Keep making progress is a very good thing for all people. If you try your best to improve yourself continuously, you will that you will harvest a lot, including money, happiness and a good job and so on. The Cloud-Digital-Leader preparation exam from our company will help you keep making progress. Choosing our Cloud-Digital-Leader Study Material, you will find that it will be very easy for you to overcome your shortcomings and become a persistent person. Just come and buy our Cloud-Digital-Leader learning guide!

Our Cloud-Digital-Leader exam questions are perfect, unique and the simplest for all exam candidates for varying academic backgrounds. This is the reason that our Cloud-Digital-Leader study guide assures you of a guaranteed success in the exam. The second you download our Cloud-Digital-Leader learning braindumps, then you will find that they are easy to be understood and enjoyable to practice with them. And there are three versions of the Cloud-Digital-Leader preparation engine for you to choose: the PDF, Software and APP online.

## Google Cloud-Digital-Leader Reliable Exam Cram, Cloud-Digital-Leader Pass Test Guide

Prep4sures is a website to meet the needs of many customers. Some people who used our simulation test software to pass the IT certification exam to become a Prep4sures repeat customers. Prep4sures can provide the leading Google training techniques to help you pass Google Certification Cloud-Digital-Leader Exam.

Google Cloud Digital Leader Certification Exam is a comprehensive exam that covers a broad range of topics. It is designed to test your knowledge and skills in various areas, including cloud computing, digital transformation, leadership, and Google Cloud technologies. You will need to have a good understanding of these areas to pass the exam.

## Google Cloud Digital Leader Sample Questions (Q403-Q408):

### NEW QUESTION # 403

The Border Security Agency has hired your software services firm to build an application for them that will collect information about visas stamped on passports. You are given stamped images. You have to find out which country issued the visa and the period of validity. Pull out this data and put it into a database. Which of these applications would be suitable for that?

- A. Use TensorFlow - write code that will identify the type of visa and the bounding text blocks. Copy the data and then store it.
- B. Use Cloud Vision API - write code to identify the text blocks, copy the data, and store it**
- C. Use AutoML - upload other images of visas and run the model creation process which will automatically identify the visas
- D. Use Data Labeling service - outsource the work of marking and extracting the information to others.

**Answer: B**

Explanation:

Explanation

Cloud Vision API allows you to programmatically identify images, text, etc. in the document. This would be the best option.

#### **NEW QUESTION # 404**

All Google Cloud Platform services are associated with a project that is used to provide what functions?

- A. None of the Above
- B. Manage DNS Services
- **C. Enable Services and APIs**
- D. Manage Container Deployments

**Answer: C**

Explanation:

Enable Services and APIs

#### **NEW QUESTION # 405**

"With cloud messaging you can Customize and deliver messages accordingly to the predetermined time in the user's local time zone."

Comment on the above statement.

- A. This statement is undefined.
- B. The above statement is partially true.
- **C. The above statement is completely true.**
- D. The above statement is completely false.

**Answer: C**

Explanation:

Firebase Cloud Messaging:

Firebase Cloud Messaging (FCM) is a cross-platform messaging solution that lets you reliably send messages at no cost.

Using FCM, you can notify a client app that new email or other data is available to sync. You can send notification messages to drive user re-engagement and retention. For use cases such as instant messaging, a message can transfer a payload of up to 4000 bytes to a client app.

Key capabilities of Firebase Cloud Messaging:

Send notification messages or data messages: Send notification messages that are displayed to your user. Or send data messages and determine completely what happens in your application code.

Versatile message targeting: Distribute messages to your client app in any of 3 ways-to single devices, to groups of devices, or to devices subscribed to topics.

Send messages from client apps: Send acknowledgments, chats, and other messages from devices back to your server over FCM's reliable and battery-efficient connection channel.

#### **NEW QUESTION # 406**

An organization is developing a new container-based application. They do not know how popular the application will be when launched and they do not want to pay for idle infrastructure resources. Which benefit of serverless computing will address this concern?

- A. Built-in security
- B. Reduced development costs
- **C. Scalability**
- D. Disaster recovery

**Answer: C**

Explanation:

Serverless computing offers automatic scaling, which means it dynamically adjusts the computational resources based on the demand for the application. This benefit is crucial when the popularity of the application is uncertain. The organization only pays for the actual compute resources used, rather than maintaining and paying for idle infrastructure.

Option C: Scalability is correct because serverless computing automatically scales up or down based on demand, ensuring that the organization does not incur costs for idle resources.

### NEW QUESTION # 407

Your organization runs many workloads in different Google Cloud projects, each linked to the same billing account. Each project's workload costs can vary from month to month, but the overall combined cost of all projects is relatively stable. Your organization needs to optimize its cost.

What should your organization do?

- A. Move all workloads from all different projects into one single consolidated project
- B. Create a billing account per project, and link each project to a different billing account
- C. Purchase a commitment per project for each project's usual minimum
- **D. Turn on committed use discount sharing, and create a commitment for the combined usage**

**Answer: D**

Explanation:

Turn on committed use discount sharing, and create a commitment for the combined usage. Sharing your committed use discounts across all your projects reduces the overhead of managing discounts on a per-project basis, and maximizes your savings by pooling all your discounts across your projects' resource usage. If you have multiple projects that share the same Cloud Billing account, you can enable committed use discount sharing so all of your projects within that Cloud Billing account share all of your committed use discount contracts. Your sustained use discounts are also pooled at the same time. That is, sustained use discounts are calculated using the total resources across these projects, rather than just the resources within a single project.
