Languages: English, Japanese, Chinese (Simplified), Korean, French, German, Spanish, Portuguese (Brazil), Russian, Arabic (Saudi Arabia), Chinese (Traditional), Italian

Retirement date: none

This exam measures your ability to accomplish the following technical tasks: mitigate threats using Microsoft 365 Defender; mitigate threats using Azure Defender; and mitigate threats using Azure Sentinel.

To prepare for the Microsoft SC-200 Certification Exam, candidates must have a good understanding of cybersecurity fundamentals, including threat intelligence, risk management, and security operations. They must also have experience with Microsoft security technologies and tools. Microsoft offers various training options, including instructor-led training, online courses, and self-paced learning modules, to help candidates prepare for the exam.

Microsoft Security Operations Analyst Sample Questions (Q331-Q336):

NEW QUESTION # 331
You have a Microsoft 365 E5 subscription that uses Microsoft 365 Defender for Endpoint.
You need to ensure that you can initiate remote shell connections to Windows servers by using the Microsoft
365 Defender portal.
What should you configure? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation

NEW QUESTION # 332
You deploy Azure Sentinel.
You need to implement connectors in Azure Sentinel to monitor Microsoft Teams and Linux virtual machines in Azure. The solution must minimize administrative effort.
Which data connector type should you use for each workload? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

https://docs.microsoft.com/en-us/azure/sentinel/connect-syslog

NEW QUESTION # 333
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You use Azure Security Center.
You receive a security alert in Security Center.
You need to view recommendations to resolve the alert in Security Center.
Solution: From Security alerts, you select the alert, select Take Action, and then expand the Prevent future attacks section.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:
In Azure Security Center (now part of Microsoft Defender for Cloud), when you receive a security alert, you can investigate it to understand the cause, impact, and resolution recommendations.
The workflow described in the question aligns precisely with Microsoft's documented process for investigating alerts.
From the Security alerts page:
* You select the specific alert to open the alert details pane.
* Choose Take Action to view remediation options and recommended next steps.
* Expand the Prevent future attacks section - this section provides recommendations and hardening guidance directly related to the alert to help prevent similar issues from occurring again.
This section is specifically mentioned in Microsoft Defender for Cloud documentation:
"In the alert details page, select Take Action to view the remediation steps. Under Prevent future attacks, Defender for Cloud lists relevant security recommendations and actions that can mitigate or prevent the threat." Therefore, this solution meets the goal because selecting Take Action and expanding Prevent future attacks directly exposes the recommended remediation steps associated with that alert.

NEW QUESTION # 334
Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with Azure AD.
You have a Microsoft 365 E5 subscription that uses Microsoft Defender 365.
You need to identify all the interactive authentication attempts by the users in the finance department of your company.
How should you complete the KQL query? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 335
You have a Microsoft subscription that has Microsoft Defender for Cloud enabled You configure the Azure logic apps shown in the following table.

You need to configure an automatic action that will run if a Suspicious process executed alert is triggered. The solution must minimize administrative effort.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
1 - Configure teh Suppress similar alerts settings.
2 - Configure the Mitigate the threat settings.
3 - Select Take action.

NEW QUESTION # 336
......
