

1z0-1093-25 Exam Cram - 1z0-1093-25 Latest Dumps Sheet

BONUS!!! Download part of TestBraindump 1z0-1093-25 dumps for free: <https://drive.google.com/open?id=1pj5piPTKa40AYTuLtmEKoXOlmWFksYTP>

One of the most significant parts of your Oracle 1z0-1093-25 certification exam preparation is consistent practice. TestBraindump has make sure that you get sufficient 1z0-1093-25 exam practice by adding Oracle 1z0-1093-25 desktop practice exam software to your study course. This Oracle 1z0-1093-25 desktop-based practice exam software is compatible with all windows-based devices.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle’s NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
Topic 2	<ul style="list-style-type: none"> Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle’s Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
Topic 3	<ul style="list-style-type: none"> Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.

Topic 4	<ul style="list-style-type: none"> MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 5	<ul style="list-style-type: none"> Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.

Oracle 1z0-1093-25 Latest Dumps Sheet - 1z0-1093-25 Exam Reviews

If you do not have access to internet most of the time, if you need to go somewhere is in an offline state, but you want to learn for your 1z0-1093-25 exam. Don not worry, our products will help you solve your problem. We deeply believe that our latest 1z0-1093-25 Exam Torrent will be very useful for you to strength your ability, pass your exam and get your certification. Our study materials with high quality and high pass rate in order to help you get out of your harassment.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q36-Q41):

NEW QUESTION # 36

Before migrating to MySQL HeatWave, what is the MOST important action to take regarding user accounts and privileges?

- A. Reset all user passwords to default values.
- B. Migrate all user accounts to use external authentication (e.g., LDAP).
- C. Merge all user accounts into a single 'admin' account.
- D. Delete all user accounts except for the root account.
- E. Ensure all user accounts and privileges are compatible with MySQL 8.0, and recreate any incompatible accounts on the target instance.

Answer: E

Explanation:

B: Ensure all user accounts and privileges are compatible with MySQL 8.0:

* MySQL HeatWave is based on MySQL 8.0, so compatibility is crucial.

* User accounts and privileges must be updated to match the security and syntax requirements of MySQL 8.0.

* If any incompatibility is detected, the accounts should be recreated on the target HeatWave instance.

* Typical issues include changes in password hashing algorithms, privilege structure, and role management.

Why the other options are incorrect:

* A. Resetting passwords to default: Risky from a security perspective and unnecessary.

* C. Deleting user accounts except root: This drastically limits access and disrupts database operations.

* D. External authentication (LDAP): Not mandatory or relevant to compatibility with HeatWave.

* E. Merging accounts into a single 'admin': Violates best practices for user management and security.

NEW QUESTION # 37

Which of the following is a proactive strategy to avoid encountering table rate limits in Oracle NoSQL Database Cloud Service?

- A. Disabling data encryption to reduce the overhead of read/write operations.
- B. Carefully designing the table schema and indexes to optimize query performance and minimize the number of read/write operations required.
- C. Consolidating all data into a single large table to simplify management.

- D. Regularly increasing the table's storage capacity to accommodate future growth.

Answer: B

Explanation:

B: Optimizing schema and indexes:

- * Efficient schema design reduces the number of read/write operations.
- * Proper indexing reduces the need to scan large data volumes, minimizing the number of read capacity units (RCUs) consumed.
- * This proactive approach helps stay within the provisioned rate limits, avoiding throttling.

Why the other options are incorrect:

- * A. Increasing storage capacity: Does not address the rate of operations, only storage volume.
- * C. Disabling encryption: Unwise due to security risks and does not significantly impact rate limits.
- * D. Consolidating data into one table: Likely increases the rate of operations, worsening the problem.

NEW QUESTION # 38

Which statement accurately describes the function of the HeatWave service in relation to a standard MySQL database?

- **A. HeatWave provides an in-memory, massively parallel query accelerator to MySQL, improving analytical query performance.**
- B. HeatWave is a standalone database system that replaces MySQL, offering enhanced security features.
- C. HeatWave acts as a caching layer in front of MySQL, speeding up access to frequently accessed data.
- D. HeatWave is a clustering solution, where a single MySQL instance is split into multiple parts.
- E. HeatWave is a specialized version of MySQL designed solely for transactional workloads, optimized for high concurrency.

Answer: A

Explanation:

HeatWave as a Query Accelerator:

HeatWave enhances the MySQL Database Service by providing an in-memory, massively parallel query accelerator. It is specifically designed to speed up analytical (OLAP) queries, making them run significantly faster compared to using MySQL alone.

* The system stores data in a columnar format and processes it in memory, utilizing distributed, parallel processing to achieve high performance.

* Unlike traditional MySQL setups, HeatWave can execute complex analytical workloads efficiently.

Why the other options are incorrect:

- * A: HeatWave is not a standalone database but an extension of MySQL.
- * C: It is optimized for analytical workloads, not transactional.
- * D: It is more than just a caching layer; it actively processes queries.
- * E: HeatWave clusters do not split MySQL instances but enhance query processing.

NEW QUESTION # 39

The concept of 'schema-less' in the context of NoSQL databases primarily refers to what?

- A. Data is stored in a binary format, eliminating the need for any schema or data interpretation.
- B. All data stored within the database must conform to a single, universally defined schema for consistency.
- **C. The database automatically infers the schema from the data being inserted, without requiring any explicit schema definition beforehand.**
- D. Data is stored in a highly structured format, mirroring the tabular structure of relational databases with predefined columns and data types.

Answer: C

Explanation:

Schema-less in NoSQL:

This means you don't need to define a rigid, fixed structure before data insertion. Each record can have its own structure, allowing flexibility for evolving data models. This is useful for unstructured or semi-structured data.

Why the other options are incorrect:

- * B: This describes relational databases.
- * C: This describes the structured nature of SQL databases.
- * D: While binary formats may be used, schema-less refers to the logical, not physical, structure.

NEW QUESTION # 40

What is the primary purpose of installing and configuring the Oracle Management Agent when enabling Database Management Service for a cloud database on a Compute instance?

- A. To automate database patching and upgrades.
- B. To manage the underlying operating system of the Compute instance.
- C. To handle database backups and recovery operations.
- **D. To provide a secure communication channel between the Database Management Service and the database.**

Answer: D

Explanation:

A: Secure Communication Channel:

- * The Oracle Management Agent acts as a bridge between the Database Management Service and the database.
- * Enables secure data collection, monitoring, and performance analysis.
- * Uses encryption to protect data during transmission.
- * Facilitates monitoring, alerting, and management through OCI services.

Why the other options are incorrect:

- * B. Backup and recovery operations: These are typically handled by backup tools, not the management agent.
- * C. OS management: The agent does not manage the operating system itself.
- * D. Patching and upgrades: While it can assist, it is not specifically designed for patch management.

NEW QUESTION # 41

.....

Are you worried about your poor life now and again? Are you desired to gain a decent job in the near future? Do you dream of a better life? Do you want to own better treatment in the field? If your answer is yes, please prepare for the 1z0-1093-25 exam. It is known to us that preparing for the exam carefully and getting the related certification are very important for all people to achieve their dreams in the near future. It is a generally accepted fact that the 1z0-1093-25 Exam has attracted more and more attention and become widely acceptable in the past years.
