## 100% Pass 2026 Latest Fortinet FCSS\_ADA\_AR-6.7: FCSS—Advanced Analytics 6.7 Architect Latest Demo

You must have thought about moving forward successfully in this competitive and fast-changing technological world. If you want to boost your career Fortinet FCSS\_ADA\_AR-6.7 certification is the most acclaimed and honorable certificate in the tech sector. But the confusion regarding the preparation and relevant Fortinet FCSS\_ADA\_AR-6.7 Practice Test questions must have emerged in your mind too.

## Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q47-Q52):

### NEW QUESTION # 47

In a customer network that includes a collector, which device performs device discoveries?

- A. Supervisor
- B. Agent
- C. Collector
- D. Worker

**Answer: A**

Explanation:

In a FortiSIEM deployment, device discovery is handled by the Supervisor, even when a Collector is present.

# The Supervisor initiates active scans using protocols such as SNMP, WMI, SSH, and API queries to discover devices in the network.

# Collectors do not perform discovery; they primarily collect and forward logs from designated devices to the Supervisor.

# Workers handle event processing, not discovery.

### NEW QUESTION # 48

Refer to the exhibit.

Event Receive Time	Event Type	Source IP	Destination IP	Reporting IP	User	Raw Event Log
08:49:01 02/02/2018	FortiGate-ssl-vpn-logon-failure	203.0.113.4	192.0.2.10	10.0.1.99	Admin	<189>date=2018-02-02...

08:55:09 02/02/2018	FortiGate-ssl-vpn-logon-failure	198.51.100.4 6	192.0.5.30	10.0.2.10	Tom	<189>date=2018-02-02...
08:52:59 02/02/2018	FortiGate-ssl-vpn-logon-failure	203.0.113.5	192.0.2.10	10.0.1.99	Admin	<189>date=2018-02-02...
08:52:59 02/02/2018	FortiGate-ssl-vpn-logon-failure	203.0.113.4	192.0.2.10	10.0.1.99	Sarah	<189>date=2018-02-02...
08:50:31 02/02/2018	FortiGate-ssl-vpn-logon-failure	203.0.113.50	192.0.2.10	10.2.2.55	Jan	<189>date=2018-02-02...

An administrator runs an analytic search for all FortiGate SSL VPN logon failures. The results are grouped by source IP, reporting IP, and user. The administrator wants to restrict the results to only those rows where the COUNT >= 3.

Which user would meet that condition?

- A. Jan
- **B. Admin**
- C. Sarah
- D. Tom

**Answer: B**

Explanation:

The administrator is running an analytic search that groups results by Source IP, Reporting IP, and User, and filters only those with a COUNT >= 3.

Looking at the data:

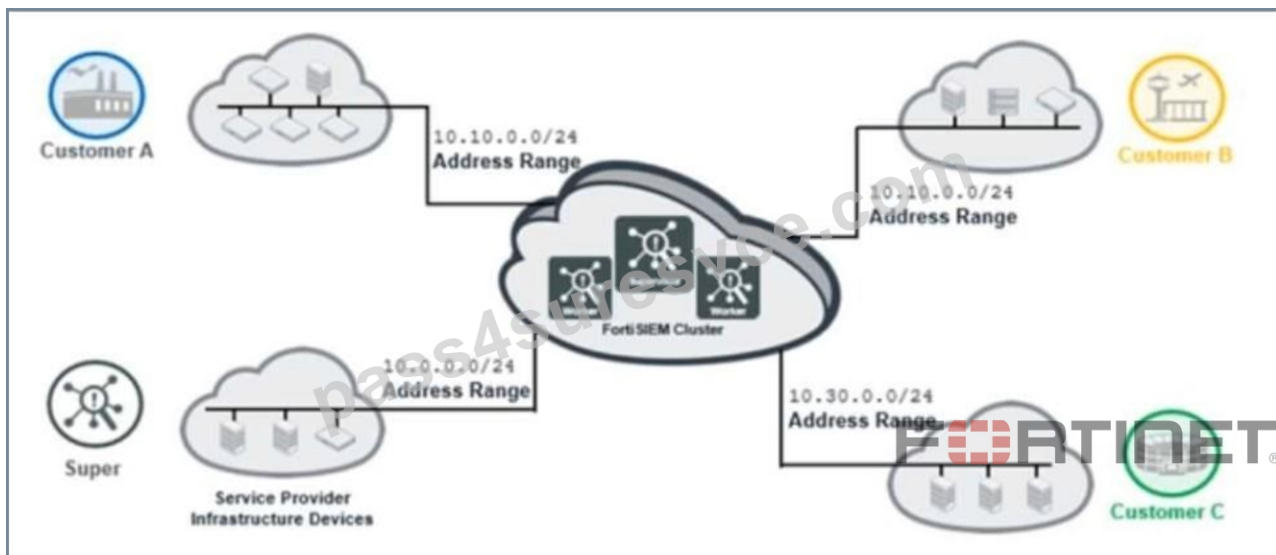

# Admin has three failed attempts from the same Source IP (203.0.113.4) and Reporting IP (10.0.1.99).

# Jan and Sarah appear only once or twice in the dataset.

# Tom has multiple entries, but they are from different Source IPs and Reporting IPs, meaning they are not counted as three under the same group.

### NEW QUESTION # 49

Refer to the exhibit.

The service provider deployed FortiSIEM without a collector and added three customers on the supervisor. What mistake did the administrator make?

- A. At least one collector must be deployed to collect logs from service provider infrastructure devices.
- B. The number of workers on the FortiSIEM cluster must match the number of customers added
- C. Customer A and customer B have overlapping IP addresses.
- D. Collectors must be deployed on all customer premises before they are added to organization on the supervisor.

**Answer: A**

**Explanation:**

The administrator deployed FortiSIEM without a collector, meaning there is no dedicated system collecting logs from service provider infrastructure devices. Without a collector, the FortiSIEM supervisor and workers must directly ingest logs, which is not ideal for a multi-tenant service provider setup. A collector is necessary to efficiently gather logs before forwarding them to the FortiSIEM cluster.

#### **NEW QUESTION # 50**

Which are key considerations when installing FortiSIEM agents on diverse operating systems?

- A. Ensuring ample storage space on the device.
- B. Validating the latest version of the web browser.
- C. Verifying proper communication between the agent and the collector.
- D. Checking system compatibility and prerequisites.

**Answer: C,D**

#### **NEW QUESTION # 51**

Refer to the exhibit.

```

<DataRequest id="122" type="Report" profileET="Profile ET: 122 - LOGON FAIL" numRows="10000">
  <Name>Failed Logon profile</Name>
  <CustomerScope groupByEachCustomer="true">
    <Include all="true"/>
    <Exclude/>
  </CustomerScope>
  <Description>This profile captures failed logons at the various servers and network devices.</Description>
  <SelectClause numEntries="All">
    <AttrList>
      reptDevName, reptDevIpAddr, COUNT(*), COUNT(DISTINCT user), COUNT(DISTINCT srcIpAddr)
    </AttrList>
  </SelectClause>
  <OrderByClause>
    <AttrList>
      COUNT(*) DESC
    </AttrList>
  </OrderByClause>
  <ReportInterval><window unit="Hourly" val="1"/></ReportInterval>
  <PatternClause window="3600">
    <SubPattern displayName="Filter 1" name="Filter 1">
      <SingleEvtConstr> eventType IN (Group@PH SYS EVENT HostLogonFailure) </SingleEvtConstr>
      <GroupByAttr>reptDevName, reptDevIpAddr</GroupByAttr>
    </SubPattern>
  </PatternClause>
</DataRequest>

```

This is an example of a baseline profile that is configured in the backend of FortiSIEM. Which two Group By attributes are configured for this profile? (Choose two.)

- A. Reporting Device
- B. Logon Failure
- C. Reporting IP
- D. Distinct User

**Answer: A,C**

Explanation:

From the provided XML configuration, we need to focus on the <GroupByAttr> section, which defines the attributes used for grouping.

In the SelectClause, the following attributes are listed:

reptDevName, reptDevAddr, COUNT(\*), COUNT(DISTINCT user), COUNT(DISTINCT srcIpAddr)

\*reptDevName represents the reporting device.

\*reptDevAddr represents the reporting IP.

\*COUNT(DISTINCT user) tracks unique users.

\*COUNT(DISTINCT srcIpAddr) tracks distinct source IPs.

In the GroupByAttr section:

<GroupByAttr>reptDevName, reptDevAddr</GroupByAttr>

This confirms that the grouping is performed by Reporting Device (reptDevName) and Reporting IP (reptDevAddr).

## NEW QUESTION # 52

.....

The learning material is open in three excellent formats; Fortinet FCSS\_ADA\_AR-6.7 dumps PDF, a desktop Fortinet FCSS\_ADA\_AR-6.7 dumps practice test, and a web-based Fortinet FCSS\_ADA\_AR-6.7 dumps practice test. Fortinet FCSS\_ADA\_AR-6.7 dumps is organized by experts while saving the furthest down-the-line plan to them for the Fortinet FCSS\_ADA\_AR-6.7 Exam. The sans bug plans have been given to you all to drift through the Fortinet certificate exam.
