exam covers a wide range of topics, including network architecture, wireless networking, routing, firewalling, and more. Successful candidates will be able to demonstrate a deep understanding of MikroTik networking concepts and be able to configure and troubleshoot MikroTik routers and wireless access points.

MikroTik Certified Network Associate Exam Sample Questions (Q190-Q195):

NEW QUESTION # 190

If you need to make sure that one computer in your Hot-Spot network can access the Internet without Hot-Spot authentication, which menu allows you to do this?

- A. Walled-garden
- B. Walled-garden IP
- C. Users
- **D. IP bindings**

Answer: D

Explanation:

In a MikroTik Hotspot environment, you can bypass authentication for specific users using the IP Bindings feature. This feature lets you mark a host as bypassed (authorized without login), blocked, or regular.

- * A. Users # Incorrect. This contains login credentials for regular authenticated users.
- * B. IP bindings # Correct. This allows specific devices (by IP or MAC) to bypass login requirements.
- * C. Walled-garden # Incorrect. This allows unauthenticated access to specific domains or URLs, not devices.
- * D. Walled-garden IP # Incorrect. Similar to option C, it controls destination IP access, not client exemption.

Extract from Official MTCNA Course Material - Hotspot:

"To allow a specific host to bypass authentication, use IP Bindings with the 'bypassed' type." Extract from Rene Meneses MTCNA Study Guide - Hotspot Section:

"The IP Bindings tab in the Hotspot menu is used to set specific IPs or MACs as bypassed. This exempts them from login." Extract from Terry Combs MTCNA Notes - Hotspot Bypass:

"Use IP Bindings for fixed clients (e.g., printers or servers) that should not be challenged by the Hotspot portal."

NEW QUESTION # 191

What is possible with Netinstall?

- **A. MikroTik RouterOS password reset with saving router's configuration**
