# 2026 VMCE\_v12: Veeam Certified Engineer v12 Perfect Valid Test Review

If you want to clear the exam for Veeam VMCE\_v12 certification along with your job, there is no need to worry about it. You can choose flexible timings for the learning session and get all the Veeam Certified Engineer v12 (VMCE\_v12) exam questions online and practice with Veeam VMCE\_v12 exam dumps any time you want. There is no strict schedule for it.

## Veeam Certified Engineer v12 Sample Questions (Q129-Q134):

### NEW QUESTION # 129

Select the correct description of a synthetic full backup.

- A. A synthetic full backup combines a VPK file with one or more VIB files from a repository to generate a new VPK file
- B. A synthetic full backup combines a VIB file with one or more VPK files from a repository to generate a new VPK file
- C. A synthetic full backup will update the existing VPK with data from the hypervisor and generate a new VRB file
- D. A synthetic full backup will generate a new VPK file by getting data from the hypervisor

### Answer: D

Explanation:

Reference: [https://helpcenter.veeam.com/docs/backup/hyperv/synthetic\\_full\\_backup.html?ver=100](https://helpcenter.veeam.com/docs/backup/hyperv/synthetic_full_backup.html?ver=100)

### NEW QUESTION # 130

A company has separate networks for management traffic and data traffic. All Veeam components are communicating over the management network. How would they define the data network for backup data transfers?

- A. Use the preferred network settings to switch to data network for the backup traffic
- B. Re-add all Veeam components involved in data transfer through the required interfaces
- C. Create a global network traffic rule, set appropriate source and target IP range
- D. Update routing tables on the components involved in data transfer

### Answer: C

Explanation:

[https://helpcenter.veeam.com/docs/backup/hyperv/select\\_backup\\_network.html?ver=100](https://helpcenter.veeam.com/docs/backup/hyperv/select_backup_network.html?ver=100)

### NEW QUESTION # 131

A company has separate networks for management traffic and data traffic. All Veeam components are communicating over the management network. How would they define the data network for backup data transfers?

- A. Use the preferred network settings to switch to data network for the backup traffic
- B. Re-add all Veeam components involved in data transfer through the required interfaces
- C. Update routing tables on the components involved in data transfer
- D. Create a global network traffic rule, set appropriate source and target IP range

### Answer: A

Explanation:

Explanation

### NEW QUESTION # 132

A Veeam administrator wants to diagnose known issues in the configuration and performance of backup infrastructure without

involving Veeam Technical Support.

What feature of Veeam One should the administrator use?

- A. Log Shipping Servers
- **B. Intelligent Diagnostics**
- C. Best Practices Analyzer
- D. Business View

**Answer: B**

Explanation:

For diagnosing known issues in the configuration and performance of the backup infrastructure without the direct involvement of Veeam Technical Support, the administrator should utilize A: Intelligent Diagnostics in Veeam One. Intelligent Diagnostics is a feature designed to proactively detect known issues within the Veeam backup infrastructure by analyzing the system's event logs, performance data, and configurations. It uses predefined patterns and rules derived from common issues identified by Veeam Support to provide early warnings and suggest corrective actions. This self-service approach enables administrators to address potential problems before they impact operations, enhancing the reliability and efficiency of the backup infrastructure.

#### NEW QUESTION # 133

A new IT director wants to institute best practices for backup management and follow the 3-2-1-1-0 rule. The company has implemented a secondary off-site immutable copy of their backups to public cloud. What is missing from their strategy?

- A. Backup copies stored on two different media
- B. One backup copy offline
- C. Three copies of data in backup
- **D. Automated recoverability testing**

**Answer: D**

Explanation:

The 3-2-1-1-0 rule emphasizes having three copies of data, stored on two different types of media, with one copy off-site, one immutable or air-gapped, and zero errors verified through automated recoverability testing. While the company has implemented a secondary off-site immutable copy, automated recoverability testing is missing. This testing ensures that backups are functional and can be restored without errors, completing the strategy and aligning with best practices.

#### NEW QUESTION # 134

.....

If you are craving for getting promotion in your company, you must master some special skills which no one can surpass you. To suit your demands, our company has launched the VMCE\_v12 exam materials especially for office workers. For on one hand, they are busy with their work, they have to get the VMCE\_v12 Certification by the little spread time.
