Salesforce Certified Experience Cloud Consultant certification exam is ideal for individuals who have experience working with Salesforce and have a deep understanding of the Experience Cloud platform. Salesforce Certified Experience Cloud Consultant certification exam covers a range of topics, including user experience design, community building, data modeling, and security.

## Salesforce Certified Experience Cloud Consultant Sample Questions (Q19-Q24):

### NEW QUESTION # 19

Northern Trail Outfitters (NTO) offers a new product that is different in North America, EMEA, and Asia Pacific regions, Pages

have been created and publish for this product. The site manager has applied criteria to ensure visibility for these product are applied as per the requirement for each region. NTO further wants to control the users who see a specific page of this product settings its visibility.

Which three visibility options available in Experience Cloud?

Choose 3 answers

- A. Default
- B. None
- C. Personal
- D. Visible
- E. Audience

**Answer: A,B,E**

Explanation:

Three visibility options available in Experience Cloud are Audience, None, and Default. Visibility options allow you to control who can see a page or a component on your Experience Cloud site. Audience is an option that allows you to display a page or a component only to users who belong to a specific audience. An audience is a group of users who share common attributes, such as profile, location, or language. None is an option that allows you to hide a page or a component from all users. Default is an option that allows you to display a page or a component to all users who have access to the site.

#### NEW QUESTION # 20

Universal Containers (UC) has hired UX designers to help improve brand recognition and has a new style guide it needs to implement to unify branding across all of its Experience sites.

What should UC do to accomplish this?

- A. Create a custom theme to apply to all Experience sites.
- B. Create a custom template to apply to all Experience sites.
- C. Reference a shared Bootstrap CSS file in all of the sites.
- D. Send the style guide to Experience managers to implement.

**Answer: D**

#### NEW QUESTION # 21

Get Cloudy Consulting wants to leverage Metadata API for migrating changes between environments.

What are the three key features of Metadata API?

Metadata API might require manual migration for changes that involve unsupported settings and features.

- A. Metadata API supports migrating all Communicates settings and features.
- B. Metadata API is ideal when multiple work streams are involved.
- C. Metadata API is ideal for when the changes are complex.
- D. Metadata API can be used programmatically as well as declaratively.

**Answer: B,C,D**

Explanation:

Three key features of Metadata API are A, B, and C. Metadata API is an API that allows you to retrieve, deploy, create, update, or delete customization information in your Salesforce org, such as custom objects, fields, tabs, or pages. Metadata API is ideal when multiple work streams are involved, because it allows you to manage changes across different environments and teams. Metadata API can be used programmatically as well as declaratively, because it supports both code-based tools and point-and-click tools for working with metadata. Metadata API is ideal for when the changes are complex, because it allows you to handle fine-grained customizations and dependencies.

#### NEW QUESTION # 22

Universal Containers has implemented Chat, but agents are complaining that they have to capture several pieces of information before being able to service the customer.

What should an administrator do to capture information upfront on the Experience site?

- A. Deploy a unique chat per topic.
- B. Create a flow for customers to fill out before initiating Chat.
- C. Enable Chat for only authenticated users and pass the user's information on hidden fields.
- **D. Create a pre-chat form to fill out before initiating Chat.**

**Answer: D**

Explanation:

To capture information upfront on the Experience site, the administrator should create a pre-chat form to fill out before initiating Chat. A pre-chat form is a form that appears before a chat session starts and asks customers to provide some information, such as their name, email, phone number, or issue description. This helps agents to identify the customer and prepare for the chat session.

### NEW QUESTION # 23

Northern Trail Outfitters (NTO) is punning to create an HR help desk for Its employees. IT recommends using Experience Cloud to build the HR help desk app Whet should NTO consider when building the MR help desk app?

- **A. The HR help desk app can centralize knowledge and self service in to one experience site.**
- B. MR user profile is only available in Employee Cloud with Employee permission set license.
- C. The HR help desk app can centralize Chatter from all related active Experience Cloud sites in the org.
- D. HR user profits is only available in Enterprise and Performance Editions with HR permission sat license.

**Answer: A**

Explanation:

One thing that NTO should consider when building the HR help desk app is that the app can centralize knowledge and self service in to one experience site. This means that NTO can use Experience Cloud to create a site that provides access to Knowledge articles, Cases, Chatter, and other features that can help its employees find answers, request assistance, and collaborate with HR staff. NTO can use Employee Cloud, which is a solution that allows NTO to create employee experience sites using Experience Cloud.
