認定する312-38最新対策問題試験-試験の準備方法-真実的な312-38模擬試験サンプル

312-38学習クイズの合格率は99%で、312-38実践ガイドは高いヒット率を高めます。当社の312-38テストトレントは専門家によって編集され、EC-COUNCIL提供される回答と質問は実際の試験に基づいています。312-38試験問題の内容は、理解して習得するのが簡単です。試験の準備を万全にするために、当社のソフトウェアは、実際の試験を刺激する機能と、速度の調整に役立つタイミング機能を提供します。312-38ガイド急流のこれらのメリットに基づいて、312-38試験に高い確率で合格できます。

EC-COUNCIL EC-Council Certified Network Defender CND 認定 312-38 試験問題 (Q717-Q722):

質問 # 717

Which among the following is used to limit the number of cmdlets or administrative privileges of administrator, user, or service accounts?

- A. Credential Guard
- B. Windows Security Identifier (SID)
- C. Just Enough Administration (EA)
- D. User Account Control (UAC)

正解: C

解説:

Just Enough Administration (JEA) is a security technology that enables delegated administration for anything managed by PowerShell. JEA helps in reducing the number of administrators on your machines by using virtual accounts or group-managed service accounts to perform privileged actions on behalf of regular users. It limits what users can do by specifying which cmdlets, functions, and external commands they can run. This ensures that users have just enough access to perform their jobs without having unnecessary administrative privileges, which aligns with the principle of least privilege.

質問 # 718

Bryson is the IT manager and sole IT employee working for a federal agency in California. The agency was just given a grant and was able to hire on 30 more employees for a new extended project. Because of this, Bryson has hired on two more IT employees to train up and work. Both of his new hires are straight out of college and do not have any practical IT experience. Bryson has spent the last two weeks teaching the new employees the basics of computers, networking, troubleshooting techniques etc. To see how these two new hires are doing, he asks them at what layer of the OSI model do Network Interface Cards (NIC) work on. What should the new employees answer?

- A. They should answer with the Presentation layer.
- B. They should tell Bryson that NICs perform on the Physical layer
- C. The new employees should say that NICs perform on the Network layer.
- D. NICs work on the Session layer of the OSI model.

正解: B

解説:

Network Interface Cards (NICs) operate at the Physical layer of the OSI model. This layer is responsible for the actual physical connection between devices. It transmits individual bits from one node to the next and is involved in the electrical, mechanical, procedural, and functional aspects of activating, maintaining, and deactivating physical connections. It's also where hardware like cables, switches, and NICs come into play.

References: The information provided aligns with the OSI model's definition and the role of the Physical layer as described in networking literature and resources such as GeeksforGeeks and freeCodeCamp articles on the OSI model¹².

質問 # 719

A war dialer is a tool that is used to scan thousands of telephone numbers to detect vulnerable modems. It provides an attacker unauthorized access to a computer. Which of the following tools can an attacker use to perform war dialing? Each correct answer represents a complete solution. Choose all that apply.

- A. ToneLoc
- B. Wingate
- C. THC-Scan
- D. NetStumbler

正解: A、C

解説:

THC-Scan and ToneLoc are tools used for war dialing. A war dialer is a tool that is used to scan thousands of telephone numbers to detect vulnerable modems. It provides the attacker unauthorized access to a computer.

Answer option D is incorrect. NetStumbler is a Windows-based tool that is used for the detection of wireless LANs using the IEEE 802.11a, 802.11b, and 802.11g standards. It detects wireless networks and marks their relative position with a GPS. It uses an 802.11 Probe Request that has been sent to the broadcast destination address.

Answer option B is incorrect. Wingate is a proxy server.

質問 # 720

Which of the following representatives in the incident response process are included in the incident response team? Each correct answer represents a complete solution. Choose all that apply.

- A. Lead investigator
- B. Human resources
- C. Legal representative
- D. Sales representative
- E. Technical representative
- F. Information security representative

正解: A、B、C、E、F

解説:

Incident response is a process that detects a problem, determines the cause of an issue, minimizes the damages, resolves the problem, and documents each step of process for future reference. To perform all these roles, an incident response team is needed.

The incident response team includes the following representatives who are involved in the incident response process:

Lead investigator: The lead investigator is the manager of an incident response team. He is always involved in the creation of an incident response plan. The duties of a lead investigator are as follows: Keep the management updated. Ensure that the incident response moves smoothly and efficiently. Interview and interrogate the suspects and witnesses.

Information security representative: The information security representative is a member of the incident response team who alerts the team about possible security safeguards that can impact their ability to respond to an incident.

Legal representative: The legal representative is a member of the incident response team who ensures that the process follows all the laws during the response to an incident.

Technical representative: Technical representative is a representative of the incident response team. More than one technician can be deployed to an incident. The duties of a technical representative are as follows:

Perform forensic backups of the systems that are involved in an incident. Provide more information about the configuration of the network or system.

Human resources: Human resources personnel ensure that the policies of the organization are enforced during the incident response process. They suspend access to a suspect if it is needed. Human resources personnel are closely related with the legal representatives and cover up the organization's legal responsibility.

質問 # 721

You are monitoring your network traffic with the Wireshark utility and noticed that your network is experiencing a large amount of traffic from certain region. You suspect a DoS incident on the network.

What will be your first reaction as a first responder?

- A. Communicate the incident
- B. Avoid Fear, Uncertainty and Doubt
- C. Make an initial assessment
- D. Disable Virus Protection

正解: C

解説:

As a first responder to a suspected DoS incident, the initial step is to make an assessment of the situation. This involves analyzing the network traffic using tools like Wireshark to confirm the nature of the traffic and determine if it is indeed a DoS attack. The assessment will help in understanding the scope and impact of the incident and is crucial for deciding the subsequent steps in the response process¹²³.

References: The importance of making an initial assessment is highlighted in various cybersecurity incident response guidelines and best practices, which recommend starting with an evaluation of the situation before proceeding with any other actions¹²³.

質問 # 722

.....

誰もが、彼または彼女が社会生活や彼のキャリアにおいて成功した男性または女性であることを望んでいます。したがって、特定の分野で実用的な能力と深い知識を高めることが証明されるため、EC-COUNCIL承認された重要な312-38証明書を所有することは彼らにとって非常に重要です。312-38認定に合格すると、彼らは成功することができます。もしあなたがその1人であるなら、312-38試験トレントを購入してください。
