

Try Amazon AWS-Solutions-Architect-Associate Exam Questions For Sure Success

AWS Certified Solutions Architect – Associate SAA-C03 Exam Questions and Answers

Exam Question 1

A company is migrating from an on-premises infrastructure to the AWS Cloud. One of the company's applications stores files on a Windows file server farm that uses Distributed File System Replication (DFS-R) to keep data in sync. A solutions architect needs to replace the file server farm.

Which service should the solutions architect use?

- A. Amazon EFS
- B. Amazon FSx
- C. Amazon S3
- D. AWS Storage Gateway

Correct Answer

B. Amazon FSx

Exam Question 2

A company has a legacy application that processes data in two parts. The second part of the process takes longer than the first, so the company has decided to rewrite the application as two microservices running on Amazon ECS that can scale independently.

How should a solutions architect integrate the microservices?

- A. Implement code in microservice 1 to send data to an Amazon S3 bucket. Use S3 event notifications to invoke microservice 2.
- B. Implement code in microservice 1 to publish data to an Amazon SNS topic. Implement code in microservice 2 to subscribe to this topic.
- C. Implement code in microservice 1 to send data to Amazon Kinesis Data Firehose. Implement code in microservice 2 to read from Kinesis Data Firehose.
- D. Implement code in microservice 1 to send data to an Amazon SQS queue. Implement code in microservice 2 to process messages from the queue.

Correct Answer

C. Implement code in microservice 1 to send data to Amazon Kinesis Data Firehose. Implement code in microservice 2 to read from Kinesis Data Firehose.

Exam Question 3

A company captures clickstream data from multiple websites and analyzes it using batch processing. The data is loaded nightly into Amazon Redshift and is consumed by business

As the old saying goes people change with the times. People must constantly update their stocks of knowledge and improve their practical ability. Passing the test AWS-Solutions-Architect-Associate certification can help you achieve that and buying our AWS-Solutions-Architect-Associate study materials can help you pass the test smoothly. Our system is strictly protect the clients' privacy and sets strict interception procedures to forestall the disclosure of the clients' private important information. Our system will automatically send the updates of the AWS-Solutions-Architect-Associate Study Materials to the clients as soon as the updates are available. So our system is wonderful.

The AWS SAA-C02 certification exam covers a wide range of topics, including AWS architecture, designing highly available systems, security and compliance, and deployment and management of AWS services. AWS-Solutions-Architect-Associate Exam is designed to test the candidate's ability to identify and define technical requirements for an AWS-based application, design and deploy scalable and highly available systems, and implement and manage AWS services. AWS-Solutions-Architect-Associate exam format includes multiple-choice and multiple-response questions, and the duration of the exam is 130 minutes.

The AWS-Solutions-Associate exam is a challenging but rewarding certification exam for IT professionals looking to validate their skills in designing and deploying scalable systems on AWS. With the right preparation and training, candidates can successfully pass the exam and earn the AWS Certified Solutions Architect - Associate (SAA-C02) certification, which can lead to new career opportunities and higher salaries.

New AWS-Solutions-Architect-Associate Study Plan & Certification AWS-Solutions-Architect-Associate Test Answers

Our Amazon AWS-Solutions-Architect-Associate exam guide has not equivocal content that may confuse exam candidates. All question points of our AWS Certified Solutions Architect - Associate (SAA-C03) AWS-Solutions-Architect-Associate study quiz can dispel your doubts clearly. Get our AWS Certified Solutions Architect - Associate (SAA-C03) AWS-Solutions-Architect-Associate Certification actual exam and just make sure that you fully understand it and study every single question in it by heart.

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q215-Q220):

NEW QUESTION # 215

An application server needs to be in a private subnet without access to the Internet. The solution must retrieve and upload Amazon S3 bucket.

How should a Solutions Architect design a solution to meet these requirements?

- A. Use a NAT Gateway
- B. Use a private Amazon S3 bucket
- **C. Use Amazon S3 VPC endpoints**
- D. Deploy a proxy server

Answer: C

NEW QUESTION # 216

A company's database is hosted on an Amazon Aurora MySQL DB cluster in the us-east-1 Region. The database is 4 TB in size. The company needs to expand its disaster recovery strategy to the us-west-2 Region. The company must have the ability to fail over to us-west-2 with a recovery time objective (RTO) of 15 minutes.

What should a solutions architect recommend to meet these requirements?

- A. Recreate the database as an Aurora global database with the primary DB cluster in us-east-1 and a secondary DB cluster in us-west-2. Configure an Amazon EventBridge (Amazon CloudWatch Events) rule that invokes an AWS Lambda function upon receipt of resource events. Configure the Lambda function to promote the DB cluster in us-west-2 when failure is detected.
- B. Create a Multi-Region Aurora MySQL DB cluster in us-east-1 and us-west-2. Use an Amazon Route 53 health check to monitor us-east-1 and fail over to us-west-2 upon failure.
- **C. Take a snapshot of the DB cluster in us-east-1. Configure an Amazon EventBridge (Amazon CloudWatch Events) rule that invokes an AWS Lambda function upon receipt of resource events. Configure the Lambda function to copy the snapshot to us-west-2 and restore the snapshot in us-west-2 when failure is detected.**
- D. Create an AWS CloudFormation script to create another Aurora MySQL DB cluster in us-west-2 in case of failure. Configure an Amazon EventBridge (Amazon CloudWatch Events) rule that invokes an AWS Lambda function upon receipt of resource events. Configure the Lambda function to deploy the AWS CloudFormation stack in us-west-2 when failure is detected.

Answer: C

NEW QUESTION # 217

You need to change some settings on Amazon Relational Database Service but you do not want the database to reboot immediately which you know might happen depending on the setting that you change.

Which of the following will cause an immediate DB instance reboot to occur?

- **A. You change storage type from standard to PIOPS, and Apply Immediately is set to true.**
- B. You change the backup retention period for a DB instance from 0 to a nonzero value or from a nonzero value to 0, and Apply Immediately is set to false.
- C. You change a static parameter in a DB parameter group.

- D. You change the DB instance class, and Apply Immediately is set to false.

Answer: A

Explanation:

A DB instance outage can occur when a DB instance is rebooted, when the DB instance is put into a state that prevents access to it, and when the database is restarted. A reboot can occur when you manually reboot your DB instance or when you change a DB instance setting that requires a reboot before it can take effect.

A DB instance reboot occurs immediately when one of the following occurs:

You change the backup retention period for a DB instance from 0 to a nonzero value or from a nonzero value to 0 and set Apply Immediately to true.

You change the DB instance class, and Apply Immediately is set to true.

You change storage type from standard to PIOPS, and Apply Immediately is set to true.

A DB instance reboot occurs during the maintenance window when one of the following occurs:

You change the backup retention period for a DB instance from 0 to a nonzero value or from a nonzero value to 0, and Apply Immediately is set to false.

You change the DB instance class, and Apply Immediately is set to false.

NEW QUESTION # 218

In Amazon EC2, what is the limit of Reserved Instances per Availability Zone each month?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

There are 20 Reserved Instances per Availability Zone in each month.
