M2 Training Courses | Valid M2 Test Sims

By earning the International Code Council M2 certification, you may stop worrying about the bad things that might happen and instead concentrate on the advantages of making this decision and developing new skills that will increase your chances of landing your ideal job. You should start the preparations for the International Code Council M2 Certification Exam to improve your knowledge.

International Code Council Commercial Mechanical Inspector Sample Questions (Q24-Q29):

NEW QUESTION # 24

The minimum dimension for rectangular air ducts used to supply combustion air for natural draft systems is _____ inches.

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

The IMC combustion-air provisions require openings used for combustion air to have a minimum cross-sectional dimension of 3 inches. Where ducts are used, they must be of the same cross-sectional area as the openings to which they connect. That makes 3 inches the correct answer, so Option B is correct.

NEW QUESTION # 25

Supports for hazardous exhaust duct shall be constructed of:

- A. fibrous material.
- B. noncombustible material.
- C. material complying with UL 181.
- D. plastic.

Answer: B

NEW QUESTION # 26

Unless listed for a greater or smaller dimension, mechanical draft venting systems shall terminate a minimum of _____ feet below an operable window.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

For mechanical draft venting systems, unless the appliance is listed for a different clearance, the vent terminal must be located not less than 4 feet below, 4 feet horizontally from, or 1 foot above any door, operable window, or gravity air inlet into a building. Therefore, the required minimum distance below an operable window is 4 feet, so Option B is correct.

NEW QUESTION # 27

The exhaust outlet for a clothes dryer is required to be equipped with:

- A. an automatically controlled volume damper.
- B. a corrosion-resistant screen of 1/4-inch mesh.
- C. a backdraft damper.
- D. a temperature limit control device that will automatically shut off the system at a temperature of 250°F.

Answer: C

Explanation:

The IMC requires clothes dryer exhaust ducts to terminate outside the building and to be equipped with a backdraft damper at the terminal. The code also prohibits screens at dryer terminations because lint can accumulate and obstruct flow. That makes Option A correct and eliminates Option C. The other two choices describe controls not required by the dryer exhaust termination rule.

NEW QUESTION # 28

ERV systems shall not be installed in which of the following except:

- A. exhaust systems emitting corrosive materials.
- B. systems utilizing coil-type exchangers.
- C. common exhaust systems for clothes dryers.
- D. equipment designed to assist in the evacuation of occupants.

Answer: B

Explanation:

The IMC prohibits energy recovery ventilation systems in several applications, including hazardous exhaust systems, smoke control systems, commercial kitchen exhaust systems, and clothes dryer exhaust systems. Equipment intended to assist with occupant evacuation falls under smoke-control/life-safety type applications and is not an allowed ERV use. By contrast, systems utilizing coil-type exchangers are the exception among the listed choices because they are not one of the prohibited applications in this question.

Therefore, Option A is correct.

NEW QUESTION # 29

.....

The M2 study questions included in the different versions of the PDF, Software and APP online which are all complete and cover up the entire syllabus of the exam. And every detail of these three versions are perfect for you to practice and prepare for the exam. If you want to have a try before you pay for the M2 Exam Braindumps, you can free download the demos which contain a small part of questions from the M2 practice materials. And you can test the functions as well.
