## Plat-Admn-301資格復習テキスト & Plat-Admn-301テキスト

TopexamのSalesforceのPlat-Admn-301試験トレーニング資料は高度に認証されたIT領域の専門家の経験と創造を含んでいるものです。私たちのIT専門家は受験生のために、最新のSalesforceのPlat-Admn-301問題集を提供します。うちの学習教材の高い正確性は言うまでもありません。受験生が最も早い時間で、一回だけでSalesforceのPlat-Admn-301認定試験に合格できるために、Topexamはずっとがんばります。

## Salesforce Plat-Admn-301 認定試験の出題範囲:

--

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"> <li>• <b>Auditing and Monitoring:</b> This section of the exam measures skills of a Salesforce Support Specialist and covers the tools used to monitor system behavior and review user activity. It includes understanding debug logs, setup audit trail, and methods for ensuring sensitive data is handled correctly in both production and sandbox environments. It also explains how to review and troubleshoot security settings, including recognizing pending updates that might affect system access.</li> </ul>
トピック 2	<ul style="list-style-type: none"> <li>• <b>Data and Analytics Management:</b> This section of the exam measures skills of Salesforce Data Analyst and covers data quality assessment, data enrichment, and duplicate management. It explains how to choose appropriate reporting and analytics tools for advanced requirements, including custom report types, snapshots, formulas, joined reports, and dashboard configurations. It also covers methods for connecting external data sources using big objects, external objects, data warehouses, data lakes, and Salesforce Connect. Finally, it describes the suitable tools and methods for importing data, including Data Loader, Data Import Wizard, and external IDs.</li> </ul>
トピック 3	<ul style="list-style-type: none"> <li>• <b>Cloud Applications:</b> This section of the exam measures skills of Salesforce Consultant and covers the standard Salesforce capabilities that support sales and service operations. It includes features such as products, price books, schedules, orders, quotes, and the tools that help with forecasting and territory management. The section also describes how to create Salesforce Knowledge articles, manage entitlements, support service workflows, and enable interactions through chat, case feed, Omni-Channel, console apps, and Experience Cloud sites. It also introduces the broader Salesforce suite that extends core platform functionality.</li> </ul>

## Salesforce Certified Platform Administrator II 認定 Plat-Admn-301 試験問題 (Q181-Q186):

### 質問 # 181

Cloud Kicks (CK) has an email parsing tool. CK wants to ensure that when certain field are updated, the Case Owner is notified by email.

What should the administrator use to email the Case Owner?

- **A. After Save Flow**
- B. Before Save Flow
- C. Outbound Message
- D. Email-to-Case

正解: A

解説:

An after save flow is a type of flow that runs in the background after a record is saved and performs actions based on the record data or changes. An after save flow does not require user input or interaction and can be triggered by a record-triggered flow element or by an Apex trigger. In this case, you can create an after save flow that runs when a case record is updated and delivers status update email to customers based on certain criteria or conditions. References: [https://help.salesforce.com/s/articleView?id=sf.flow\\_trigger\\_types.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_trigger_types.htm&type=5)

[https://help.salesforce.com/s/articleView?id=sf.flow\\_concepts\\_trigger.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_concepts_trigger.htm&type=5)

### 質問 # 182

The administrator at AW Computing has received an email for a system error indicating that their organization has reached its hourly limit processing workflow time triggers.

Which two processes should the administrator review? Choose 2 answers

- **A. Time-Based Workflows**
- B. Paused now Interviews
- **C. Debug Logs**
- D. Apex Triggers

正解: A、C

解説:

Time-based workflows are a type of workflow that execute actions based on a specific time trigger, such as a certain number of days before or after a date field on a record. Time-based workflows can cause delays in processing because they are added to a queue and processed in one-hour batches. If the queue is large or the system is busy, the actions may not execute at the exact time they are scheduled. Therefore, time-based workflows can contribute to reaching the hourly limit for processing workflow time triggers. References:

[https://help.salesforce.com/s/articleView?id=sf.workflow\\_limits.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.workflow_limits.htm&type=5)

#### 質問 # 183

A sales manager at AW Computing has created a contact record but is missing some of the information to complete the record. The organization-wide default for Accounts is set to Public Read Only, and Contacts are controlled by parent.

- **A. Sales manager and system administrator**
- B. Users above the sales manager in the role hierarchy
- C. All users in the organization
- D. Who will be able to edit this new contact record?
- E. The owner and users below the owner in the role hierarchy

正解: A

解説:

The sales manager and system administrator will be able to edit this new contact record because they are either the owner or have Modify All Data permission respectively. Users above or below the sales manager in the role hierarchy will not be able to edit this contact record because contacts are controlled by parent and accounts are set to Public Read Only. All users in the organization will be able to view but not edit this contact record because accounts are set to Public Read Only. References:

#### 質問 # 184

A developer is getting errors for Production deployment. The test deployment in the Full sandbox, which included a local test run, was successful. The Full sandbox was last refreshed 2 weeks ago.

Where should the administrator check to see what was recently changed?

- A. Field History
- **B. Setup Audit Trail**
- C. Dev Console
- D. Salesforce Optimizer

正解: B

解説:

Setup Audit Trail is a tool that tracks the recent setup changes made by anyone in an org. It can help identify who made what changes and when, as well as any errors or failures that occurred during the changes. Setup Audit Trail can help troubleshoot deployment issues by comparing the changes made in production with those made in sandbox.

#### 質問 # 185

The administrator at Cloud Kicks has been asked to delete a large number of quote line items. The administrator receives a .

csv file with the record IDs to be deleted. The administrator uses Data Loader to delete them and selects Use Bulk API. When the job runs, every record shows an 'entity is deleted' error in the error file that is created.

What is the reason for the error?

- A. Deleting with Data Loader can only be done in Batch API mode.
- B. The batch size selected was greater than the 200 record limit.
- **C. One of the IDs in the batch referenced a record that was in the recycle bin.**
- D. This is the standard error message when records are deleted using Bulk API.

正解: C

解説:

One of the IDs in the batch referenced a record that was in the recycle bin because deleting records with Bulk API does not delete records permanently but moves them to the recycle bin. Therefore, if a record ID in the batch matches an existing record ID in the recycle bin, an 'entity is deleted' error will occur.

## 質問 # 186

.....

IT 職員のそれぞれは昇進または高給のために頑張っています。これも現代社会が圧力に満ちている一つの反映です。そのためにSalesforceのPlat-Admn-301認定試験に受かる必要があります。適当なトレーニング資料を選んだらこの試験はそんなに難しくなくなります。TopexamのSalesforceのPlat-Admn-301「Salesforce Certified Platform Administrator II」試験トレーニング資料は最高のトレーニング資料で、あなたの全てのニーズを満たすことができますから、速く行動しましょう。
