ADN261 Study Tool Has a High Probability to Help You Pass the Exam - Prep4sureExam

Our experts are constantly looking for creative way to summarize our ADN261 actual exam in this tool. Their experiences are instrumental to offer help and improve your performance in the real exam. Being dedicated to these practice material, our strategy and passing useful points into our ADN261 Exam Materials with perfect arrangement and scientific comparison of messages, our ADN261 practice material can provide the exam candidates to practice with efficiency.

We take a much role in the high pass rate of our ADN261 study questions because according to the statistics from the feedback of all of our customers, under the guidance of our ADN261 exam material, the pass rate has reached as high as 95% to 100%, which means the highest pass rate in the field. So if you really want to pass the ADN261 Exam, it will be getting the certificate with no danger of anything going wrong, just fast and correct to buy our ADN261 learning guide.

P.S. Free 2026 Cisco 300-620 dumps are available on Google Drive shared by TestPassed: [https://drive.google.com/open?id=1yiGFoJrILBQP3v\\_CFjkq0qsJHPnDH7-O](https://drive.google.com/open?id=1yiGFoJrILBQP3v_CFjkq0qsJHPnDH7-O)

Our 300-620 exam brainsdumps will give you a feeling that they will really make you satisfied. I know that we don't say much better than letting you experience it yourself. We very much welcome you to download the trial version of our 300-620 practice engine. Our ability to provide users with free trial versions of our 300-620 Study Materials is enough to prove our sincerity and confidence. Just free download the 300-620 learning guide, you will love it for sure!

TestPassed is an authoritative study platform to provide our customers with different kinds of 300-620 exam material to learn, and help them pass the 300-620 exam as well as get their expected scores. There are three different versions of our 300-620 study preparation: PDF, Software and APP online. To avoid their loss for choosing the wrong 300-620 learning questions, we offer related three kinds of free demos for our customers to download before purchase. Just come and try!

## Latest Cisco 300-620 Practice Test - Proven Way to Crack Exam

Whether you are at home or out of home, you can study our 300-620 test torrent. You don't have to worry about time since you have other things to do, because under the guidance of our 300-620 study tool, you only need about 20 to 30 hours to prepare for

the exam. Sincere and Thoughtful Service Our goal is to increase customer's satisfaction and always put customers in the first place. As for us, the customer is God. We provide you with 24-hour online service for our 300-620 Study Tool. If you have any questions, please send us an e-mail. We will promptly provide feedback to you and we sincerely help you to solve the problem.

## Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q143-Q148):

### NEW QUESTION # 143

Where is the COOP database located?

- A. leaf
- B. endpoint
- C. spine
- D. APIC

**Answer: C**

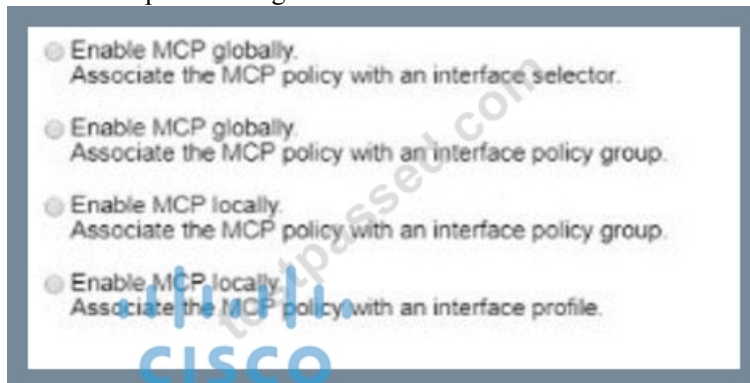

Explanation:

Section: ACI Fabric Infrastructure

Explanation/Reference: <https://www.cisco.com/c/en/us/solutions/collateral/data-center-virtualization/application-centric-infrastructure/white-paper-c11-739989.html>

### NEW QUESTION # 144

An engineer must connect a new host to port 101 on Leaf 101. A Cisco ACI fabric has an MCP policy configured but experience excessive Layer 2 loops. The engineer wants the Cisco ACI fabric to detect and prevent Layer 2 loops in the fabric. Which set of actions accomplishes these goals?

- A. Option B
- B. Option D
- C. Option A
- D. Option C

**Answer: A**

### NEW QUESTION # 145

A Cisco ACI environment consists of multiple silent hosts that are often relocated between leaf switches. When the host is relocated, the bridge domain takes more than a few seconds to relearn the host's new location. The requirement is to minimize the relocation impact and make the ACI fabric relearn the new location of the host faster. Which action must be taken to meet these requirements?

- A. Set Unicast Routing to Enabled.
- B. Set L2 Unknown Unicast to Hardware Proxy.
- C. Configure IP Data-Plane Learning to No.
- D. Configure ARP Flooding to Enabled.

**Answer: C**

### NEW QUESTION # 146

A network engineer is implementing a Layer 3 Out in the Cisco ACI fabric. The data center core switches must connect to a pair of leaf switches and exchange routes via a routing protocol. In addition, the implementation must meet these criteria;

- \* The external switch interface must use 802.1Q tagging.
- \* Access to the internet for the ACI fabric must be the L3Out.
- \* The L3Out must use a routing protocol that has rapid convergence time and low CPU usage.

Which configuration set meets these requirements?

- A. Implement the IS-IS Protocol policy with the selected Autonomous System number. Create the Routed Outside object and Node Profile and select IS-IS. Configure the Interface profile and select the Routed Interface with the appropriate interfaces. Create the External Network object.
- **B. Implement the EIGRP Protocol policy with the selected Autonomous System number. Create Routed Outside object and Node Profile and select EIGRP as the routing protocol. Build the Interface profile and select SVI and the appropriate VPC. Configure the External Network object with a network of 0.0.0.0/70.**
- C. Configure the BGP Protocol policy with the appropriate Autonomous System number. Configure an Interface policy and an External Bridged Domain. Create an External Bridged Network and use the configured VLAN pool. Build the Leaf profile and select the Routed sub-interface with the appropriate VLAN.
- D. Configure the OSPF Protocol policy with an area of 0.  
Set up the Routed External Network object and Node Profile and select OSPF. Create the Switch profile and select VPC with the appropriate interfaces. Create the default network and associate it with the Routed Outside object.

**Answer: B**

### NEW QUESTION # 147

An engineer wants to monitor all configuration changes, threshold crossing, and link-state transitions in a Cisco ACI fabric. Which action must be taken to receive the required messages?

- **A. Add Session Logs and Audit Logs to the monitor policy.**
- B. Add Faults and Events to the monitor policy.
- C. Include Events and Session Logs in the Syslog source policy.
- D. Include Audit Logs and Events in the Syslog source policy.

**Answer: A**

Explanation:

After searching, there is nothing called "syslog source policy" in ACI. Syslog source policy exists in UCS Central. The choices now are on "Monitoring Policy" that exists on A and C.

[https://community.cisco.com/legacyfs/online/attachments/blog/technote-aci-syslog\\_external-latest.pdf](https://community.cisco.com/legacyfs/online/attachments/blog/technote-aci-syslog_external-latest.pdf)

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/all/faults/guide/b\\_APIC\\_Faults\\_Errors/b\\_IFC\\_Faults\\_Errors\\_chapter\\_010.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/all/faults/guide/b_APIC_Faults_Errors/b_IFC_Faults_Errors_chapter_010.html)

#### \* Configuration Steps:

1. Access the APIC Admin GUI.
2. Select **FABRIC -> FABRIC POLICIES**.
3. In the Policies navigation panel on the left, select and expand the **MONITORING POLICIES**.
  - Expand **DEFAULT** and Select **"CALLHOME/SNMP/SYSLOG"**.
  - In the "Callhome/SNMP/Syslog" configuration panel, Select **SYSLOG** as the "Source Type" and Click on the "+" sign to **CREATE SYSLOG SOURCE**.
  - In the "Create SYSLOG Source" configuration panel, perform the following actions:
    - Enter **Source Name** (deadbeef-syslogSrc)
    - Change **MIN SEVERITY** to **INFORMATION**
    - Select the **"CHECK ALL"** button to include: **Audit logs, Events, Faults, and Session logs.**
    - Select the **SYSLOG Monitoring Destination Group** that was created in a previous task (deadbeef-syslogGrp)
    - Click **Submit**

## Event Objects and Logs

In the *Cisco APIC Management Information Model Reference*, the **event** package contains general event-related object classes, although some event types are found in other packages.

A loggable event is represented by an event record object, which is an immutable, stateless, and persistent MO created by the system to record the occurrence of a specific set of conditions at a given point in time. Although an event record MO is usually triggered by conditions in another MO, it is not contained by that MO but is contained in an event log.

Each new event record MO is added to one of three separate event logs, depending on the cause of the event:

- Audit log—Holds objects that are records of user-initiated events, such as logins and logouts (`aaa:SessionLR`) or configuration changes (`aaa:ModLR`) that are required to be auditable.
- Health score log—Holds records of changes in the health score (`health:Record`) of the system or components.
- Event log—Holds records of other system-generated events (`event:Record`) such as link state transitions.

Each log collects and retains event records. An event MO remains in the log until it is purged when the log reaches capacity and space is needed for new event records. The retention and purge behavior for each log is specified in a record retention policy (`event:ARetP`) object associated with each log.

## NEW QUESTION # 148

.....

TestPassed have the obligation to ensure your comfortable learning if you have spent money on our 300-620 study materials. We do not have hot lines. So you are advised to send your emails to our email address. In case you send it to others' email inbox, please check the address carefully before. The after-sales service of website can stand the test of practice. You needn't spend too much time to learn it. Our 300-620 Exam Guide is of high quality and if you use our product the possibility for you to pass the exam is very high.
