NEW QUESTION # 60

What are the prerequisites for creating Onboarding tasks?

Note: There are 2 correct answers to this question.

- A. Create role-based permissions to access new hire tasks
- B. Configure the Select Onboarding Task Configuration business rule

- C. Configure additional tasks in the dashboard
- **D. Create an Onboarding program to assign tasks**

Answer: A,D

Explanation:

Creating Onboarding tasks in SAP SuccessFactors requires setting up the necessary permissions and program structure to ensure tasks are assigned and accessible to the appropriate users.

According to the SAP SuccessFactors Onboarding Configuration Guide:

* Create role-based permissions to access new hire tasks (Option A): Role-based permissions (RBPs) must be configured in Manage Permission Role to grant access to onboarding tasks for roles like hiring managers, HR coordinators, or new hires. This includes permissions like Complete Data Collection Task or Access New Hire Data.

* Create an Onboarding program to assign tasks (Option C): An Onboarding program must be created in Manage Onboarding Program to define the sequence of tasks and assign them to specific roles or users, such as new hires or managers.

Option B (Configure additional tasks in the dashboard) is incorrect because tasks are configured in the Onboarding program or Process Variant Manager, not directly in the dashboard. Option D (Configure the Select Onboarding Task Configuration business rule) is incorrect because no such standard rule exists for task creation; rules are used for other purposes like validation or assignment.
