100% 유효한 SAFe-POPM시험패스 가능한 인증공부 시험자료

ExamPassdump를 선택함으로 여러분은 Scrum 인증SAFe-POPM시험에 대한 부담은 사라질 것입니다.우리 ExamPassdump는 끊임없는 업데이트로 항상 최신버전의 Scrum 인증SAFe-POPM시험덤프임을 보장해드립니다.만약 덤프품질을 확인하고 싶다면ExamPassdump 에서 무료로 제공되는Scrum 인증SAFe-POPM덤프의 일부분 문제를 체험하시면 됩니다.ExamPassdump 는 100%의 보장도를 자랑하며Scrum 인증SAFe-POPM시험을 한번에 패스하도록 도와드립니다.

최신 Scrum POPM SAFe-POPM 무료샘플문제 (Q43-Q48):

질문 # 43

Which role ensures that the ART has the Vision and Backlog needed to engage in PI Planning successfully?

- A. Release Train Engineer
- B. Product Management
- C. Lean-Agile Center of Excellence
- D. Product Owner

정답: B

설명:

Explanation

Product Management is the role that ensures that the Agile Release Train (ART) has the Vision and Backlog needed to engage in PI Planning successfully. Product Management is responsible for defining and communicating the Vision, which describes the future state of the solution and its features¹. Product Management also develops and maintains the Program Backlog, which contains the features and enablers that the ART will implement in the upcoming Program Increments (PIs)². Product Management collaborates with stakeholders, customers, architects, and other roles to discover, prioritize, and refine the backlog items and present them to the ART during PI Planning³.

질문 # 44

What can increase the effectiveness of Backlog Refinement?

- A. Have separate meetings with subject matter experts
- B. Include a few team members
- C. Schedule the event on a regular cadence
- D. Refine Stories during Iteration Planning

정답: C

설명:

Explanation

One of the factors that can increase the effectiveness of Backlog Refinement is to schedule the event on a regular cadence. Backlog

Refinement is the process of reviewing, updating, and prioritizing the backlog items to prepare them for future iterations or sprints¹. By scheduling the event on a regular cadence, such as once or twice per week, the team can ensure that the backlog is always accurate, relevant, and ready for planning². A regular cadence also helps the team to avoid cramming too much work into a single session, which can lead to lower quality and reduced collaboration³.

질문 # 45

Which of the following roles has content authority for the ART Backlog?

- A. System Architect
- B. Business Owner
- **C. Product Management**
- D. Product Owner

정답: C

설명:

Explanation

Product Management is the role that has content authority for the ART Backlog. The ART Backlog is a Kanban system that captures and manages the features and enablers that the Agile Release Train (ART) will implement in the upcoming Program Increments (PIs)¹. Product Management is responsible for defining and communicating the vision, value proposition, and features of the solution, as well as prioritizing and refining the backlog items². Product Management collaborates with stakeholders, customers, architects, and other roles to ensure that the ART Backlog reflects the needs and expectations of the customers and aligns with the strategic direction of the portfolio³.

질문 # 46

What is one method to establish a team's velocity?

- A. Calculate the percentage planned versus actual Stories completed during an Iteration
- B. Add the Story points for all Features completed in the Iteration
- C. Add the Story points for all the Stories planned for the Iteration
- **D. Compare the average Story points completed throughout the previous Iterations**

정답: D

설명:

One method to establish a team's velocity is to compare the average story points completed throughout the previous iterations. This gives an indication of how much work the team can realistically deliver in a given time frame, based on their past performance. To calculate the team's velocity, you can use the following formula: Team velocity = total story points completed / number of iterations. You can also use various charts and tools to visualize the team's velocity and track its progress over time¹²³⁴ References:

질문 # 47

What is one strategy for managing complex critical path challenges?

- A. Sequence work to eliminate same Iteration dependencies
- B. Distribute work to other teams
- C. Allocate work between teams based on forecasted capacity

- D. Adjust work between teams or split Features and Stories

정답: D

설명:

Explanation

One strategy for managing complex critical path challenges is to adjust work between teams or split Features and Stories. Complex critical path challenges are situations where the delivery of value depends on the completion of multiple interdependent tasks by different teams¹. These challenges can cause delays, bottlenecks, and inefficiencies in the value stream. To overcome these challenges, one option is to adjust work between teams or split Features and Stories, so that the dependencies are minimized or eliminated². This can help improve the flow of work, reduce the risk of integration issues, and increase the flexibility and responsiveness of the teams³.
