

Reliable 3V0-24.25 Test Objectives - Exam 3V0-24.25 Material

We have three different versions of our 3V0-24.25 exam questions which can cater to different needs of our customers. They are the versions: PDF, Software and APP online. The PDF version of our 3V0-24.25 exam simulation can be printed out, suitable for you who like to take notes, your unique notes may make you more profound. The Software version of our 3V0-24.25 Study Materials can simulate the real exam. And the APP online version can be applied to all electronic devices.

As the talent team grows, every fighter must own an extra technical skill to stand out from the crowd. To become more powerful and struggle for a new self, getting a professional 3V0-24.25 certification is the first step beyond all questions. We suggest you choose our 3V0-24.25 test prep ----an exam braindump leader in the field. Since we release the first set of the 3V0-24.25 quiz guide, we have won good response from our customers and until now---a decade later, our products have become more mature and win more recognition. We promise to give you a satisfying reply as soon as possible. All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our 3V0-24.25 Test Guide' growth.

Exam 3V0-24.25 Material | Exam 3V0-24.25 Labs

One of the most effective strategies to prepare for the Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) exam successfully is to prepare with actual VMware 3V0-24.25 exam questions. It would be difficult for the candidates to pass the 3V0-24.25 exam on the first try if the 3V0-24.25 study materials they use are not updated. Studying with

invalid 3V0-24.25 practice material results in a waste of time and money. Therefore, updated 3V0-24.25 practice questions are essential for the preparation of the Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) exam.

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q72-Q77):

NEW QUESTION # 72

A Cloud Administrator wants to deploy the Velero Supervisor Service to enable backup capabilities for vSphere Namespaces. The target is an S3-compatible object store.

Review the velero-install-config.yaml values file prepared for the installation:

backupStorageLocation:

name: default

provider: aws

bucket: vks-backups

config:

region: minio

s3Url: https://minio.corp.local:9000

volumeSnapshotLocation:

name: default

provider: csi

Missing Section: Credentials

The administrator attempts to install the service using the vcf-cli (or kubectl plugin) but it fails immediately.

What critical configuration component is missing from the workflow? (Select all that apply.)

- A. The s3Url must be a public AWS URL; local S3 endpoints are not supported.
- B. The volumeSnapshotLocation must be set to aws, not csi.
- C. A Kubernetes Secret containing the AWS Access Key ID and Secret Access Key must be created in the destination namespace before or during the service installation.
- D. The install command or configuration YAML must explicitly reference the credential secret name so Velero can authenticate to the S3 bucket.
- E. The Supervisor must be put into Maintenance Mode to install a Data Protection service.

Answer: C,D

NEW QUESTION # 73

In a vSphere with Tanzu environment, what is the primary Kubernetes resource used to define the specific storage provider parameters (such as the vSphere CSI driver retention policy) required to provision a volume snapshot?

- A. PersistentVolumeClaim
- B. ResourceQuota
- C. StorageClass
- D. VolumeSnapshotClass

Answer: D

NEW QUESTION # 74

A VKS Administrator is troubleshooting a failed upgrade where the new worker nodes are successfully provisioned (VMs are "Powered On") but fail to join the Kubernetes cluster. The Machine status reports NodeRegistrationFailure.

The administrator inspects the cloud-init logs on one of the failed worker VMs and finds:

/var/log/cloud-init-output.log

...

[25.123456] cloud-init[1234]: curl: (7) Failed to connect to 192.168.10.50 port 6443: Connection timed out

[25.123456] cloud-init[1234]: Error: failed to join cluster: could not connect to API server

...

192.168.10.50 is the Virtual IP (VIP) of the cluster's Load Balancer Service.

What are the likely causes of this failure? (Choose 2.)

- A. The new worker nodes were deployed into a different vSphere Zone that has no routing path to the Load Balancer VIP

network.

- B. The CNI plugin (Antrea/Calico) on the new node failed to start.
- C. The Load Balancer Service (HAProxy/Avi) is down or misconfigured, preventing traffic to the VIP from reaching the Control Plane nodes.
- D. The Network Policies in the namespace are blocking inbound traffic to the API server from the new worker nodes' IP range.
- E. The Kubernetes version of the new nodes is incompatible with the Control Plane.

Answer: A,C

NEW QUESTION # 75

A Platform Engineer needs to deploy the Contour Ingress Controller on a TKG cluster to manage Layer 7 routing for multiple microservices. The engineer wants to manage this installation as a standard Tanzu Package.

Review the following command sequence intended for the installation:

```
tanzu package available list standard.tanzu.vmware.com
```

```
tanzu package install contour \
```

```
--package-name contour.tanzu.vmware.com \
```

```
--version 1.20.2+vmware.1-tkg.1 \
```

```
--values-file contour-values.yaml
```

What is the primary role of the --values-file (contour-values.yaml) in this deployment model?

- A. It defines the list of Ingress resources (routes) that Contour should create immediately upon installation.
- B. It provides the credentials for the private registry where the Contour images are stored.
- C. It contains the TLS certificates for the applications that will be exposed by Contour.
- D. It customizes the default configuration of the Contour package, allowing the engineer to specify settings like the LoadBalancer service type (e.g., NodePort vs LoadBalancer), Envoy replica counts, and internal/external visibility.

Answer: D

NEW QUESTION # 76

In the context of vSphere with Tanzu and Tanzu Kubernetes Grid (TKG), what is the primary function of a Tanzu Package Repository?

- A. It is a Kubernetes Custom Resource (CR) that informs the cluster's package management controller (kapp-controller) where to find a collection of package metadata (definitions and versions) for installation.
- B. It is a command-line tool used to compile Go binaries for Kubernetes operators.
- C. It is a dedicated vSphere Datastore used to store Virtual Machine templates and ISO images.
- D. It is a pod running inside the Supervisor Cluster that acts as a local cache for Docker Hub images.

Answer: A

NEW QUESTION # 77

.....

The high quality of our 3V0-24.25 preparation materials is mainly reflected in the high pass rate, because we deeply know that the pass rate is the most important. As is well known to us, our passing rate has been high; 99% of people who used our 3V0-24.25 real test has passed their tests and get the certificates. I dare to make a bet that you will not be exceptional. Your test pass rate is going to reach more than 99% if you are willing to use our 3V0-24.25 Study Materials with a high quality. So it is necessary for you to know well about our 3V0-24.25 test prep.

Exam 3V0-24.25 Material: <https://www.exams4sures.com/VMware/3V0-24.25-practice-exam-dumps.html>

Not only that you can pass the exam and gain the according 3V0-24.25 certification but also you can learn a lot of knowledge and skills on the subject, VMware Reliable 3V0-24.25 Test Objectives They will ask us how many personal computers our soft version can be install, You can always revise before 3V0-24.25 exam using our PDF Question answers for VMware 3V0-24.25 exam, The high pass rate of our 3V0-24.25 exam prep is 99% to 100%.

I have no idea how they track this data, At this point, 3V0-24.25 you'll be fairly comfortable with the basics of reading and writing

The Best Reliable 3V0-24.25 Test Objectives and First-Grade Exam 3V0-24.25 Material & Trusted Exam Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Labs

The high pass rate of our 3V0-24.25 exam prep is 99% to 100%, With our 3V0-24.25 exam guide, you will achieve what you are expecting with ease.
