

DA0-002 Demotesten - DA0-002 Zertifizierungsantworten

Übrigens, Sie können die vollständige Version der Pass4Test DA0-002 Prüfungsfragen aus dem Cloud-Speicher herunterladen: https://drive.google.com/open?id=1bkdpp7eVVjzMZz5N7igh-T3a8ochNcO_

Wenn wir am Anfang die Fragenkataloge zur CompTIA DA0-002 Zertifizierungsprüfung bieten, haben wir niemals geträumt, dass wir so einen guten Ruf bekommen können. Wir geben Ihnen die unglaubliche Garantie. Wenn Sie die Produkte von Pass4Test für Ihre CompTIA DA0-002 Zertifizierungsprüfung benutzen, versprechen wir Ihnen, die Prüfung 100% zu bestehen.

Haben Sie CompTIA DA0-002 Dumps von Pass4Test benutzt? Diese Dumps beinhalten die aktualisierten Prüfungsfragen, die auch alle mögliche Prüfungsfragen in der aktuellen Prüfung vorhanden sind. Es kann Ihnen garantieren, nur einmal die CompTIA DA0-002 Prüfung zu bestehen. Diese Dumps kann Ihnen helfen, unglaubliche Ergebnisse zu bekommen. Wenn Sie in der CompTIA DA0-002 Prüfung durchgefallen sind, geben wir Ihnen voll Geld zurück. Deshalb müssen Sie sorglos diese Dumps benutzen. Sie können den Erfolg erreichen, wenn Sie die Prüfungsunterlagen von Pass4Test benutzen.

DA0-002 Zertifizierungsantworten, DA0-002 Unterlage

Gott ist gerecht, und jeder ist nicht perfekt. Wie wir alle wissen, ist der Wettbewerb in der IT-Branche sehr heftig. So jeder will die IT-Zertifizierung erhalten, um einen Wert zu erhöhen. Ich denke auch so. Aber es ist zu schwierig für ich. Glücklicherweise habe ich die Dumps zur CompTIA DA0-002 Zertifizierung von Pass4Test im Internet gesehen. Dann brauche ich mich keine Sorgen zu machen. Die Fragenkataloge zur CompTIA DA0-002 Prüfung von Pass4Test sind wirklich gut. Sie sind umfassend und zielgerichtet. Wenn Sie auch ein Mitgleid der IT-Branche sind, fügen Sie schnell die CompTIA DA0-002 Prüfung Fragenkataloge von Pass4Test in den Warenkorb hinzu. Zögern Sie nicht. Die Fragenkataloge zur CompTIA DA0-002 Prüfung von Pass4Test sind Ihr bester Partner.

CompTIA DA0-002 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none">• Data Mining: This section of the exam measures skills of a Business Intelligence Analyst and covers how data is collected, cleaned, and prepared for analysis. It explains methods like ETL and ELT for data integration, as well as web scraping, API use, and survey data collection. Candidates are expected to identify issues like missing or duplicated data and apply techniques like filtering, sorting, merging, and normalizing. The section also touches on query optimization strategies to improve data handling efficiency.

Thema 2	<ul style="list-style-type: none"> • Visualization: This section of the exam measures skills of a Data Visualisation Specialist and focuses on turning raw data into clear, visual insights. It teaches how to match visual formats like bar charts, heat maps, and line graphs to specific audiences and needs. Candidates must understand how to create dashboards and reports using proper design elements such as labels, layout, branding, and colour schemes. This section also includes best practices for dashboard development and delivery through various platforms and user access levels.
Thema 3	<ul style="list-style-type: none"> • 5.0 Data Governance, Quality, and Controls
Thema 4	<ul style="list-style-type: none"> • Data Concepts and Environments: This section of the exam measures the skills of a Junior Data Analyst and focuses on understanding core data concepts such as database types, schema structures, and data formats. It highlights differences between structured and unstructured data, compares file types like CSV, JSON, and XML, and introduces key ideas about data dimensions and slowly changing dimensions. Knowing how data is stored and organized helps professionals better prepare for analysis and reporting tasks.
Thema 5	<ul style="list-style-type: none"> • Data Analysis: This section of the exam measures skills of a Reporting Analyst and includes foundational knowledge of statistical methods such as averages, variances, and standard deviation. It covers how to use data to find patterns, track performance, and make predictions. This domain also introduces hypothesis testing, regression, correlation, and different types of analysis like exploratory and trend analysis. Candidates should also be aware of common tools used for analysis, including Excel, SQL, Python, R, and popular BI platforms like Tableau and Power BI.

CompTIA Data+ Exam (2025) DA0-002 Prüfungsfragen mit Lösungen (Q17-Q22):

17. Frage

A data analyst is creating a new dataset that involves bringing together the following datasets:

Name

ID

Date of birth

Frank

23525

3/19

Martha

11290

6/13

Ellen

12141

11/4

ID

Address

City

State

23525

1234 Harding

Chicago

IL

11040

935 Terrace Hills

Chino

CA

11290

2 Speedway

Miami

FL

Which of the following would be the output if the data analyst does a FULL JOIN?

- A. Name
ID
Date of birth
Address
City
State
Frank
23525
3/19
1234 Harding
Chicago
IL
Martha
11290
6/13
935 Terrace Hills
Chino
CA
Ellen
12141
11/4
2 Speedway
Miami
FL
- B. Name
ID
Date of birth
Address
City
State
Frank
23525
3/19
1234 Harding
Chicago
IL
Martha
11290
6/13
2 Speedway
Miami
FL
Ellen
12141
11/4
935 Terrace Hills
Chino
CA
- C. Name
ID
Date of birth
Address
City
State
Frank
23525
3/19
1234 Harding
Chicago
IL
Martha

- 11290
- 6/13
- 935 Terrace Hills
- Chino
- CA
- Ellen
- 12141
- 11/4
- 2 Speedway
- Miami
- FL
- **D. Name**
- ID**
- Date of birth**
- Address**
- City**
- State**
- Frank
- 23525
- 3/19
- 1234 Harding
- Chicago
- IL
- Martha
- 11290
- 6/13
- 2 Speedway
- Miami
- FL
- Ellen
- 12141
- 11/4
- 11040
- 935 Terrace Hills
- Chino
- CA

Antwort: D

Begründung:

This question falls under the Data Concepts and Environments domain, focusing on database operations like joins. A FULL JOIN combines all rows from both tables, including matches and non-matches, filling in NULLs where there's no corresponding data.

* The first table has IDs: 23525 (Frank), 11290 (Martha), 12141 (Ellen).

* The second table has IDs: 23525, 11040, 11290.

* A FULL JOIN includes all IDs: 23525, 11290, 12141, 11040.

* 23525 matches (Frank with 1234 Harding, Chicago, IL).

* 11290 matches (Martha with 2 Speedway, Miami, FL).

* 12141 has no match in the second table, so Address, City, and State are NULL.

* 11040 has no match in the first table, so Name and Date of birth are NULL.

* Option A: Incorrect; it includes a row for Ellen with "2 Speedway," but Ellen's ID (12141) doesn't match any address, and 11040 is missing.

* Option B: Identical to Option A, so incorrect for the same reasons.

* Option C: Incorrect; it mismatches addresses (e.g., Ellen with 935 Terrace Hills, which belongs to 11040).

* Option D: Correct; it includes all IDs, with NULLs for non-matching rows (Ellen has no address, and 11040 has no name).

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," such as performing joins in relational databases.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 1.0 Data Concepts and Environments.

18. Frage

Which of the following is found in metadata?

- A. Data lineage
- **B. Variable types**
- C. Transformations
- D. Syntax

Antwort: B

Begründung:

This question pertains to the Data Concepts and Environments domain, focusing on the content of metadata.

Metadata describes data attributes, and the task is to identify what it typically includes.

* Transformations (Option A): Transformations (e.g., data cleaning steps) are part of data lineage, not metadata.

* Data lineage (Option B): Data lineage tracks data flow and transformations, which is related to metadata but not a direct component.

* Syntax (Option C): Syntax refers to code structure, not a metadata component.

* Variable types (Option D): Metadata includes information about data fields, such as variable types (e.g., integer, string), which is a standard component.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and metadata typically contains details like variable types to describe the dataset.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 1.0 Data Concepts and Environments.

19. Frage

A company reports on seven years of data in a sales dashboard. The dashboard pulls from a sales database that has 30 years of data. The dashboard performance is slow. Which of the following is the best way to improve the dashboard's performance?

- A. Adding more RAM and rerunning
- B. Checking network connectivity
- C. Performing a code review
- **D. Filtering to include only relevant data**

Antwort: D

Begründung:

This question falls under the Data Governance domain, focusing on optimizing data quality and performance in dashboards. The dashboard is slow because it pulls from a large database (30 years) but only needs seven years of data.

* Performing a code review (Option A): A code review might identify inefficiencies, but it's not the most direct solution for this scenario.

* Checking network connectivity (Option B): Network issues might cause delays, but the primary issue is the data volume, not connectivity.

* Filtering to include only relevant data (Option C): Filtering the data to include only the last seven years reduces the dataset size, directly improving performance by minimizing the data processed.

* Adding more RAM and rerunning (Option D): Adding RAM might help, but it's a hardware solution that doesn't address the root cause of excessive data.

The DA0-002 Data Governance domain includes "data quality control concepts," such as optimizing performance by filtering data to improve efficiency.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

20. Frage

A data company needs a visualization that shows the availability zones from the last ten years and any future availability zones that the company will be using in the next five years. Which of the following is the most appropriate visualization to display this information?

- A. Mosaic plot
- B. Pie chart
- **C. Map**
- D. Bar chart

Antwort: C

Begründung:

This question falls under the Visualization and Reporting domain of CompTIA Data+ DA0-002, focusing on selecting the appropriate visualization for a specific dataset. The task is to show availability zones over a

15-year period (past and future), which involves a geographical element since availability zones are typically location-based.

* Bar chart (Option A): Bar charts are good for comparing categorical data but don't effectively show geographical locations or time-based trends across zones.

* Mosaic plot (Option B): Mosaic plots display relationships between categorical variables, not suitable for geographical or time-series data.

* Map (Option C): A map can display availability zones geographically, with annotations or layers to show changes over time (past 10 years and future 5 years), making it the most appropriate visualization.

* Pie chart (Option D): Pie charts show proportions of a whole, not suitable for geographical or time-based data.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a map is the best choice for displaying geographical availability zones over time.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 4.0 Visualization and Reporting.

21. Frage

A data analyst needs to provide a weekly sales report for the Chief Financial Officer. Which of the following delivery methods is the most appropriate?

- A. A spreadsheet with raw data
- B. A granular daily report in a dashboard
- C. A detailed text document
- **D. A high-level email**

Antwort: D

Begründung:

This question pertains to the Visualization and Reporting domain, focusing on report delivery methods for a specific audience. The Chief Financial Officer (CFO) needs a weekly sales report, suggesting a concise, executive-level summary.

* A granular daily report in a dashboard (Option A): Daily granularity is too frequent for a weekly report, and a dashboard might be too interactive for a CFO's needs.

* A detailed text document (Option B): A detailed document is too lengthy for a CFO, who typically needs a summary.

* A spreadsheet with raw data (Option C): Raw data requires further analysis, which isn't appropriate for an executive-level report.

* A high-level email (Option D): A high-level email provides a concise summary of weekly sales, tailored for an executive like a CFO, making it the most appropriate delivery method.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a high-level email is best for delivering a weekly summary to a CFO.
