiNAC to process incoming syslog messages from an unknown vendor? (Choose two.)

- **A. A security event parser must be created for the device.**
- **B. The device must be added as a log receiver.**
- C. The device sending the messages must be modeled in the Network Inventory view.
- D. The device must be added as a patch management server.

**Answer: A,B**

## NEW QUESTION # 45

.....

now our NSE5\_FNC\_AD-7.6 training materials have become the most popular NSE5\_FNC\_AD-7.6 practice materials in the international market. There are so many advantages of our study materials, and will show you some of them for your reference. First and foremost, our company has prepared NSE5\_FNC\_AD-7.6 free demo in this website for our customers. Second, it is convenient for you to read and make notes with our PDF version. So let our NSE5\_FNC\_AD-7.6 practice materials to be your learning partner in the course of preparing for the NSE5\_FNC\_AD-7.6 exam, especially the PDF version is really a wise choice for you.
