If you follow the steps of our Web-Development-Applications Learning Materials, you can easily and happily learn and ultimately succeed in the ocean of learning.

WGU Web Development Applications Sample Questions (Q85-Q90):

NEW QUESTION # 85

Which option changes the content of the first line to a valid CSS comment?

- A. // this is a comment
- B. /* this is a comment */
- C. <!-- this is a comment -->
- D. <! 'this is a comment'>

Answer: B

Explanation:

In CSS, comments must begin with /* and end with */.

"CSS comments are placed inside /* and */. These comments can span multiple lines and are ignored by the browser." HTML-style comments using <!-- --> and JavaScript-style comments using // are not valid in CSS and may cause parsing errors.

9

Given the following CSS code:

```
.title {  
  colqr : white;  
}
```

Which HTML element is affected?

Q <div id="title"X/div>

Q <titleX/title>

Q <div>title</div>

0 <div class="title"X/div>

NEW QUESTION # 86

What is a characteristic of JavaScript code?

- A. It remains hidden from the user.
- B. It must be compiled to work.
- C. It implements across browsers.
- D. It runs inside a web browser

Answer: D

Explanation:

JavaScript is a scripting language primarily used for creating and controlling dynamic website content. Here are some characteristics:

* Runs Inside a Web Browser: JavaScript code is executed in the web browser, making it possible to create interactive and dynamic web pages.

* Cross-Browser Compatibility: JavaScript is designed to be compatible across different web browsers.

* Interpreted Language: JavaScript is interpreted, meaning it does not need to be compiled before execution.

* Accessible to Users: JavaScript code is not hidden from the user; it can be viewed in the browser's developer tools.

:

NEW QUESTION # 87

A web designer creates the following HTML code:

Which CSS selector applies only to the first line?

- A. .Welcome
- B. #Header
- C. **#Welcome**
- D. .header

Answer: C

Explanation:

To apply CSS only to the first line of a particular HTML element, the ID selector #Welcome should be used as per the given HTML structure.

* CSS ID Selector: The ID selector is used to style the element with a specific id.

* Usage Example:

```
#Welcome {  
color: red;  
}
```

In this example, the #Welcome selector will apply the red color style only to the element with id="Welcome".

NEW QUESTION # 88

Which framework assists designers with adaptive page layout?

- **A. Bootstrap**
- B. Modernizr
- C. React
- D. Knockout

Answer: A

Explanation:

> "Bootstrap is a front-end framework that provides a responsive grid system and prebuilt components for adaptive and responsive web design. It allows layouts to adjust to screen size dynamically."

>

> React and Knockout are JavaScript libraries for UI rendering and data-binding. Modernizr is a feature detection library, not a layout framework.

NEW QUESTION # 89

Given the following code:

Var a = "true";

What is the data type of d?

- **A. String**
- B. Object
- C. Boolean
- D. Undefined

Answer: A

Explanation:

The data type of the variable `a` is determined by the value assigned to it. In JavaScript, if a value is enclosed in double or single quotes, it is treated as a string.

* Variable Assignment:

* Given the code:

```
var a = "true";
```

* The value "true" is enclosed in double quotes, making it a string.

* Explanation:

* Option A: Boolean is incorrect because the value "true" is a string, not a boolean.

* Option B: String is correct because the value is enclosed in double quotes.

* Option C: Object is incorrect because the value is a primitive string.

* Option D: Undefined is incorrect because the variable `a` is assigned a value.
