Accurate Valid Test JN0-105 Experience and Newest JN0-105 Downloadable PDF & Well-Prepared Junos, Associate (JNCIA-Junos) Exam Syllabus

Revealing whether or not a man succeeded often reflect in the certificate he obtains, so it is in IT industry. Therefore there are many people wanting to take Juniper JN0-105 exam to prove their ability. However, want to pass Juniper JN0-105 Exam is not that simple. But as long as you get the right shortcut, it is easy to pass your exam. We have to commend ValidTorrent exam dumps that can avoid detours and save time to help you sail through the exam with no mistakes.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q76-Q81):

NEW QUESTION # 76

You are asked to configure your device running Junos OS to automatically archive your configuration upon commit. In this scenario, which two methods are supported by the Junos OS? (Choose two)

- A. FTP
- B. RCP
- C. HTTP
- D. SCP

Answer: B,D

Explanation:

Junos OS supports multiple methods for automatically archiving configurations upon commit. Two of the supported methods are SCP (Secure Copy Protocol) and RCP (Remote Copy Protocol). These methods can be configured to save the configuration files to a remote server automatically whenever a commit is made.

Reference:

"You can configure Junos OS to automatically archive the configuration using protocols such as SCP and RCP upon commit."

NEW QUESTION # 77

What are two methods for navigating to configuration mode from an operational mode prompt? (Choose two.)

- A. Use the edit command.
- B. Use the configure command.
- C. Use the quit command.
- D. Use the exit command.

Answer: A,B

Explanation:

In Junos OS, to navigate from operational mode to configuration mode, you can use either the `edit` or `configure` command. Both commands move the CLI from operational mode, where you can view the state of the device, to configuration mode, where you can make changes to the device's configuration.

NEW QUESTION # 78

Which character is used to filter the command output in the Junos CLI?

- A. |
- B. >
- C. ?
- D. <

Answer: A

Explanation:

In the Junos CLI, the pipe character `|` is used as a filter operator to refine command output. This operator can be combined with various filtering commands like `match`, `except`, `count`, etc., to display only the relevant portions of the command output. For example, using `| match <pattern>` filters the output to show only the lines that contain the specified pattern, making it easier to find specific information within extensive command output. This functionality is especially useful in managing and troubleshooting complex configurations and network states, allowing for more efficient analysis of the device's operational status and configuration details.

NEW QUESTION # 79

Your network infrastructure transports data, voice, and video traffic. Users are complaining that voice and video calls are not performing to their expectations.

In this scenario, which technology would you implement to improve voice and video performance on your network?

- A. NAT
- B. STP
- C. CoS

- D. IPv6

Answer: C

Explanation:

In a network that carries diverse types of traffic like data, voice, and video, ensuring the performance of latency-sensitive applications such as voice and video calls is crucial. Class of Service (CoS) is a technology designed to prioritize network traffic, ensuring that critical applications like voice and video receive the necessary bandwidth and minimal latency. CoS mechanisms can include traffic classification, traffic policing, queue management, and scheduling. By implementing CoS, network administrators can assign higher priority to voice and video traffic, thus improving their performance across the network and addressing the users' complaints about call quality.

NEW QUESTION # 80

Which statement is correct when multiple users are configuring a Junos device using the configure private command?

- A. A commit by any user will commit changes made by all active users.
- **B. Each user gets their own candidate configuration.**
- C. Each user shares the same candidate configuration.
- D. A commit will not succeed until there is only a single user in configuration mode.

Answer: B

Explanation:

When multiple users are configuring a Junos device using the "configure private" command, each user gets their own candidate configuration (C). This allows for isolated configuration sessions, where changes made by one user do not impact or interfere with the changes made by another user in their private session.

NEW QUESTION # 81

.....

The high quality and high efficiency of our JN0-105 exam materials has helped many people pass exams quickly. And we can proudly claim that if you study with our JN0-105 study questions for 20 to 30 hours, then you can confidently pass the exam for sure. After our worthy customers get a JN0-105 certificate, they now have more job opportunities. The current situation is very serious. Selecting JN0-105 training guide is your best decision.
