## 100% Pass Quiz 2026 Pass-Sure HashiCorp Terraform-Associate-004: HashiCorp Certified: Terraform Associate (004) (HCTA0-004) Materials

In this age of knowledge competition, we must keep up with the pace of the times, otherwise we will be eliminated. How to improve your ability and how to prove your ability is crucial. The answer is Terraform-Associate-004 Certification can help you prove your strength and increase social competitiveness. Although it is not an easy thing for somebody to pass the exam, but our Terraform-Associate-004 Exam Torrent can help aggressive people to achieve their goals. This is the reason why we need to recognize the importance of getting the test Terraform-Associate-004 certification.

## HashiCorp Certified: Terraform Associate (004) (HCTA0-004) Sample Questions (Q35-Q40):

### NEW QUESTION # 35

What is terraform plan -refresh-only intended to detect?

- A. Corrupt state files
- **B. State file drift**
- C. Empty state files
- D. Terraform configuration code changes

**Answer: B**

Explanation:

The terraform refresh-only command is intended to detect state file drift. This command synchronizes the state file with the actual infrastructure, updating the state to reflect any changes that have occurred outside of Terraform.

From terraform plan -refresh-only:

"Use this to detect drift, i.e., changes made outside of Terraform."

It compares actual infrastructure to what's recorded in the state file.

### NEW QUESTION # 36

When do changes invoked by terraform apply take effect?

- A. Immediately
- **B. Once the resource provider has fulfilled the request**
- C. After Terraform has updated the state file
- D. None of the above are correct

**Answer: B**

Explanation:

Changes invoked by terraform apply take effect once the resource provider has fulfilled the request, not after Terraform has updated the state file or immediately. The state file is only a reflection of the real resources, not a source of truth.

### NEW QUESTION # 37

When you include a module block in your configuration that references a module from the Terraform Registry, the "version" attribute is required.

- **A. False**
- B. True

**Answer: A**

Explanation:

The "version" attribute is optional when referencing a module from the Terraform Registry. If not specified, the latest version will be used, but it is often recommended to specify a version to ensure consistency across environments.

Reference:

Terraform Module Versioning

### NEW QUESTION # 38

Refer to the exhibit.

□ A resource block is shown in the Exhibit space of this page. What is the Terraform resource name of that resource block?

- A. test
- B. azurem\_resource\_group
- C. azurem
- **D. ev**

**Answer: D**

Explanation:

Rationale for Correct answer:

A Terraform resource block has the following structure:

```
resource "<RESOURCE TYPE>" "<RESOURCE NAME>" {  
  ...  
}
```

In the exhibit:

Resource type: azurerm\_resource\_group

Resource name: dev

The resource name is the second label in the resource block and is used internally by Terraform to reference the resource (e.g., azurerm\_resource\_group.dev).

Analysis of Incorrect Options (Distractors):

A . azurerm: This is the provider name, not the resource name.

B . azurerm\_resource\_group: This is the resource type, not the name.

D . test: This is the value of the name argument inside the resource, not the Terraform resource name.

Key Concept:

Understanding the distinction between resource type, resource name, and resource arguments in Terraform configurations.

Terraform Exam Objective - Read, Generate, and Modify Configurations

### NEW QUESTION # 39

A Terraform local value can reference other Terraform local values.

- **A. True**
- B. False

**Answer: A**

Explanation:

\* Rationale for Correct answer: Terraform local values are evaluated together and can reference previously defined local values within the same locals block or earlier blocks.

\* Analysis of Incorrect Options (Distractors):

\* B: Incorrect, locals can reference other locals.

\* Key Concept: Local values enable reuse and composition of expressions.
