問題 #65

Below are details of five companies who operate a Total Quality Management System (TQM). For each company, select the system used and identify which area of the Balanced Scorecard this relates to.

Company 1: The focus of this company is to gather real-time data to assess the quality of products created during the manufacturing process. There are tight budgets and reworking any defects will affect the bottom line.

Company 2: This company is concerned about how their products are received. They have recently completed market research focused on their client's feelings. The objective is now to improve the product's look and performance to meet these expectations.

Company 3: The focus of this company is defining the customer requirements and translating this into a high-quality specification and effective operational process.

Company 4: Within this company there is a group of 6 employees who meet regularly with the objective of reducing issues that arise in the manufacturing of products.

Complete the table below by listing the TQM System used and the relevant Balanced Scorecard criteria for each company. Each response should only be used once: Quality Circle, Statistical Process Control, Kansei Engineering, Quality Function Deployment, Finance Criteria, Business Process Criteria, Learning and Growth Criteria, Customer Criteria.

Which of the following will you put into box 4?

- A. statistical process control
- B. quality circle
- C. kansei engineering
- D. quality function deployment

答案: B

解題說明:

The correct answers are as follows:

問題 #66

Below are details of 4 local manufacturing companies. For each company you must decide what the main objective is for the organisation and what layout their manufacturing plant has.

Company 1: This company creates large, delicate products which are hard to move. The main aim of the company is to stand out from competitors due to the superior level of materials used and by using the latest forms of technology to create the items.

Company 2: This company produces 72 different items and has designated zones within its premises for the creation of each item. The zones are organised based on the technology used and some products may be passed between different zones to be completed. The company creates many different items in response to changing customer demands, with many product lines only lasting a single season.

Company 3: Company 3 creates one product which flows along a single production line, with staff members adding to the product on four different occasions. The company must produce a high volume of this singular product in order to break even. Therefore, there is always a steady flow of items through the plant and it is important there is no stoppage in production.

Company 4: This company produces small batches of products, as and when they are ordered by customers. Due to uncertainty in demand, a high profit margin is added to the cost of each item. Teams in the factory are grouped into different areas depending on the technological process they are using.

Complete the table below by listing the objective criteria and plant layout for each company. Each response should only be used once: flexibility, speed, quality, cost, functional layout, cell layout, product layout, fixed-position layout

Which of the following will you put into box 4?

- A. speed
- B. cost
- C. quality
- D. flexibility

答案: B

解題說明:

The correct answers are as follows:

問題 #67

The Balanced Scorecard is a performance management approach which looks at measuring four areas of a business. Of those listed below, which is not an area traditionally measured within the Scorecard?

- A. business processes
- B. customer
- C. finance
- **D. environment**

答案： D

解題說明：

Environment is not traditionally measured- the other missing criteria is learning and development. This is an approach developed by Kaplan and Norton and there's often at least one question in the exam on this. I recommend learning this as it does also come up in other modules at Level 5 too. For a rounded view of the Balanced Scorecard framework check out this YouTube video:

問題 #68

Operations Management is concerned with the management of resources in the production of tangible goods. Is this TRUE?

- **A. no - operations management can also be concerned with the creation of intangible goods**
- B. yes- operations management ensures there are sufficient goods produced to meet customer demand
- C. no- operations management is concerned with ensuring the organisation is profitable
- D. yes- operations management is ensuring a company has the correct resources to create goods

答案： A

解題說明：

you can't touch or hold), also requires operations management. P.2

問題 #69

In Operations Management strategies, there are 10 strategic areas which fall into two categories: structure-related and infrastructure-related. Which of the following are structure-related? Select TWO

- A. quality
- B. performance measurements
- **C. supply network**
- D. new product development
- **E. capacity**

答案： C,E

解題說明：

Capacity and Supply Network are structure-related. The other three are Infrastructure-related. This is from p.35-36 of the study guide. Structure is about the 'hardware' of the business and physical attributes. Infra-structure is considered the software and are easier to change.
