# Get Certified on the First Attempt with Juniper JN0-224 Exam Dumps

Hundreds of IT aspirants have cracked the Automation and DevOps, Associate (JNCIA-DevOps) JN0-224 examination by just preparing with our real test questions. If you also want to become a Juniper JN0-224 certified without any anxiety, download Network Security Specialist JN0-224 updated test questions and start preparing today. These real JN0-224 Dumps come in desktop practice exam software, web-based practice test, and Juniper JN0-224 PDF document. Below are specifications of these three formats.

Juniper JN0-224 Exam Syllabus Topics:

Topic	Details
Topic 1	• Junos Automation Stack and DevOps Concepts: This domain covers fundamental automation tools, frameworks, APIs, and DevOps culture applicable to Junos platform operations and network management.
Topic 2	• NETCONF • XML API: This domain focuses on XML syntax, XPath expressions, NETCONF protocol, and XML API functionality for programmatic device configuration and communication.
Topic 3	• Data Serialization: This domain addresses YAML and JSON formats used for structured data representation and exchange in network automation workflows.
Topic 4	• Python • PyEZ: This domain examines Python programming with PyEZ library for Junos automation, including JSNAPy, Jinja2 templates, RPC calls, exception handling, and device configuration management.
Topic 5	• Rest API: This domain covers Junos REST API implementation, REST API Explorer tool, and cURL usage for HTTP-based device management and configuration.

JN0-224 Reliable Learning Materials, JN0-224 Valid Practice Materials

We have three versions packages of the JN0-224 exam questions to help you comprehensively. Also, all contents are carefully prepared by our researchers. So you needn't to read and memorize the boring reference books of the JN0-224 Exam. Most people have successfully passed the exam under the assistance of our study materials. So try to trust us. Our JN0-224 study materials will help you generate a wonderful life.

Juniper Automation and DevOps, Associate (JNCIA-DevOps) Sample

Questions (Q13-Q18):

NEW QUESTION # 13
You want to make a list in Python to store data.
Which statement is the correct way to accomplish this task?

- A. L = {0, 1, 2, 3, 4, 5}
- B. L = [0, 1, 2, 3, 4, 5]
- C. L = "0, 1, 2, 3, 4, 5"
- D. L = (0, 1, 2, 3, 4, 5)

Answer: B

Explanation:
In Python, to create a list, you use square brackets []. The correct syntax to create a list containing the numbers 0 through 5 is:
L = [0, 1, 2, 3, 4, 5]
This statement creates a list object that stores the specified integers.
Other options are incorrect:
A defines a string, not a list.
B defines a set, which is an unordered collection with no duplicate elements.
D defines a tuple, which is an immutable sequence, not a list.
Reference:
Python Official Documentation: Discusses lists, sets, tuples, and their syntaxes.
Python Data Structures Guide: Provides examples of creating and manipulating lists.

NEW QUESTION # 14
You are asked to develop an on-box Junos script that prevents deletion of the SNMP configuration.
Which type of script serves this purpose?

- A. event script
- B. SNMP script
- C. commit script
- D. op script

Answer: C

Explanation:
A commit script in Junos is used to enforce policies and configuration constraints on the device. These scripts are written in Extensible Stylesheet Language Transformations (XSLT) or Python and are executed automatically during the commit process of a configuration change.
In this context, to prevent the deletion of the SNMP configuration, a commit script is the appropriate choice. It can be designed to check the configuration changes being committed and reject any commit that attempts to delete or modify the SNMP configuration. This script essentially acts as a gatekeeper, ensuring that only allowable changes are committed to the device configuration.
Supporting Reference:
Juniper Networks Commit Scripts Documentation: The official Juniper documentation provides examples and use cases of commit scripts, including how they can be used to prevent unauthorized changes to the device configuration.
"Junos Automation Scripting" by Jonathan Looney: This resource gives practical examples and best practices for creating commit scripts to enforce configuration policies in Junos OS.

NEW QUESTION # 15
Which two statements about XML schema definition (XSD) files are correct? (Choose two.)

- A. XSD files ensure that everyone working with the XML document uses a common set of tags.
- B. Every XML document must have an XSD file defined for it.
- C. An XSD file is not an XML document.
- D. XSD files define all the elements in an XML document and the document XML hierarchy.

Answer: A,D

Explanation:

XML Schema Definition (XSD) files are used to define the structure and data types of an XML document. They ensure that the XML document adheres to a specific structure by defining the allowed elements, attributes, and their data types, thereby enforcing a consistent format.

Option A is correct because XSD files define the elements, attributes, and structure (hierarchy) of an XML document.

Option D is correct because XSD files provide a standardized format, ensuring that all parties working with the XML document use the same set of tags and structure.

Option B (Every XML document must have an XSD file defined for it) is incorrect; not every XML document requires an XSD file, although it's beneficial for validation.

Option C (An XSD file is not an XML document) is incorrect because XSD files themselves are written in XML.

Supporting Reference:

W3C XML Schema Definition (XSD) Documentation: Explains the purpose and structure of XSD files, including their role in defining XML document schemas.

NEW QUESTION # 16

Which Junos configuration database is updated by PyEZ by default?

- A. dynamic
- B. private
- C. ephemeral
- D. shared

Answer: B

Explanation:

An event script is used to automate responses to system events in Junos, such as an interface going down. These scripts are triggered automatically when a specified event occurs, making them suitable for tasks like monitoring interface status and executing actions when the status changes.

Option B (event) is correct because event scripts are designed for reacting to system events like an interface going down.

Option A (commit) is used for configuration changes, Option C (operation) is used for operational tasks, and Option D (SNMP) is not applicable in this context.

Supporting Reference:

Juniper Networks Event Scripts Documentation: Details how event scripts are used to automate responses to specific system events in Junos

NEW QUESTION # 17

What are two important aspects of the DevOps culture? (Choose two.)

- A. separation of duties
- B. people
- C. use of specific tools
- D. communication

Answer: B,D

Explanation:

Two important aspects of the DevOps culture are:

Communication (A): In a DevOps environment, continuous and effective communication between development, operations, and other stakeholders is crucial. It ensures that everyone is aligned, reduces misunderstandings, and facilitates faster and more efficient workflows.

People (D): DevOps is as much about the people as it is about the processes and tools. The culture emphasizes collaboration, shared responsibility, and a mindset focused on continuous improvement. Empowering people to work together across different disciplines is at the heart of DevOps.

Options B and C are not primary aspects of the DevOps culture. While tools are essential in implementing DevOps practices, the culture emphasizes communication and collaboration among people more than the use of specific tools or rigid separation of duties.

Reference:

DevOps Handbook: Discusses the cultural aspects of DevOps, with a focus on communication and people.

DevOps Best Practices: Highlights the importance of fostering a culture that prioritizes collaboration and shared goals.

NEW QUESTION # 18

......

A person's career prospects are often linked to his abilities, so an international and authoritative certificate is the best proof of one's ability. The JN0-224 exam certification is a proof of your IT ability. To pass this exam also needs a lot of preparation. The JN0-224 Exam Materials provided by Exams4sures are collected and sorted out by experienced team. Now you can have these precious materials. You can safely buy a full set of JN0-224 exam software in our official website.
