Excellent SAP Study C_S4CPB_2508 Dumps Are Leading Materials & Effective New C_S4CPB_2508 Exam Duration

If you care about your certification C_S4CPB_2508 exams, our C_S4CPB_2508 test prep materials will be your best select. We provide free demo of our C_S4CPB_2508 training materials for your downloading before purchasing complete our products. Demo questions are the part of the complete C_S4CPB_2508 test prep and you can see our high quality from that. After payment you can receive our complete C_S4CPB_2508 Exam Guide soon in about 5 to 10 minutes. And we offer you free updates for C_S4CPB_2508 learning guide for one year. Stop to hesitate, just go and choose our C_S4CPB_2508 exam questions!

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Maintain technical catalogs
- **B. Maintain restrictions**
- **C. Assign business catalogs to a business role**
- D. Assign PFCG profiles to a business role

Answer: B,C

Explanation:

You can complete the following activities in the Maintain Business Roles SAP Fiori app:

* Assign business catalogs to a business role. Business catalogs are collections of SAP Fiori apps that are relevant for a specific business area or task. You can add one or more business catalogs to a business role to grant access to the corresponding apps¹.

* Maintain restrictions. Restrictions are rules that limit the access of a business role to certain data or functions based on predefined criteria, such as company code, plant, or sales organization. You can maintain restrictions for a business role in a new UI that provides an overview of the restriction types and values².

You cannot complete the following activities in the Maintain Business Roles SAP Fiori app:

* Maintain technical catalogs. Technical catalogs are collections of SAP Fiori apps that are grouped by technical criteria, such as application component or OData service. Technical catalogs are not assigned to business roles, but rather to business catalogs as dependencies³.

* Assign PFCG profiles to a business role. PFCG profiles are authorization profiles that are created and maintained in the Profile Generator (PFCG) transaction in the SAP GUI. PFCG profiles are not assigned to business roles, but rather to business users as part of the user role assignment⁴. References

NEW QUESTION # 17

What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. Business Driven Configuration Questionnaire
- **B. Digital Discovery Assessment**
- C. SAP Signavio Journey Modeler
- D. SAP Signavio Process Collaboration Hub

Answer: B

NEW QUESTION # 18

What provides a foundation for the SAP Cloud ERP where integrations and extensions live?

- A. SAP Discovery Center
- **B. SAP Business Technology Platform**
- C. SAP ABAP Environment
- D. SAP Business Accelerator Hub

Answer: B

Explanation:

SAP Business Technology Platform (BTP) provides a foundation for the SAP Cloud ERP where integrations and extensions live. SAP BTP is a cloud-based platform that offers a range of services and capabilities to extend, integrate, and orchestrate SAP and non-SAP applications. SAP BTP enables customers and partners to build extensions that are decoupled from the core SAP S/4HANA Cloud system, ensuring lifecycle stability and avoiding modification of SAP code. SAP BTP also leverages the huge library of free integration packages and extension templates available on the SAP Business Accelerator Hub, which can be consumed and customized according to the customer's needs. All services are listed in the SAP Discovery Center, where customers can explore, try, and buy SAP BTP services.

SAP ABAP Environment, SAP Discovery Center, and SAP Business Accelerator Hub are not the foundation for the SAP Cloud ERP, but rather components or tools that are related to SAP BTP. SAP ABAP Environment is a service on SAP BTP that allows customers and partners to develop and run ABAP code in the cloud. SAP Discovery Center is a portal that showcases the available

services and solutions on SAP BTP and guides customers through the end-to-end journey of discovering, trying, buying, and implementing them.

SAP Business Accelerator Hub is a repository of ready-to-use integration packages and extension templates that can be deployed on SAP BTP to accelerate the implementation of SAP S/4HANA Cloud. NEW QUESTION # 19

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. System consistency checks
- **B. The selected deployment target**
- C. Added partner content
- **D. The selected scope**

Answer: B,D

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 20

Where is the initial list of known integrations documented?

- **A. In the Digital Discovery Assessment**
- B. In the Fit-to-Standard Workshops
- C. In SAP Cloud ALM
- D. In the Business Driven Configuration Questionnaire

Answer: A
