- A. 2-Sample t-test

- B. F test
- C. ANOVA test
- D. 1-Sample t-test

**Answer: A**

#### NEW QUESTION # 206

Data are collected in xy pairs and a scatter diagram shows the points are grouped very close to a straight line that tips down on its right hand end. A reasonable value for the coefficient of correlation is:

- A. -1.8
- B. .8
- C. 0
- D. 1.3
- E. -.9
- F. 1

**Answer: E**

#### NEW QUESTION # 207

A hospital is preparing for a survey for a certification process by an accreditation body. Administration has provided hospital managers with a list of items that the assessors will be asking about. Which of the following analysis tools should management use as part of their preparation for this assessment?

- A. Measurement system analysis (MSA)
- B. Root cause analysis (RCA)
- C. Gap analysis
- D. Failure mode and effects analysis (FMEA)

**Answer: C**

Explanation:

Gap analysis is the correct tool because the hospital is comparing its current condition against an external set of expected requirements from an accreditation body. In Six Sigma and organizational assessment practice, gap analysis is used to determine the difference between the present state and a required or desired future state. In this case, the list of items from the assessors becomes the target condition or assessment standard.

Management can review each requirement, compare it with existing hospital practices, controls, records, and compliance evidence, and then identify where deficiencies or missing elements exist. This makes gap analysis ideal for certification preparation, readiness reviews, and compliance assessments. FMEA is a preventive risk tool for possible failures, RCA is used after a problem has occurred to identify causes, and MSA evaluates measurement systems. None of those directly fits the purpose of comparing current organizational readiness to an external evaluation standard. Therefore, the correct answer is C, Gap analysis, because it systematically identifies what must be closed before the accreditation survey takes place.

#### NEW QUESTION # 208

Is this a left-tail, right-tail or two-tail test?

- A. two-tail
- B. left-tail
- C. no
- D. right-tail

**Answer: D**

#### NEW QUESTION # 209
