Now are you in preparation for NS0-528 exam? If so, you must be a man with targets. Our TestPassed are committed to help such a man with targets to achieve the goal. NS0-528 exam simulation software developed by us are filled with the latest and comprehensive questions. If you buy our product, we will offer one year free update of the questions for you. With our software, passing NS0-528 Exam will no longer be the problem.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.

Topic 2	<ul style="list-style-type: none"> • NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
Topic 3	<ul style="list-style-type: none"> • NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.
Topic 4	<ul style="list-style-type: none"> • Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 5	<ul style="list-style-type: none"> • Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.

100% Pass Quiz Network Appliance NS0-528 - Implementation Engineer - Data Protection Exam High Hit-Rate Reliable Exam Syllabus

You have an option to try the NS0-528 exam dumps demo version and understand the full features before purchasing. You can download the full features of NS0-528 PDF Questions and practice test software right after the payment. TestPassed has created the three best formats of NS0-528 practice questions. These Formats will help you to prepare for and pass the Network Appliance NS0-528 Exam. NS0-528 pdf dumps format is the best way to quickly prepare for the NS0-528 exam. You can open and use the Implementation Engineer - Data Protection Exam pdf questions file at any place. You don't need to install any software.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q214-Q219):

NEW QUESTION # 214

A customer wants to monitor the current utilization of storage capacity to ensure storage availability. They decide to implement quotas on some volumes.

What are three types of quotas that would satisfy the customer's requirement? (Choose three.)

- A. group
- B. qtree
- C. volume
- D. user
- E. aggregate

Answer: A,B,D

NEW QUESTION # 215

What NetApp data protection solution ensures that data cannot be accessed if a disk shelf is stolen?

- A. IPsec
- B. disk encryption
- C. snapshot volume
- D. SnapLock volume

Answer: A

Explanation:

Disk encryption (such as NetApp Storage Encryption or NetApp Volume Encryption) ensures that data stored on disks is inaccessible if a disk or disk shelf is stolen, because the data is encrypted at rest and requires keys that are not stored on the hardware itself.

NEW QUESTION # 216

You have multiple NetApp ONTAP clusters running on premises and in the cloud. You are asked to use NetApp BlueXP to manage the data protection relationship between these clusters.

Which two features make managing the data protection relationship easier and effective with BlueXP in the hybrid multicloud environment? (Choose two.)

- A. failover, failback, and resync with a click of a button
- B. creation of resource pools for backup management
- C. creation of SVM associations for SnapMirror SVM replication
- D. drag-and-drop replication between clusters

Answer: A,D

Explanation:

NetApp BlueXP simplifies data protection across hybrid multicloud environments by enabling:

* One-click failover, failback, and resync operations, which streamline disaster recovery workflows.

* Drag-and-drop replication, which provides an intuitive interface to easily create SnapMirror relationships between on-prem and cloud-based ONTAP clusters.

NEW QUESTION # 217

A customer is performing an ONTAP upgrade while an active SnapMirror transfer is occurring. After the cluster node reboots, the SnapMirror subsystem reports the following error: -Failed to query transfer status. (Destination is in an invalid transfer state) (Checkpoint data is invalid. (Invalid restart checkpoint provided to SnapDiff. Please delete this checkpoint and restart the transfer.)) Which two solutions would solve this issue? (Choose two.)

- A. Reestablish a peering relationship between the two clusters in the SnapMirror relationship to restart the transfer.
- B. Delete the old relationship and recreate and initialize a new SnapMirror relationship.
- C. Issue a hard abort of the current transfer and start a new update.
- D. Update the SnapMirror relationship with a new relationship label to transfer the invalid checkpoint data.

Answer: B,C

NEW QUESTION # 218

Exhibit:

A customer wants to ensure that their volumes are protected. In ONTAP System Manager, under the Protection section, you see the screen that is shown in the exhibit. The company has an asynchronous mirror policy of less than a 60-minute lag. Referring to the exhibit, which volume has a lag that exceeds the company policy?

- A. svm_fabricpool:project_b -> svm_fabricpool:project_b_dest
- B. svm_fabricpool:project_a -> svm_fabricpool:project_a_dest
- C. svm_fabricpool:demo_volume -> svm_fabricpool:demo_volume_dest
- D. svm_fabricpool:demo_volume -> svm_fabricpool:demo_volume_DR

Answer: D

NEW QUESTION # 219

.....

Our NS0-528 question torrent not only have reasonable price but also can support practice perfectly, as well as in the update to

facilitate instant upgrade for the users in the first place, compared with other education platform on the market, the NS0-528 Exam Question can be said to have high quality performance. We can sure that you will never regret to download and learn our study material, and you will pass the exam at your first try.
