Related DevOps-Foundation Certifications, Latest DevOps-Foundation Mock Exam
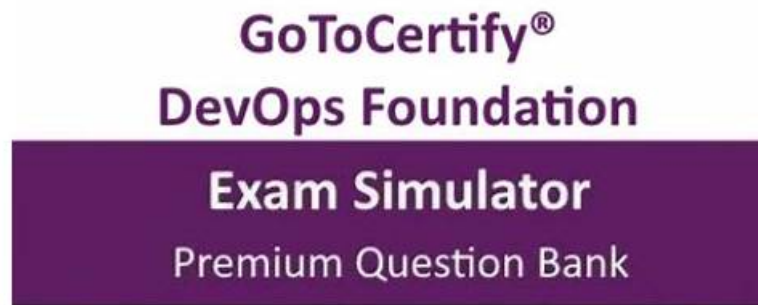

We are never complacent about our achievements, so all content are strictly researched by proficient experts who absolutely in compliance with syllabus of this exam. Accompanied by tremendous and popular compliments around the world, to make your feel more comprehensible about the DevOps-Foundation practice materials, all necessary questions of knowledge concerned with the exam are included into our DevOps-Foundation practice materials. They are conductive to your future as a fairly reasonable investment.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
Topic 2	• Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 3	• Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.

Topic 4	• Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.

Pass Guaranteed Quiz DevOps-Foundation - Perfect Related PeopleCert DevOps Foundationv3.6Exam Certifications

With three versions of products, our DevOps-Foundation learning questions can satisfy different taste and preference of customers with different use: PDF & Software & APP versions. Without ambiguous points of questions make you confused, our DevOps-Foundation practice materials can convey the essence of the content suitable for your exam. With the most scientific content and professional materials DevOps-Foundation Preparation materials are indispensable helps for your success. Such a valuable acquisition priced reasonably is offered before your eyes, you can feel assured to take good advantage of.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q67-Q72):

NEW QUESTION # 67
What is NOT a type of IT work?

- A. Planned work
- B. Manufacturing
- C. Business projects
- D. Unplanned work

Answer: B

Explanation:
Manufacturingisnota type of IT work in DevOps.
DevOps classifies IT work as:
* Business projects:New value-creating work.
* Planned work:Routine, repeatable tasks (maintenance, upgrades).
* Unplanned work:Incidents, emergencies, support.
Extract-style reference:
"IT work includes business projects, planned work, and unplanned work. Manufacturing is an analogy for flow, but not a category of IT work itself."
-The Phoenix Project
PeopleCert DevOps Foundation v3.6:Recognizes these three categories to manage and improve IT workloads.

NEW QUESTION # 68
Several members of an IT service provider's development and operations teams recently attended a local DevOps meetup. They came away very excited about applying a DevOps approach to their organization.
Which of the following would be a critical success factor for their DevOps program?

- A. Reorganization of the IT organization into DevOps Teams
- B. Additional budget for new automation
- C. The design and development of a deployment pipeline for continuous integration and continuous delivery
- D. Management commitment to culture change

Answer: D

Explanation:
Successful DevOps transformation hinges onmanagement commitment to cultural change. This includes leadership support for breaking down silos, encouraging collaboration, fostering psychological safety, and aligning incentives.

While budget, reorganization, and deployment pipelines are important enablers, they cannot deliver sustainable transformation without cultural alignment. Leaders must model desired behaviors, remove systemic blockers, and reinforce the new ways of working.

Without cultural change, DevOps becomes a tooling initiative rather than a true organizational shift.

NEW QUESTION # 69

What does the Theory of Constraints recognise?

- A. Every process has at least one constraint that affects its ability to meet its goal
- B. Improving constraints is the fastest way to improve the entire system
- C. All of the Above
- D. A process will only meet the capacity of its constraints

Answer: C

Explanation:

TheTheory of Constraints (ToC), as referenced in PeopleCert DevOps Foundation, states:

* A: Every system has at least one limiting factor (constraint) that determines overall performance.

* B: System throughput is limited by the capacity of the constraint; improving non-constraints has minimal impact.

* C: Focusing improvement efforts on the constraint is the most effective way to improve the performance of the entire system.

In DevOps, constraints may appear in testing, change approvals, environment provisioning, or deployment.

By identifying and alleviating these bottlenecks, organizations improve flow and reduce lead time.

Since all three statements (A, B, C) are accurate representations of ToC, the correct answer isD - All of the Above.

NEW QUESTION # 70

Which of the following are benefits of automation?

- A. More frequent and turbulent releases
- B. Fewer errors and slower lead time
- C. Higher quality and faster recovery
- D. Decreased security and risk mitigation

Answer: C

Explanation:

Automationbrings multiple key benefits in DevOps:

* Higher quality:Automated tests and deployments catch errors earlier, reduce human error, and ensure consistency.

* Faster recovery:Automated monitoring and remediation help restore services quickly after incidents.

* Other options either decrease quality, increase errors, or make releases less predictable-contradicting DevOps goals.

Extract-style reference:

"Automation reduces errors, increases quality, accelerates lead time, and shortens recovery by ensuring repeatable, reliable processes."

-DevOps Handbook

PeopleCert DevOps Foundation v3.6:Automation is a pillar of DevOps, referenced throughout the syllabus as a key driver for speed and reliability.

NEW QUESTION # 71

Which of the following is NOT a benefit of using a Kanban board?

- A. It enables people to work collaboratively

- B. It reduces work in progress
- C. It reduces idle time and waste
- D. It defines policies and procedures

Answer: D

Explanation:
Kanban boards are visual management tools used to track work and manage flow. They provide transparency, limit work in progress (WIP), and help teams focus on delivering value quickly.
* A: Reducing WIP is a key Kanban principle that improves flow and delivery speed.
* C: Visibility fosters collaboration and shared ownership.
* D: By identifying bottlenecks and waste, Kanban helps reduce idle time.
B-defining policies and procedures-is not an inherent benefit of Kanban. While teams may display existing policies on a Kanban board, the board itself does not define them. Its role is to visualize work and flow, not to establish governance rules.
Thus,Bis the correct "NOT" benefit.
