And as long as you study with our C-BCBDC-2505 Practice Guide, you will find that the exam is just a piece of cake and the certification is easy to get. With the certification, you will find your future is much brighter.

SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q32-Q37):

NEW QUESTION # 32

You want to combine external data with internal data via product ID. Although the data may be inconsistent, such as the external data contains the letter "O" where the internal data contains the digit 0, you still want to combine them. Which artifact should you use for matching?

- A. Intelligent Lookup
- B. Graphical View
- C. Entity Relationship Model
- D. Analytic Model

Answer: A

Explanation:

When faced with the challenge of combining data from different sources where the matching keys (like "Product ID") are inconsistent or contain variations (e.g., "O" vs. "0"), the recommended artifact in SAP Datasphere for such fuzzy or approximate matching scenarios is an Intelligent Lookup. An Intelligent Lookup (D) leverages machine learning capabilities to identify and map records that are semantically similar but not exact matches. Unlike standard joins in graphical views or SQL views which require precise key matches, Intelligent Lookups can handle data quality issues, typos, and variations, allowing you to successfully link disparate records that would otherwise be missed. This is particularly valuable when integrating data from external systems or legacy sources where perfect data standardization is not feasible, ensuring a more comprehensive and accurate combined dataset for analysis.

NEW QUESTION # 33

What features does the SAP Analytics Cloud calendar provide?

Please choose the correct answer.

Response:

- A. Assign Reviewer
- B. Collaborate
- C. Schedule a file
- D. Create a project plan
