## AZ-305 Valid Exam Braindumps & Test AZ-305 Questions Pdf

The countless candidates have already passed their AZ-305 certification exam and they all used the real, valid, and updated ExamDumpsVCE AZ-305 exam questions. So, why not, take a decision right now and ace your AZ-305 Exam Preparation with top-notch AZ-305 exam questions?

Microsoft AZ-305 exam is designed for professionals who want to validate their skills in designing Microsoft Azure infrastructure solutions. AZ-305 exam is intended for individuals who have a solid understanding of Azure services and are proficient in designing solutions that meet the needs of business requirements. AZ-305 Exam measures the candidate's knowledge of Azure infrastructure services, such as virtual machines, storage solutions, networking, and Azure Active Directory.

## Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q16-Q21):

### NEW QUESTION # 16

You have an on-premises network that uses an IP address space of 172.16.0.0/16. You plan to deploy 25 virtual machines to a new Azure subscription. You identify the following technical requirements.

- \* All Azure virtual machines must be placed on the same subnet subnet1.
- \* All the Azure virtual machines must be able to communicate with all on-premises servers.
- \* The servers must be able to communicate between the on-premises network and Azure by using a site to site VPN.

You need to recommend a subnet design that meets the technical requirements.

What should you include in the recommendation? To answer, drag the appropriate network addresses to the correct subnet. Each network address may be used once, more than once or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

### Answer:

Explanation:

Explanation:

□

### NEW QUESTION # 17

You have an Azure Functions microservice app named App1 that is hosted in the Consumption plan. App1 uses an Azure Queue Storage trigger. You plan to migrate App1 to an Azure Kubernetes Service (AKS) cluster.

You need to prepare the AKS cluster to support App1. The solution must meet the following requirements:

- \* Use the same scaling mechanism as the current deployment.
- \* Support Kubelet and Azure Container Networking Interface (CNI) networking.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct answer is worth one point.

- A. Configure the virtual node add-on.
- B. Install Kubernetes-based Event Driven Autoscaling (KEDA).
- C. Install Virtual Kubelet.
- D. Configure the AKS cluster autoscaler.
- E. Configure the horizontal pod autoscaler.

Answer: A,E

### NEW QUESTION # 18

You plan to deploy an Azure web app named App1 that will use Azure Active Directory (Azure AD) authentication.

App1 will be accessed from the internet by the users at your company. All the users have computers that run Windows 10 and are joined to Azure AD.

You need to recommend a solution to ensure that the users can connect to App1 without being prompted for authentication and can access App1 only from company-owned
