1Z0-1133-24 Exam Questions and Answers Are of High Quality - DumpsValid

After you purchase our 1Z0-1133-24 exam guide is you can download the test bank you have bought immediately. You only need 20-30 hours to learn and prepare for the exam, because it is enough for you to grasp all content of our study materials, and the passing rate is very high and about 98%-100%. Our laTest 1Z0-1133-24 Quiz torrent provides 3 versions and you can choose the most suitable one for you to learn. All in all, there are many merits of our 1Z0-1133-24 quiz prep.

Oracle Cloud EPM Data Integration 2024 Implementation Professional Sample Questions (Q169-Q174):

NEW QUESTION # 169

Which of the following actions must be taken to enable drill-through to a source system in Oracle Cloud EPM?

- A. Set up custom financial reporting dashboards
- B. Set up manual validation rules
- C. Configure data category mappings
- **D. Define the drill-through URL for the source system**

Answer: D

Explanation:

Defining the drill-through URL for the source system is necessary to enable users to navigate from Oracle Cloud EPM to the detailed transaction data in the source system

NEW QUESTION # 170

Which of the following is a best practice for optimizing data integration jobs in Oracle Cloud EPM?

- A. Disabling validation for each data load
- B. Adding additional transformation steps to the process
- C. Running the jobs during off-peak hours to reduce resource contention
- D. Increasing the number of users accessing the system

Answer: C

Explanation:

Running data integration jobs during off-peak hours helps reduce resource contention, improving performance by allowing the job to use more system resources.

NEW QUESTION # 171

Which of the following connection types would be most appropriate for integrating real-time data from a cloud-based third-party financial system?

- A. FTP data transfer
- B. REST API connection
- C. SOAP web service
- D. JDBC connection

Answer: B

Explanation:

A REST API connection is best suited for integrating real-time data from a cloud-based third-party financial system into Oracle Cloud EPM.

NEW QUESTION # 172

What must be done to ensure that a data map moves data correctly in Oracle Cloud EPM?

- A. Automate the financial reporting process
- B. Assign user roles for data movement
- C. Validate the mappings between the source and target applications
- D. Schedule the data map to run during peak hours

Answer: C

Explanation:

To ensure that a data map moves data correctly, it is essential to validate the mappings between the source and target applications to confirm that data is transferred as intended.

NEW QUESTION # 173

What step must be performed first when configuring a new source connection in Oracle Cloud EPM?

- A. Scheduling data load frequency
- B. Running a validation test
- C. Mapping data fields
- D. Entering connection details like URL and credentials

Answer: D

Explanation:

The first step in configuring a source connection is entering the connection details such as the URL, username, and password required for authentication.
