Die angemessene Bildung ist die Garantie des Erfolgs. Deshalb ist es sehr wichtig, diese Prüfung auszuwählen. Wir bieten Ihnen die neuesten und effektivsten Prüfungsfragen und Testantworten zur CompTIA SY0-701 Zertifizierung. Und Wir ZertFragen garantieren 100% Erfolg. Und der Preis ist auch günstig. Die Bezahlung bei Paypal kann Ihre Sicherheit garantieren. Wir ZertFragen bieten die besten Lernhilfe für CompTIA SY0-701 Prüfungen und auch aktualisieren immer die Prüfungsunterlagen.

## CompTIA SY0-701 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>Security Program Management and Oversight: Finally, this topic discusses elements of effective security governance, the risk management process, third-party risk assessment, and management processes. Additionally, the topic focuses on security compliance requirements, types and purposes of audits and assessments, and implementing security awareness practices in various scenarios.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>General Security Concepts: This topic covers various types of security controls, fundamental security concepts, the importance of change management processes in security, and the significance of using suitable cryptographic solutions.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>Security Architecture: Here, you'll learn about security implications across different architecture models, applying security principles to secure enterprise infrastructure in scenarios, and comparing data protection concepts and strategies. The topic also delves into the importance of resilience and recovery in security architecture.</li> </ul>

Thema 4	<ul style="list-style-type: none"> <li>• Security Operations: This topic delves into applying common security techniques to computing resources, addressing security implications of proper hardware, software, and data asset management, managing vulnerabilities effectively, and explaining security alerting and monitoring concepts. It also discusses enhancing enterprise capabilities for security, implementing identity and access management, and utilizing automation and orchestration for secure operations.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>• Threats, Vulnerabilities, and Mitigations: In this topic, you'll find discussions comparing threat actors and motivations, explaining common threat vectors and attack surfaces, and outlining different types of vulnerabilities. Moreover, the topic focuses on analyzing indicators of malicious activity in scenarios and exploring mitigation techniques used to secure enterprises against threats.</li> </ul>

## **SY0-701 Mit Hilfe von uns können Sie bedeutendes Zertifikat der SY0-701 einfach erhalten!**

ZertFragen ist eine Website, die alle Informationen zur verschiedenen CompTIA -Zertifizierungsprüfungen bieten kann. ZertFragen kann die besten und neuesten Prüfungsressourcen für Sie bereitstellen. Wenn Sie ZertFragen wählen, können Sie sich unbesorgt auf Ihre CompTIA SY0-701 Zertifizierungsprüfung vorbereiten. Unsere Prüfungsunterlagen garantieren Ihnen, dass Sie 100% die CompTIA SY0-701 Zertifizierungsprüfung bestehen können. Wenn nicht, geben wir Ihnen eine volle Rückerstattung oder aktualisieren schnell die CompTIA SY0-701 Prüfungsfragen- und antworten. ZertFragen kann Ihnen Hilfe bei der CompTIA SY0-701 Zertifizierungsprüfung sowie bei Ihrer zukünftigen Arbeit bieten. Zwar gibt es viele Möglichkeiten, die Ihnen zu Ihrem Ziel verhelfen, aber es ist die klügste Wahl, wenn Sie ZertFragen wählen. Mit ZertFragen können Sie mit wenigem Geld die Prüfung sicherer bestehen. Außerdem bieten wir Ihnen einjährigen kostenlosen Update-Service.

## **CompTIA Security+ Certification Exam SY0-701 Prüfungsfragen mit Lösungen (Q128-Q133):**

### **128. Frage**

A private equity firm has been the target of protests. The firm discovers its public website has been defaced. Which of the following is most likely the threat actor?

- A. Organized crime
- B. Unskilled attacker
- **C. Hactivist**
- D. Nation-state

**Antwort: C**

Begründung:

Defacement tied to public protests signals an ideologically motivated actor. Hactivists target visibility - public sites - to broadcast a message or embarrass the organization, rather than to steal money or state secrets.

### **129. Frage**

Which of the following non-production sites is an operational mirror of the primary data center and is ready for use if the primary data center experiences an outage?

- **A. Hot**
- B. Frozen
- C. Warm
- D. Cold

**Antwort: A**

Begründung:

A hot site is a fully operational mirror of the primary data center, maintained in real time and ready to take over operations

immediately if the primary site experiences an outage.

### 130. Frage

A business provides long-term cold storage services to banks that are required to follow regulator-imposed data retention guidelines. Banks that use these services require that data is disposed of in a specific manner at the conclusion of the regulatory threshold for data retention. Which of the following aspects of data management is the most important to the bank in the destruction of this data?

- A. Procurement
- B. Certification
- C. Classification
- D. Encryption

**Antwort: C**

Begründung:

Classification is the process of assigning a level of sensitivity and handling requirements to data, which informs its lifecycle management, retention, and disposal methods. In regulated industries such as banking, proper data classification ensures that data subject to legal or regulatory requirements is destroyed according to those requirements at the end of its retention period. This directly guides how the data should be handled and disposed of.

Reference:

CompTIA Security+ SY0-701 Official Study Guide, Domain 5.4: "Classification dictates data handling, storage, retention, and destruction policies in compliance with regulatory requirements." Exam Objectives 5.4: "Given a scenario, implement data security and privacy practices."

### 131. Frage

The security operations center is researching an event concerning a suspicious IP address. A security analyst looks at the following event logs and discovers that a significant portion of the user accounts have experienced faded log-in attempts when authenticating from the same IP address:

□ Which of the following most likely describes attack that took place?

- A. Dictionary
- B. Brute-force
- C. Spraying
- D. Rainbow table

**Antwort: C**

Begründung:

Password spraying is a type of attack where an attacker tries a small number of commonly used passwords across a large number of accounts. The event logs showing failed login attempts for many user accounts from the same IP address are indicative of a password spraying attack, where the attacker is attempting to gain access by guessing common passwords.

References = CompTIA Security+ SY0-701 study materials, particularly in the domain of identity and access management and common attack vectors like password spraying.

### 132. Frage

Which of the following is the main consideration when a legacy system that is a critical part of a company's infrastructure cannot be replaced?

- A. Resource provisioning
- B. Complexity
- C. Single point of failure
- D. Cost

**Antwort: C**

### 133. Frage
